Nicols, 2018-04-17 You recognize your apartment community is vulnerable to a disaster You've put in the hours to complete the CERT course Community Emergency Response Team or maybe another training But in a big emergency people around you won't know how to protect themselves much less how to help their neighbors including you That's the situation we found ourselves in and we weren't ready to accept it So we gathered up our energy our marketing skills and our experience as trainers and began what has turned out to be a 15 year experiment at improving emergency preparedness in our community This book and the others in the Series details what we have learned so far about building a neighborhood emergency response team Our goal is to share it to help others build their own neighborhood teams Of course every community is different And while we approach building a neighborhood team in three broadly defined steps we try to include many many ways to go about getting there The three steps are simple 1 Prepare yourself and your family 2 Get CERT training and build a core group around you 3 Build document and practice your neighborhood plan for credibility and consistency Sounds simple but there are many choices to be made along the way Some of the resources we've included that we hope will make your choices easier Using the advantages and watching out for the disadvantages of your unique setting multi family dwelling high rise or low rise mobilehome park single family residential neighborhood Lists of emergency supplies for survival kits evacuation kits pet survival kits etc Eight priorities for personal preparations MANY suggestions for holding meetings that will recruit new members and keep them involved We have been involved in hundreds of such meetings over the years List of emergency items your neighborhood team members will want 7 things about your building location to investigate before you even start building the team Step by step to creating the organization chart and filling in the blanks with neighbors names Sample charts communications matrix meeting invitations Legal alerts and warnings Real life short stories of things we tried that didn't work so well Finally we admit to some of our frustrations with the process and we try to remind enthusiastic leaders about what to expect from volunteers There are no guarantees in this book Emergencies by their very definition are unexpected and unknown What we do know though is that whatever preparations you and your neighbors make and whatever planning you do gives you a better chance of keeping that emergency from becoming a disaster This book will help get you started [Emergency Preparedness for Homeowner Communities](#) Virginia Nicols, 2018-04-17 As a homeowner you have a big investment in your house and property You are determined to protect it and yourself from a disaster Being prepared for emergencies is high on your list of priorities But in a big emergency how will the rest of your neighborhood fare Will people around you know how to protect themselves and how to help their neighbors including you That's the situation

we found ourselves in and we weren't ready to accept it. So we gathered up our energy, our marketing skills and our experience as trainers and began what has turned out to be a 15 year experiment at improving emergency preparedness in our community. This book details what we have learned so far about building a neighborhood emergency response team. And our goal is to share it to help others build their own neighborhood team. The book is one of a series each aimed at a different type of community: apartment, multi-family, mobilehome or business. Of course every community is different. And while we approach building a neighborhood team in three broadly defined steps we try to include many, many ways to go about getting there. The three steps are simple: 1 Prepare yourself and your family, 2 Get CERT Community Emergency Response Team training and build a core group around you, 3 Build, document and practice your neighborhood plan for credibility and consistency. Sounds simple but there are many choices to be made along the way. Some of the resources we've included that we think will make your choices easier: Using the advantages and watching out for the disadvantages of living in a particular size and type of community; Lists of emergency supplies for survival kits, evacuation kits, pet survival kits, etc; Eight priorities for personal preparations; MANY suggestions for holding meetings that will recruit new members and keep them involved. We have been involved in hundreds of such meetings over the years. List of emergency items your neighborhood team members will want and will appreciate; 7 things about your location to investigate before you even start building the team; Step by step to creating the organization chart and filling in the blanks with neighbors' names; Sample charts, communications matrix, meeting invitations; Legal alerts and warnings; Real life short stories of things we tried that didn't work so well. Finally we admit to some of our frustrations with the process and we try to remind enthusiastic leaders about what to expect from volunteers. There are no guarantees in this book. Emergencies, by their very definition, are unexpected and unknown. What we do know though is that whatever preparations you and your neighbors make and whatever planning you do gives you a better chance of keeping that emergency from becoming a disaster. This book will help get you started.

Most earthquake related casualties result from collapsing walls, flying glass and falling objects. Flooding is the most common natural disaster in the United States and can happen anywhere. Hurricanes have the power to cause widespread devastation and can affect both coastal and inland areas. Tornadoes are one of nature's most violent storms and can cause death, injury and destruction within seconds. Wildfires can occur anywhere and can destroy homes, businesses, infrastructure, natural resources and agriculture. Winter storms can occur anywhere and bring freezing rain, ice, snow, high winds or a combination of all these conditions. They can cause power outages that last for days or weeks, making it hard to keep warm and making travel very dangerous. Recent national tragedies remind us that the risk is real. Nicols,2019-09-11 From an Emergency Preparedness Planning perspective apartment living has some advantages over detached homes in that residents are housed closely together as opposed to being scattered throughout the community This makes it easier to communicate and in a disaster scenario it s likely that triage assessing seriousness of injuries can be conducted more expeditiously But there are also drawbacks particularly from the standpoint of stocking emergency supplies of food and water and ability to secure furniture and appliances by attaching them to walls etc Also depending on the type of apartment building s there may be limited avenues of escape and additional risks of fire or other hazards due to the close proximity of neighbors In 2018 I wrote the book *Emergency Preparedness for Apartment*
