**Evolutionary Systems** G. Vijver, Stanley N. Salthe, M. Delpos, 2013-04-17 The three well known revolutions of the past centuries the Copernican the Darwinian and the Freudian each in their own way had a deflating and mechanizing effect on the position of humans in nature They opened up a richness of disillusion earth acquired a more modest place in the universe the human body and mind became products of a long material evolutionary history and human reason instead of being the central immaterial locus of understanding was admitted into the theater of discourse only as a materialized and frequently out of control actor Is there something objectionable to this picture Formulated as such probably not Why should we resist the idea that we are in certain ways and to some degree physically biologically or psychically determined Why refuse to acknowledge the fact that we are materially situated in an ever evolving world Why deny that the ways of inscription traces of past events and processes are co determinative of further evolutionary pathways Why minimize the idea that each intervention of each natural being is temporally and materially situated and has as such the inevitable consequence of changing the world The point is however that there are many more or less radically different ways to consider the mechanization of man and nature There are in particular many ways to get the message of material and evolutionary determination as well as many levels at which this determination can be thought of as relevant or irrelevant

**Evolution or Creation** Ernest L. Brannon,2019-03-27 There are two worldviews about the source of life s diversity Creation implies a Creator as the intelligent cause and evolution purports a material cause So how can we resolve this complex issue In a thought provoking discourse on the reconciliation of the controversy between evolution and Creation Dr Ernest Brannon retired biology professor and director of the Sciphre Institute presents both sides of the issue to provide a fair assessment for those challenged by life s origin and diversity Within his treatise Dr Brannon summarizes information on the two worldviews about the diversity of life in order to demonstrate where there is common ground and to differentiate between the evidence and speculation between certainty and assumption He also addresses reformation of the two worldviews examines the scientific credibility of the Genesis account of Creation and concludes with the essence of resolution Darwin s Resolution Evolution or Creation is an engaging treatise committed to reconciling the concept of evolution with faith in God through a comprehensive examination of scientific evidence [The Shape of Life](#) Rudolf A. Raff,2012-12-14 Rudolf Raff is recognized as a pioneer in evolutionary developmental biology In their 1983 book Embryos Genes and Evolution Raff and co author Thomas Kaufman proposed a synthesis of developmental and evolutionary biology In The Shape of Life Raff analyzes the rise of this new experimental discipline and lays out new research questions hypotheses and approaches to guide its development Raff uses the evolution of animal body plans to exemplify the interplay between developmental mechanisms and evolutionary patterns Animal body plans emerged half a billion years ago Evolution within these body plans during this span of time has resulted in the tremendous diversity of living animal forms Raff argues for an integrated approach to the study of the intertwined roles of development and evolution involving phylogenetic comparative and functional biology This new synthesis will interest not only scientists working in these areas but also paleontologists zoologists morphologists molecular biologists and geneticists
