associated with better recordkeeping that go beyond the public good and impact the bottom line Whenever a food related outbreak occurs traceability is called into question When lives are at stake it is critical that the root of the problem is quickly identified to prevent further illness Once the problem is found it s just as important to contain it quickly Too often recalls expand because implicated product is not readily accounted for Mention of traceability stirs fear for many in the food industry for several reasons within a company it s not clear if responsibility for traceability lies with food safety professionals involved in recalls supply chain professionals who understand product movement IT professionals who build and maintain the recordkeeping systems or regulatory professionals who need to respond to government requests for information There is also a sense that traceability is someone else s problem Few firms admit that they are the weak link and instead tout how quickly they can perform mock recalls But traceability is about more than just recalls It is about the connectivity of the supply chain as a product and its constituents travel from the farm to the consumer Because it is a systems issue there is a sense that the investment by a single firm will be meaningless if supply chain partners don t have comparable abilities This book will address both these surrounding issues and solutions Food Quality Assurance Inteaz Alli,2016-01-26 Over the past decade food quality assurance practices have changed dramatically including the wide acceptance worldwide of the HACCP and the ISO 9000 series of standards In keeping up with those changes this new edition of what is considered the top textbook and reference in the field is extensively revised to cover new versions of standards Among new areas covered are food safety risk analysis especially with regard to food bioterrorism traceability foods derived from genetically modified organisms organic foods and natural health products Expanded information is provided on farm to table food safety and international trade
