eat the ingredients and preparation of a dish and how it was eaten depended on a person's status and most information is available on the upper crust rather than the masses Equalizing factors might have been religious strictures and such diseases as the bubonic plague all of which are detailed here Misconceptions About the Middle Ages Stephen Harris, Bryon L. Grigsby, 2010-05-26 Brought together by an impressive international array of contributors this book presents a representative study of some of the many misinterpretations that have evolved concerning the medieval period Medieval Rhetoric Scott D. Troyan, 2004 A formidable challenge to the study of Roma Gypsy music is the muddle of fact and fiction in determining identity This book investigates Gypsy music as a marked and marketable exotic substance and as a site of active cultural negotiation and appropriation between the real Roma and the idealized Gypsies of the Western imagination David Malvinni studies specific composers including Liszt Brahms Rachmaninov Janacek and Bartók whose work takes up contested and varied configurations of Gypsy music The music of these composers is considered alongside contemporary debates over popular music and film as Malvinni argues that Gypsiness remains impervious to empirical revelations about the real Roma

The Mark of the Beast Debra Hassig, 2013-10-18 The medieval bestiary was a contribution to didactic religious literature addressing concerns central to all walks of Christian and secular life These essays analyze the bestiary from both literary and art historical perspectives exploring issues including kinship romance sex death and the afterlife *Violence in Medieval Courtly Literature* Albrecht Classen, 2012-10-12 Although courtly literature is often associated with a chivalrous and idyllic life the fifteen original essays in this collection demonstrate that the quest for love in the world of medieval courtly literature was underpinned by violence Lovers were rejected mistrust ruled rape was a rampant problem and marriage was often characterized by brutality Albrecht Classen brings together an outstanding group of historical cultural and literary scholars in this volume to investigate the complicated nuanced and often surprising unions of love and violence in courtly medieval literature Queering the Middle Ages Glenn Feldman, Steven F. Kruger, 2001 The essays in this volume present new work that in one way or another queers stabilized conceptions of the Middle Ages allowing us to see the period and its systems of sexuality in radically different off center and revealing ways While not denying the force of gender and sexual norms the authors consider how historical work has written out or over what might have been non normative in medieval sex and culture and they work to restore a sense of such instabilities At the same time they ask how this pursuit might allow us not only to re envision medieval studies but also to rethink how we study culture from our current set of vantage points within postmodernity The authors focus on particular medieval moments Christine de Pizan's representation of female sexuality chastity in the Grail romances the illustration of the sodomite in manuscript commentaries on Dante's *Commedia* the complex ways that sexuality inflected English national politics at the time of Edward II's deposition the construction of the sodomitic Moor by Reconquista Spain Throughout their work seeks to disturb a logic that sees the past as significant only insofar as it may make sense for and of a stabilized present *An Environmental History of the Middle Ages* John

Aberth, 2013 The Middle Ages was a critical and formative time for Western approaches to our natural surroundings. An Environmental History of the Middle Ages is a unique and unprecedented cultural survey of attitudes towards the environment during this period. Humankind's relationship with the environment shifted gradually over time from a predominantly adversarial approach to something more overtly collaborative until a series of ecological crises in the late Middle Ages. With the advent of shattering events such as the Great Famine and the Black Death, considered efflorescences of the climate downturn known as the Little Ice Age that is comparable to our present global warming predicament, medieval people began to think of and relate to their natural environment in new and more nuanced ways. They now were made to be acutely aware of the consequences of human impacts upon the environment, anticipating the cyclical new ecology approach of the modern world. Exploring the entire medieval period from 500 to 1500 and ranging across the whole of Europe from England and Spain to the Baltic and Eastern Europe, John Aberth focuses his study on three key areas: the natural elements of air, water, and earth; the forest and wild; and domestic animals. Through this multi-faceted lens, *An Environmental History of the Middle Ages* sheds fascinating new light on the medieval environmental mindset. It will be essential reading for students, scholars, and all those interested in the Middle Ages. *Anna Komnene and Her Times* Thalia Gouma-Peterson, 2014-05-22 This significant critical anthology explores the life of Anna Komnene, the Byzantine context in which she wrote, and the impact of the *Alexiad* on her times and on subsequent historical works of literature. **The Italian Novella** Gloria Allaire, 2014-01-21 The novella was an important medieval and Renaissance prose narrative form that developed out of exempla and didactic literature and contributed to modern narrative forms. This is the first collection of essays dedicated to comprehensive scholarship on the Italian novella. The essays range from work on the *Decameron*, the epitome of the genre, to studies of sixteenth-century authors who often utilized transgressive or sexual themes in their novellas. **Handbook of Medieval Culture. Volume 3** Albrecht Classen, 2015-08-31 A follow-up publication to the *Handbook of Medieval Studies*, this new reference work turns to a different focus: medieval culture. Medieval research has grown tremendously in depth and breadth over the last decades. Particularly, our understanding of medieval culture of the basic living conditions and the specific value system prevalent at that time has considerably expanded to a point where we are in danger of no longer seeing the proverbial forest for the trees. The present innovative handbook offers compact articles on essential topics, ideals, specific knowledge, and concepts defining the medieval world as comprehensively as possible. The topics covered in this new handbook pertain to issues such as love and marriage, belief in God, hell and the devil, education, lordship and servitude, Christianity versus Judaism and Islam, health, medicine, the rural world, the rise of the urban class, travel, roads and bridges, entertainment, games and sport activities, numbers, measuring, the education system, the papacy, saints, the senses, death, and money. **Conflicted Identities and Multiple Masculinities** Jacqueline Murray, 2013-09-05 *Conflicting Identities and Multiple Masculinities* takes as its focus the construction of masculinity in Western Europe from the early Middle Ages until

the fifteenth century crossing from pre Christian Scandinavia across western Christendom The essays consult a broad and representative cross section of sources including the work of theological scholastic and monastic writers sagas hagiography and memoirs material culture chronicles exempla and vernacular literature sumptuary legislation and the records of ecclesiastical courts The studies address questions of what constituted male identity and male sexuality How was masculinity constructed in different social groups How did the secular and ecclesiastical ideals of masculinity reinforce each other or diverge These essays address the topic of medieval men and through a variety of theoretical methodological and disciplinary approaches significantly extend our understanding of how in the Middle Ages masculinity and identity were conflicted and multifarious

The Culture of Food in England, 1200-1500 C. M. Woolgar, 2016-04-26 In this revelatory work of social history C M Woolgar shows that food in late medieval England was far more complex varied and more culturally significant than we imagine today Drawing on a vast range of sources he charts how emerging technologies as well as an influx of new flavors and trends from abroad had an impact on eating habits across the social spectrum From the pauper s bowl to elite tables from early fad diets to the perceived moral superiority of certain foods and from regional folk remedies to luxuries such as lampreys Woolgar illuminates desire necessity daily rituals and pleasure across four centuries

Food and the Literary Imagination J. Archer, R. Marggraf Turley, H. Thomas, 2014-11-18 Food and the Literary Imagination explores ways in which the food chain and anxieties about its corruption and disruption are represented in poetry theatre and the novel The book relates its findings to contemporary concerns about food security

Christine de Pizan Barbara K. Altmann, Deborah L. McGrady, 2020-08-11 Christine de Pizan wrote voluminously commenting on various aspects of the late medieval society in which she lived Considered by many to be the first French woman of letters Christine and her writing have been difficult to place ever since she began putting her thoughts on the page Although her work was neglected in the eighteenth and nineteenth century there has been a eruption of Christine studies in recent decades making her the perfect subject for a casebook This volume serves as a useful guide to contemporary research exploring Christine s life and work as they reflected and influenced her socio political milieu

Pulp fictions of medieval England Nicola McDonald, 2013-07-19 This electronic version has been made available under a Creative Commons BY NC ND open access license Pulp Fictions of Medieval England demonstrates that popular romance not only merits and rewards serious critical attention but that we ignore it to the detriment of our understanding of the complex and conflicted world of medieval England
