Phantom Limbs and Body Integrity Identity Disorder Monika Loewy, 2019-11-21 *Phantom Limbs and Body Integrity Identity Disorder* discusses the conditions of Phantom Limb Syndrome and Body Integrity Identity Disorder together for the first time exploring examples from literature film and psychoanalysis to re ground theories of the body in material experience The book outlines the ways in which PLS and BIID involve a feeling of rupture underlined by a desire for wholeness using the metaphor of the mirror box a therapeutic device that alleviates phantom limb pain to

examine how fiction is fundamentally linked to our physical and psychical realities Using diverse examples from theoretical and fictional works including thinkers such as Sigmund Freud Jacques Lacan Maurice Blanchot D W Winnicott and Georges Perec and films by Powell and Pressburger and Quentin Tarantino each chapter offers a detailed exploration of the mind body relationship and experiences of fragmentation bodily ownership and symbolic reconstitution By tracing these concepts the monograph demonstrates ways in which fiction can enable us to understand the psychosomatic conditions of PLS and BIID more thoroughly while providing new ways of reading psychoanalysis literary theory and fictional works The first book to analyse BIID in relation to PLS Phantom Limbs and Body Integrity Identity Disorder will be essential reading for academics and literary readers interested in the body psychoanalysis English literature literary theory film and disability

Folk Illusions K. Brandon Barker, Claiborne Rice, 2019-04-22 Wiggling a pencil so that it looks like it is made of rubber stealing your niece's nose and listening for the sounds of the ocean in a conch shell these are examples of folk illusions youthful play forms that trade on perceptual oddities In this groundbreaking study K Brandon Barker and Claiborne Rice argue that these easily overlooked instances of children's folklore offer an important avenue for studying perception and cognition in the contexts of social and embodied development Folk illusions are traditionalized verbal and or physical actions that are performed with the intention of creating a phantasm for one or more participants Using a cross disciplinary approach that combines the ethnographic methods of folklore with the empirical data of neuroscience cognitive science and psychology Barker and Rice catalogue over eighty discrete folk illusions while exploring the complexities of embodied perception Taken together as a genre of folklore folk illusions show that people starting from a young age possess an awareness of the illusory tendencies of perceptual processes as well as an awareness that the distinctions between illusion and reality are always communally formed

The Body Within Renée van de Vall, Robert Zwijnenberg, 2009 The central question of this interdisciplinary volume is whether present day medical visualisation techniques like ultrasound endoscopy CT MRI and PET scans mark a significant shift in the historical and cultural construction and experience of bodily interiority

Transport Economics Cameron Elliott Gordon, 2025-08-08 This book takes an interdisciplinary institutional and historically informed approach to the economics of transport providing a more nuanced and complete understanding of human transport choices individually and collectively and the related choice of location including the formation of cities The first principles of standard economic theory referred to here as the core model are systematically analysed with a particular focus on the strengths and weaknesses of the simplifying assumptions used The economic dynamics of modern transport systems are explored in light of theory and practice covering such topics as the role of incentives technological change and economic growth and the enabling role that transport plays in productivity Many historical and present day examples are provided to explore the real world nuance and subtlety that crops up repeatedly in transport activity using additional disciplinary lenses such as planning engineering psychology and sociology Overall the book examines the implications of the

unique particularities of human beings including the quirks of their psychologies and physical bodies for transport planning development and implementation A focus is kept on the real world policy complications that arise so frequently in the transport arena The book while aimed at university students will also appeal with its holistic thoughtful approach to researchers interested in transport urban planning and its effective delivery Policy makers and practitioners seeking a broad overview of the field beyond their specialisations will also enjoy this book
