New Essays on Life Writing and the Body Christopher Stuart, Stephanie Todd, 2009-03-26 In light of materialist revisions of the Cartesian dual self and the increased recognition of memoir and autobiography as a crucial cultural index the physical body has emerged in the last twenty five years as an increasingly inescapable object of inquiry speculation and theory that intersects all of the various subgenres of life writing New Essays on Life Writing and the Body thus offers a timely original focused and yet appropriately interdisciplinary study of life writing This collection brings together new work by established authorities in autobiography such as Timothy Dow Adams G Thomas Couser Cynthia Huff and others along with essays by emerging scholars in the field Subjects range from new interpretations of well known autobiographies by Edith Wharton Gertrude Stein and Lucy Grealy as well as scholarly surveys of more recently defined subgenres such as the numerous New Woman autobiographies of the late 19th century adoption narratives and sibling memoirs of the mentally impaired Due to their wide interdisciplinary focus these essay will prove valuable not only to more traditional literary scholars interested in the classic literary autobiography but also to those in Women s Studies Ethnic and African American Studies as well as in emerging fields such as Disability Studies and Cognitive Studies

Appetites Caroline Knapp, 2010-10-08 What looks like a consciously altruistic effort to encapsulate one woman s entire life into lessons for the benefit of womankind may be just that after divulging every gruesome detail of her spiral into anorexia and subsequent self discoveries in this memoir Knapp died of lung cancer last June at age 42 Similar in tone to her previous Drinking A Love Story this work is candid and persuasive enough to reach many women with analogous problems But it s more than one woman s tragic story multitudinous interviews with women with eating disorders excerpts

from classic feminist texts and sociological statistics lend credence and categorize the book under cultural studies as much as self help Knapp hypothesizes that the feminists who came after the revolutionary 1960s herself included were stifled rather than empowered by the overwhelming choices before them They gained the freedom to hunger and to satisfy hunger in all its varied forms Unfortunately writes Knapp size obsessed fashion magazines and other social messages contradict a woman s right to desire contributing to the rise in eating disorders and other illnesses Knapp observes an aspect of the backlash against the feminist movement when women were demanding the right to take up more space in the world they were being told by a still patriarchal society to grow physically smaller Though Knapp admits it s easier to worry about the body than the soul she hopes creating a dialogue about anorexia will enable all women to nourish both
