The Other Machine

Dion Farquhar, 2014-04-23 With technological advances in reproduction no longer confined to the laboratory or involving only the isolated individual women and men are increasingly resorting to a variety of technologies unheard of a few decades ago to assist them in becoming parents The public at large and feminists as a group are confused and divided over how to view these technologies and over what positions to take on the moral and legal dilemmas they give rise to Farquhar argues that two perspectives have tended to dominate feminist discussions of these issues She labels these fundamental feminism and market liberalism By linking a theoretical approach with a practical set of issues Farquhar's *The Other Machine* provides a rigorous analysis of contemporary feminist debates

Issues in Reproductive Technology Helen B. Holmes, 1994-08 A remarkable collection of scholarly essays philosophical discussions and ethical arguments concerning reproductive choices Choice It seems as if every week there is a new case involving reproductive technologies that raises provocative often painful questions What policies should be followed by centers that preserve human embryos Are such innovations as Norplant improvements over established methods of contraception Should RU 486 be available in the U S Is prenatal diagnosis an ethically acceptable step to limiting the number of disabled people These are just some of the vital questions explored in this timely work which offers incisive analysis of the plethora of issues raised by advances in reproductive medicine The book's major sections cover abortion contraception cryopreservation of gametes and embryos surrogate motherhood and psychosocial issues of in vitro fertilization In each section introductory essays by recognized authorities such as Elizabeth Bartholet and Andrea L. Bonnickson are followed by critical articles by professionals in such fields as women's health medicine biology sociology politics and philosophy In assessing a technology the authors present well argued analyses of problems created by that technology including views from advocates and practitioners that raise attendant ethical and practical issues

Infertility in a Crowded Country Holly Donahue Singh, 2022-12-06 In Lucknow the capital of India's most populous state the stigmas and colonial legacies surrounding sexual propriety and population growth affect how Muslim women often in poverty cope with infertility In *Infertility in a Crowded Country* Holly Donahue Singh draws on interviews observation and autoethnographic perspectives in local communities and Lucknow's infertility clinics to examine access to technology and treatments and to explore how pop culture shapes the reproductive paths of women and their supporters through clinical spaces health camps religious sites and adoption agencies Donahue Singh finds that women are willing to transgress social and religious boundaries to seek healing By focusing on interpersonal connections *Infertility in a Crowded Country* provides a fascinating starting point for discussions of family kinship and gender the global politics of reproduction and reproductive technologies and ideologies and social practices around creating families

Inhorn,1994-08 In *Quest for Conception* Marcia C Inhorn portrays the poignant struggles of poor urban

Egyptian women and their attempts to overcome infertility The author draws upon fifteen months of fieldwork in urban Egypt to present moving stories of infertile Muslim women whose tumultuous medical pilgrimages have yet to produce the desired pregnancies Inhorn examines the devastating impact of infertility on the lives of these women who are threatened with divorce by their husbands harassed by their husbands families and ostracized by neighbors **Exchanging Human Bodily**

Material: Rethinking Bodies and Markets Klaus Hoeyer, 2013-01-05 This book addresses the debate usually tagged as being about markets in human body parts which is antagonistically divided into pro market and anti market positions The author provides a set of propositions about how to approach this and shows a way out of the concrete impasse of it Assumptions about markets and bodies that characterize this debate are analyzed and described while the author argues that these assumptions are in fact constitutive for exchanges of human bodily material but in unacknowledged ways It is concluded that what we need is a different analytical approach to better understand the mechanisms at play when organizations exchange organs tissues and cells for use in transplantation and fertility medicine **Determining Legal**

Parentage Yehezkel Margalit, 2019-04-25 The last few decades have witnessed dramatic changes affecting the institutions of family and parenthood If in the past the classic family was defined sociologically as a pair of heterosexual parents living together under one roof along with their children different sociological changes have led to a rapid and extreme transformation in the definitions of family marital relations parenthood and the relationship between parents and children Dr Yehezkel Margalit explores whether and to what extent there is room legally and ethically for the use of modern contractual devices and doctrines to privately regulate the establishment of legal parentage This book offers intentional parenthood as the most appropriate and flexible normative doctrine for resolving the dilemmas which have surfaced in the field of determining legal parentage By using the certainty of contract law determining the legal status of parenthood will be seen as the best method to sort out ambiguities and assure both parental and children rights *Embodied Progress* Sarah

Franklin, 2022-10-12 This new edition of Sarah Franklin's classic monograph on the development of in vitro fertilisation IVF includes two entirely new chapters reflecting on the relevance of the book's findings in the context of the past two decades and providing a state of the art review of the field today Over the past 25 years both the assisted conception industry and the academic field of reproductive studies have grown enormously IVF in particular is belatedly becoming recognised as one of the most influential technologies of the twentieth and twenty first centuries with a far reaching set of implications that have to date been underestimated understudied and under reported This pioneering text was the first to explore the emergence of commercial IVF in the United Kingdom where the technique was originally developed During the 1980s the British Parliament devised a unique system of comprehensive national regulation of assisted reproduction amidst fractious public and media debate over IVF and embryo research Franklin chronicles these developments and explores their significance in relation to classic anthropological debates about the meanings of kinship gender and the biological facts of parenthood

Drawing on extensive personal interviews with women and couples undergoing IVF as well as ethnographic fieldwork in early IVF clinics the book explores the unique demands of the IVF technique In richly detailed chapters it documents the topsy turvy world of IVF and how the experience of undergoing IVF changes its users in ways they had not anticipated Franklin argues that such experiences reveal a crucial feature of translational biomedical procedures more widely namely that these are hope technologies that paradoxically generate new uncertainties and risks in the very space of their supposed resolution The final chapter closely engages with the hope technology concept as well as the idea of having to try and uses these frames to link contemporary reproductive studies to core sociological and anthropological arguments about economy society and technology In the context of rapid fertility decline and huge growth in the fertility industry this volume is even more relevant today than when it was first published at the dawn of what Franklin calls the era of iFertility Embodied Progress is an essential read for all social science academics and students with an interest in the burgeoning new field of reproductive studies It is also a valuable resource for practitioners working in the fields of reproductive health biomedicine and policy
