This book draws on a rich set of materials to examine postwar experiences of ex servicemen who were facially disfigured during the First World War Weaving together medical institutional amateur and family photographic albums under a social history framework Jason Bate underscores overlooked aspects of these men s continued hardships after returning home from the front In particular a focus is on the private sphere of the family and the complicated world of employment that disfigured veterans navigated on their return Little attention has hitherto been paid to the aftercare of disfigured veterans once discharged from the army or the long term impact on individuals and the sense of burden felt by families and local communities In addressing this neglected area the chapters here illuminate different practices of photography by doctors nurses press agencies and families across the generations to challenge our perceptions of the personal traumas of soldiers and civilians
