**Collaborating(,) Literature(,) and Composition** Frank Gaughan, Peter H. Khost, 2007 The disciplines of

English and composition seem particularly prone to crisis driven proclamations our kids don't read the great works or they don't read at all or they can't write Crisis talk notwithstanding educators are left to theorize and practice ways to teach reading and writing with intelligence compassion and integrity However it often seems that theoretical formulations do not sufficiently explain their practicable applications and practicable discussions too rarely rise above the level of swapping recipes sharing assignments that work well in one context but may not in another Therefore the editors of this volume submit this collection of essays that strives to harmonize the all too often discordant qualities of theory and practice Each co authored essay illustrates and analyzes various classroom based strategies for productive collaboration between literature and composition This collection envisions a reciprocal to composing literature literaturing composition which entails living through literature as Louise Rosenblatt has it This process regards the literary text as a medium for creative action so that one reads not to criticize so much as to imagine new compositional possibilities The eight essays in this collection are divided into four sections which span topics that include textuality and critical pedagogy argumentation and hybrid genres student engagement and popular culture and materiality and assessment Publisher's website **The British National**

Berger Gayatri Chakravorty Spivak Bruno Latour Leon Mayhew Dorothy Smith and Max Weber Unique in its approach the collection demonstrates how the theories of these scholars come to bear on the understanding of public relations as a social activity Understanding public relations in its societal context entails a focus on such concepts as trust legitimacy understanding and reflection as well as on issues of power behavior and language Each chapter is devoted to an individual theorist providing an overview of that theorist's key concepts and contributions and exploring how these concepts can be applied to public relations as a practice Each chapter also includes a box giving a short and concise presentation of the theorist along with recommendation of key works and secondary literature Overall this volume will enhance understanding of theories and their applications in public relations expanding the breadth and depth of the theoretic foundations of public relations It will be of great interest to scholars and graduate students in public relations and strategic communication [The SAGE Handbook of Rhetorical Studies](#) Andrea A.
