Emergence Dimensions Of A New World:

The Emergence of the Fourth Dimension Mark Blacklock, 2018-04-05 The Emergence of the Fourth Dimension describes the development and proliferation of the idea of higher dimensional space in the late nineteenth and early twentieth centuries An idea from mathematics that was appropriated by occultist thought it emerged in the fin de siècle as a staple of genre fiction and influenced a number of important Modernist writers and artists Providing a context for thinking of space in dimensional terms the volume describes an active interplay between self fashioning disciplines and a key moment in the popularisation of science It offers new research into spiritualism and the Theosophical Society and studies a series of curious hybrid texts Examining works by Joseph Conrad Ford Madox Ford H G Wells Henry James H P Lovecraft and others the volume explores how new theories of the possibilities of time and space influenced fiction writers of the period and how literature shaped and was in turn shaped by the reconfiguration of imaginative space occasioned by the n dimensional turn A timely study of the interplay between philosophy literature culture and mathematics it offers a rich resource for readers interested in nineteenth century literature Modernist studies science fiction and gothic scholarship **Reason and**

Revelation Seena Fazel, John Danesh, 2002 *A Concise Encyclopedia of the Baha'i Faith* Peter Smith, 2013-10-01 Written by a well known author in the field of Baha i studies this is a comprehensive and accessible encyclopedia to the youngest of the world religions Regarded as the second most widespread faith after Christianity with adherents in almost every country around the globe the Baha i faith is nevertheless unfamiliar to many here Dr Smith traces the origins and development of the religion from 19th century Iran to the modern day introducing its central figures and major historical events combining breadth with a readable yet concise style he provides a balanced overview of Baha i scriptures doctrines and practices social teachings and organization This reference work presents a clear and knowledgeable view of a fascinating new religion

The Changing Face of Religion and Human Rights Clemens Nathan, 2009-06-02 Clemens N Nathan has devoted a lifetime to the pursuit of Human Rights to understanding and reflecting upon the concept of Human Rights to participating in and sometimes helping to create organisations and mechanisms for the protection and promotion of Human Rights to helping those who have been denied their Human Rights and to encouraging and supporting research into and scholarship on Human Rights All this has been achieved by a man who has had no formal training in the field but who has become a recognised expert through his extensive reading through working with leading exponents and by drawing upon his lively intellect his wealth of culture and his knowledge of history philosophy and religions This volume published under the auspices of the Raoul Wallenberg Institute of Human Rights and Humanitarian Law offers insight into the challenging relationship between religion and human rights Baha'i and Globalisation Annika Hvithamar, Margit Warburg, Morten Warmind, 2005-12-01 Globalisation has become a buzzword that typically refers to the intensifying integration of the world economy especially as midwifed by technological advances It also implies a growing political and cultural sense that all humanity is globally

interdependent There have always been individuals of course who have advocated such awareness one of them being the founder of the Baha i faith who formulated a spiritual equivalent as the religion s central doctrine in the late 19th century Ye are the fruits of one tree and the leaves of one branch Its emphasis on global unification made Baha i an obvious candidate for a case study on new religions and globalisation The chapters in this volume fall into two sections diachronic and synchronic The first part is organised chronologically beginning with the emergence of the globalist tendency in the messianic vision of Babism the precursor to Baha i and concluding with an analytic history of its leaders changing attitudes to international politics The second part considers a variety of global themes in contemporary Baha i practice including global thought in Baha i writings the impact of the internet and the triumphalist and secular strains in Baha i identity Though five million members make it one of the world s most successful new religions Baha i has attracted little scholarly attention Most of the academics concentrating on Baha i have contributed to this volume which will appeal not only to students of modern religious movements but to anyone interested in the ways religions can adapt to and embrace the modern world *The New World Politics of the Indo-Pacific* Josukutty C A,Joyce Sabina Lobo,2024-06-03 The book offers a vivid analysis of the new geopolitics in the Indo Pacific in terms of big power rivalry between the US China and country wise perspectives situating largely within the late 2000s and culminates with the developments of the COVID 19 period The great power shift marked by the rise of China and the relative decline of the US poses a serious challenge to the balance of power in the Indo Pacific region and the world order in general Ironically the play of realism in the region is stymied by broad partnerships of key countries that utilise the liberal approaches of cooperation with both rivals the US and China The book captures the mosaic of stakeholders rivals the US and China along with Russia other QUAD members Australia India and Japan key ASEAN members Indonesia Malaysia Singapore and Vietnam vulnerable states in East Asia viz Taiwan and South Korea and groupings including the ASEAN and QUAD that constitute the new world politics of the Indo Pacific The volume will be of great interest to scholars and researchers of Indo Pacific studies global politics and international relations **Routledge**

Unbound: Designing for Emergence in a White Water World, Volume 2 Ann M. Pendleton-Jullian, John Seely Brown, 2018-12-04 Tools for navigating today's hyper connected rapidly changing and radically contingent white water world Design Unbound presents a new tool set for having agency in the twenty first century in what the authors characterize as a white water world rapidly changing hyperconnected and radically contingent These are the tools of a new kind of practice that is the offspring of complexity science which gives us a new lens through which to view the world as entangled and emerging and architecture which is about designing contexts In such a practice design unbound from its material thingness is set free to design contexts as complex systems In a world where causality is systemic entangled in flux and often elusive we cannot design for absolute outcomes Instead we need to design for emergence Design Unbound not only makes this case through theory but also presents a set of tools to do so With case studies that range from a new kind of university to organizational and even societal transformation Design Unbound draws from a vast array of domains architecture science and technology philosophy cinema music literature and poetry even the military It is presented in five books bound as two volumes Different books within the larger system of books will resonate with different reading audiences from architects to people reconceiving higher education to the public policy or defense and intelligence communities The authors provide different entry points allowing readers to navigate their own pathways through the system of books The Rise of the Global Economy Michael Veseth, 2002 This volume is a comprehensive collection of critical essays on *The Taming of the Shrew* and includes extensive discussions of the play's various printed versions and its theatrical productions Aspinall has included only those essays that offer the most influential and controversial arguments surrounding the play The issues discussed include gender authority female autonomy and unruliness courtship and marriage language and speech and performance and theatricality *Experience on the Edge: Theorizing Liminality* Brady Wagoner, Tania Zittoun, 2021-10-19 Liminality has become a key concept within the social sciences with a growing number of publications devoted to it in recent years The concept is needed to address those aspects of human experience and social life that fall outside of ordered structures In contrast to the clearly defined roles and routines that define so much of industrial work and economic life it highlights spaces of transition indefiniteness ambiguity play and creativity Thus it is an indispensable concept and a necessary counterweight to the overemphasis on structural influences on human behavior This book aims to use the concept of liminality to develop a culturally and experientially sensitive psychology This is accomplished by first setting out an original theoretical framework focused on understanding the liminal sources of cultural experience and second an application

of concept to a number of different domains such as tourism pilgrimage aesthetics children's play art therapy and medical diagnosis Finally all these domains are then brought together in a concluding commentary chapter that puts them in relation to an overarching theoretical framework This book will be useful for graduate students and researchers in cultural psychology critical psychology psychosocial psychology developmental psychology health psychology anthropology and the social sciences cultural studies among others
