Professional Food Manager National Environmental Health Association (NEHA), 2024-03-08

Retail Food Safety Jeffrey Farber, Jackie Crichton, O. Peter Snyder, Jr., 2014-10-07

Currently there is no one book or textbook that covers all aspects of retail food safety It is becoming apparent that a number of issues relating to retail food safety have come to the forefront in some jurisdictions of late For example a recent USDA risk assessment has pointed out that issues occurring at USA retail appear to be critical in terms of contamination of deli meat As well a large listeriosis outbreak in Quebec pointed to retail cross contamination as a key issue In terms of sanitation a number of advances have been made but these have not all been synthesized together in one chapter with a focus on retail In addition the whole area of private standards and the Global Food Safety Initiative GFSI have come to the forefront of late and these as well will be explored in great detail Other aspects related to the safety of important food commodities such as seafood meat produce and dairy will also be discussed and salient areas addressed

2016 Catalog of Federal Domestic Assistance United States. Congress. Senate. Office of Management and Budget. Executive Office of the President, 2016 Identifies and describes specific government assistance opportunities such as loans grants counseling and procurement contracts available under many agencies and programs

Foodborne Pathogens and Food Safety Md. Latiful Bari, Dike O. Ukuku, 2015-11-18 Foodborne pathogens continue to cause major public health problems worldwide and have escalated to unprecedented levels in recent years. In this book, major foodborne diseases and the key food safety issues are discussed elaborately. In addition, emerging and reemerging microbial agents and other food safety related topics are discussed. This book

Human-in-the-Loop Machine Learning Robert (Munro) Monarch, 2021-08-17 Human in the Loop Machine Learning lays out methods for humans and machines to work together effectively. Summary: Most machine learning systems that are deployed in the world today learn from human feedback. However, most machine learning courses focus almost exclusively on the algorithms, not the human-computer interaction part of the systems. This can leave a big knowledge gap for data scientists working in real-world machine learning, where data scientists spend more time on data management than on building algorithms. Human in the Loop Machine Learning is a practical guide to optimizing the entire machine learning process, including techniques for annotation, active learning, transfer learning, and using machine learning to optimize every step of the process. Purchase of the print book includes a free eBook in PDF, Kindle, and ePub formats from Manning Publications. About the technology: Machine learning applications perform better with human feedback. Keeping the right people in the loop improves the accuracy of models, reduces errors in data, lowers costs, and helps you ship models faster. About the book: Human in the Loop Machine Learning lays out methods for humans and machines to work together effectively. You'll find best practices on selecting sample data for human feedback, quality control for human annotations, and designing annotation interfaces. You'll learn to create training data for labeling, object detection, and semantic segmentation, sequence labeling, and more. The book starts with the basics and progresses to advanced techniques like transfer learning and self-supervision within annotation workflows. What's inside: Identifying the right training and evaluation data. Finding and managing people to annotate data. Selecting annotation quality control strategies. Designing interfaces to improve accuracy and efficiency. About the author: Robert Munro Monarch is a data scientist and engineer who has built machine learning data for companies such as Apple, Amazon, Google, and IBM. He holds a PhD from Stanford. Robert holds a PhD from Stanford focused on Human in the Loop machine learning for healthcare and disaster response and is a disaster response professional in addition to being a machine learning professional. A worked example throughout this text is classifying disaster-related messages from real disasters that Robert has helped respond to in the past. Table of Contents: PART 1 FIRST STEPS 1 Introduction to human in the loop machine learning 2 Getting started with human in the loop machine learning PART 2 ACTIVE LEARNING 3 Uncertainty sampling 4 Diversity sampling 5 Advanced active learning 6 Applying active learning to different machine learning tasks PART 3 ANNOTATION 7 Working with the people annotating your data 8 Quality control for data annotation 9 Advanced data annotation and augmentation 10 Annotation quality for different machine learning tasks PART 4 HUMAN-COMPUTER INTERACTION FOR MACHINE LEARNING 11 Interfaces for data annotation 12 Human in the loop machine learning products
