Planning for Equitable Urban Agriculture in the United States Samina Raja, Marcia Caton Campbell, Alexandra Judelson, Branden Born, Alfonso Morales, 2024-03-19 This open access book, building on the legacy of food systems scholar and advocate Jerome Kaufman, examines the potential and pitfalls of planning for urban agriculture (UA) in the United States, especially in how questions of ethics and equity are addressed. The book is organized into six sections. Written by a team of scholars and practitioners, the book covers a comprehensive array of topics ranging from theory to practice of planning for equitable urban agriculture. Section 1 makes the case for reimagining agriculture as central to urban landscapes and unpacks why, how, and when planning should support UA and more broadly food systems. Section 2, written by early-career and seasoned scholars, provides a theoretical foundation for the book. Section 3, written by teams of scholars and community partners, examines how civic agriculture is unfolding across urban landscapes led largely by community organizations. Section 4, written by planning practitioners and scholars, documents local government planning tied to urban agriculture, focusing especially on how they address questions of equity. Section 5 explores UA as a locus of pedagogy of equity. Section 6 places the UA movement in the US within a global context and concludes with ideas and challenges for the future. The book concludes with a call for planning as public nurturance, an approach that can be illustrated through urban agriculture. Planning as public nurturance is a value-explicit process that centers an ethics of care, especially protecting the interests of publics that are marginalized. It builds the capacity of marginalized groups to authentically co-design and participate in planning policy processes. Such a planning approach requires that progress toward equitable outcomes is consistently evaluated through accountability measures. And finally, such an approach requires attention to structural and

institutional inequities Addressing these four elements is more likely to create a condition under which urban agriculture may be used as a lever in the planning and development of more just and equitable cities This is an open access book This is an open access book

Farm Journal ,1895 **Capitalism and the Commons** Andreas Exner,Sarah Kumnig,Stephan Hochleithner,2020-12-30 Capitalism and the Commons focuses on the political and social perspectives that commons offer how they are appropriated or suppressed by capital and state and how social initiatives and movements contest these dynamics or build their struggles on commoning The volume comprises theoretical and empirical approaches that engage with three main themes conceptualizing the commons analyzing practices of commoning and exploring commons politics In their contributions the authors focus on the development of anti capitalist commons and explore the issue of practice and politics through case studies from Colombia the Democratic Republic of Congo South Africa and Africa more broadly Austria Germany and South Korea ranging from peri urban and rural agriculture to urban commons and how they manifest in the Global South as well as in the Global North The book engages with different discourses on the commons in regard to their relevance for social change and thereby reinvigorates the political meaning of the commons It provides an original and important approach to the topic in terms of conceptualization detailing diverse empirical realities and analyzing potential perspectives In so doing the book transcends narrow disciplinary boundaries and expands the focus to the global Providing a fresh perspective on the commons as a decisive component of alternatives this title will be relevant to scholars and students of resource management social movements and sustainable development more broadly
