

# The Political Economy of Food Price Policy in BANGLADESH

Research Brief No. 14

April 2013

SELIM RAIHAN

Global food price hikes during 2007 and 2008 resulted in a sharp rise in staple food prices in Bangladesh, which in turn led to a significant rise in the number of households falling below the poverty line. On the political front, Bangladesh was run by an unelected and undemocratic "civil" caretaker government, backed by the military, which remained in power until the end of 2008 and undertook several steps to contain price hikes. Some of these policies and programs were effective, and some were not.

Rice is central in the consumption basket.

Food security in Bangladesh is strongly linked to the production, import, and price stability of rice. Bangladesh is a net rice-importing country, but rice imports in Bangladesh have traditionally been erratic, depending on domestic production, which is often affected by natural calamities. Self-sufficiency in rice production has long been a national objective. With expanded cultivation of high-yielding paddy varieties, the once critical dependence on imports has subsided.

Bangladesh has been vulnerable to human-caused and natural calamities that threatened food security.

Since independence in 1971, Bangladesh has faced a number of human-caused and natural calamities that have threatened the food security of poor and marginalized people. These calamities include a famine in 1974, floods in 1987 and 1988, a cyclone in 1991, a flood in 1998, and a cyclone in 2007. The government

responded to these crises by supplying food for immediate relief and by helping to coordinate food aid commitments and deliveries. At the same time, as part of its price stabilization strategy, the government encouraged private sector imports, a policy that helped avoid food shortages.

The government adopted various policy measures in response to the food price hike in 2007–2008.

The government undertook a number of initiatives to promote agricultural development. These included a subsidy on fertilizer; a rehabilitation program for people affected by floods and cyclones; endowment funds for agricultural research and development; a subsidy on diesel fuel for small and marginal farmers; cash incentives for exporting agricultural products; rebates on electricity bills for entrepreneurs of agro-based industries; reduced interest rates for loans for the production of pulses, oil seeds, and spices; and distribution of agricultural and rural credit through state-owned commercial banks. Total operative tariffs on rice and wheat were reduced to zero. The annual renewal fee for value-added tax (VAT) registration by commercial importers was withdrawn. The government arranged distribution of food grains through various safety net programs, strengthened distribution of rice and pulses to the poor through BDR's Dal-Bhat program, and increased the coverage and amount of individual grants under social safety net programs. The central bank expanded agricultural credit, facilitated the distribution of subsidies on agricultural inputs, and provided soft loans for new importers of food items.

models to our analysis of East Asia's and in particular China's situation. Though millions of Chinese and other Asian people have been lifted out of poverty, inequality is rising nonetheless and contemporary Europe and Asia are both witnessing collective action against rampant economic neoliberalism in the former and the exclusion of minorities in the latter. It is difficult to overstate the relevance of this assessment which seeks answers to some central questions: Can events in Europe serve as a model for those in East Asia? Are there similarities or differences between the two regions? To what extent do political economic or social systems stimulate or inhibit collective action? How culturally equivalent are the collective actions of marginalized disadvantaged people in the two locations or are events in Europe symptomatic of specific cultural attributes? Comparing and contrasting the research tools and dominant paradigms in the social and economic sciences in East Asia and Europe as this volume does throws out some revealing results.

**The Oxford Handbook of the Economics of Food Consumption and Policy** Jayson L. Lusk, Jutta Roosen, Jason Shogren, 2013-08-15 First reference on food consumption and policy. *South Asia Economic Focus*, 2023. **South Asia Development Update, April 2025** World Bank, 2025. Growth prospects for South Asia have dimmed. The global economic environment has become more challenging and is a source of heightened downside risks. After a decade of repeated disruptions, South Asia's buffers to cushion new shocks are slim. Tackling some of its greatest inefficiencies and vulnerabilities could help South Asia navigate this unusually uncertain outlook. Unproductive agricultural sectors, dependence on energy imports, pressures from rising global temperatures and fragile fiscal positions. For most South Asian countries, increased revenue mobilization is a prerequisite for strengthening fiscal positions. Even taking into account the particular challenges of collecting taxes in South Asian economies such as widespread informal economic activity and large agriculture sectors, South Asian economies face larger tax gaps than the average emerging market and developing economy (EMDE). This suggests the need for improved tax policy and administration. Until fiscal positions have strengthened, the burden of climate adaptation will disproportionately fall on the private sector. If allowed sufficient flexibility, private sector adaptation could offset about one third of the likely climate damage by 2050. This may however require governments to remove obstacles that prevent workers and firms from moving across locations and activities. As growth prospects dim, the challenge grows to create jobs for South Asia's rapidly expanding working age population. South Asia's large diasporas could become a source of strength if their knowledge networks and other resources can be better tapped for investment and trade. *Southeast Asia* Lim Chong Yah, 2001-04-30 Latest Edition. Southeast Asia: The Long Road Ahead 3rd Edition. Southeast Asia is going through tremendous changes economically. The market-oriented economies of Brunei, Indonesia, Malaysia, the Philippines, Singapore and Thailand have been showing robust growth since the 1960s. The transitional economies of Cambodia, Laos, Myanmar and Vietnam are exhibiting signs of economic awakening and revival after years of internal political and social turmoil. Despite these encouraging signs, the region still has a long road ahead in its efforts to achieve developed nation status. This book is a serious and concise study of various important economic

aspects of Southeast Asia The existing economic studies of the region are mainly topical in nature Most books attempt to offer only a partial treatment of the issues and fail to examine these issues in a holistic manner The objective of this book is to provide a more complete cross country discussion on the economic issues and problems facing Southeast Asia Besides critically examining the multiple facets of changes and problems that have been and will be encountered by Southeast Asia the book presents a lucid exposition of the prospects of the region However it does not stop there but moves on to provide pointers and suggestions on how Southeast Asian countries should proceed with their development options and processes The book should be of interest to economists and graduate students researching on Southeast Asia It will also be extremely useful to those who want to have a better understanding of the Southeast Asian region

The Case of Japan, 1868-1937** Peer Vries, 2022-08-01 In this book Peer Vries is the first scholar to provide an extensive test of the claim that industrialization in East Asia in particular in Japan between the Meiji Restoration and World War Two would have been much more labour intensive than industrialization in the West He does this by systematically comparing the role and importance of labour and capital in Japan and in a number of Western countries at a similar stage of their industrial development He uses macro economic data as well as specific observations by people at the time It turns out that there is no reason to distinguish a specific labour intensive Japanese route of industrialization His comparative analysis provides us with a better understanding of the logic of industrialization in

both West and East      **Routledge Handbook of Southeast Asian Economics** Ian Coxhead, 2014-12-17 The Routledge Handbook of Southeast Asian Economics offers new insights into the rapidly developing economies of Southeast Asia. Despite widespread initial deprivation, Southeast Asia has achieved and sustained a remarkable rate of growth in the course of which tens of millions have successfully escaped severe poverty. Though the economies of the region vary in many dimensions, integration into the wider East Asian network of production and trade is a notable common feature, one that continues a centuries-long history of engagement with global trade. A second striking feature is the pace and extent of transformation in the structure of production and in sources of household income in the region, which has undergone remarkably rapid industrialization and urban growth. However, the search for sustained and sustainable growth through and beyond middle income continues to confront pressing economic and policy challenges. This Handbook offers a timely and comprehensive overview of Southeast Asian economic development. Organized according to the logic of chronological and thematic unity, it is structured in these sections: Growth and development over the long term; Food, agriculture and natural resources; Trade, investment and industrialization; Population, labor and human capital; Poverty and political economy. Twenty-first century challenges. This original Handbook, written by experts in their fields, is unique in the breadth and depth of its coverage. Its forward-looking perspective renders it relevant both now and in the future. This advanced-level reference work will be essential reading for students, researchers and scholars of Asian Studies, Economics and Southeast Asian studies.

**Southeast Asia: The Long Road Ahead (3rd Edition)** Chong Yah Lim, 2009-05-20 Southeast Asia is going through tremendous changes. The market-oriented economies of Brunei, Indonesia, Malaysia, the Philippines, Singapore and Thailand have been showing robust growth, particularly before the Asian financial crisis of 1997-98. The transitional economies of Cambodia, Laos, Myanmar and Vietnam are also exhibiting signs of economic awakening and revival after years of internal political and social turmoil. Despite these encouraging signs, the region still has a long road ahead to achieve developed nation status. Southeast Asia: The Long Road Ahead is a serious and concise study on various important economic aspects of Southeast Asia. Existing economic studies on the region are mainly topical in nature. Most of the publications only attempt to offer a partial treatment of the issues and fail to examine these issues in a holistic manner. The objective of this book is to provide a more complete cross-country discussion on the economic issues and problems facing Southeast Asia. Besides critically examining the multiple facets of changes and problems that have been and will be encountered by Southeast Asia, the book also presents a lucid exposition on the prospects of the region. However, it does not stop there. It moves on to provide pointers and suggestions on how Southeast Asian countries should proceed with their development options and processes. The book should be of interest to economists, graduate students on Southeast Asia and all those who want to have a better knowledge and understanding of the important Southeast Asian region. In this latest edition, data were updated and new emerging trends explored. A significant portion of the text was redrafted so as to make this edition more compact and concise.

than the earlier ones New Suggested Discussion Topics are added and contemporary issues such as the Global Financial Tsunami Asian economic integration and Michael Spence s World Bank Report are also dealt with **Price Policy for Agricultural Products and Inputs** C. Peter Timmer,1992
