For Gordon H Fairbanks:

Numbami Grammar in Ethnohistorical Context Joel Bradshaw, 2025-05-31 The Numbami language is a small isolate tied to only one coastal village within the Huon Gulf family of Austronesian languages in Papua New Guinea. It is currently classified as threatened with roughly two hundred active speakers according to its latest Ethnologue listing. *Numbami Grammar in Ethnohistorical Context* is the first comprehensive description of the language and its ethnolinguistic relations to neighboring languages. Both Austronesian and Papuan Language contact has had significant effects on all the Oceanic languages of New Guinea. This description therefore offers more ethnohistorical coverage than most reference grammars do, documenting such factors as oral history sources, evidence of multilingual villages in past and present, and frequent movement and prolonged contact among the coastal languages. It also notes the recent strong influence of Jab in the German Lutheran mission lingua franca Tok Pisin, the national lingua franca, and English. Linguistic coverage focuses especially on verbs, subject mood marking, verb serialization, deverbal resultatives, prepositions, and complementizers, and the highly productive compositional semantics of two small sets of ubiquitous core verbs. The members of one set function as polysemous light verbs, while the members of the other set play complementary roles in multiverb path constructions. Numbami serial verb constructions (SVCs) include switch subject as well as same subject relationships between verbs. The subjects of some adverbial serial verbs appear to be the events described by the earlier verbs in the SVC. Although Numbami appears to be phonologically conservative, it has shed most of its inherited Oceanic morphology. Possessive suffixes exist only on a few kinship terms; there is only one set of genitive pronouns, and there are no morphological means of deriving verbs from nouns or nouns from verbs. Light verbs and resultatives work to expand the inventory of verbal expressions, and postposed attributive genitives help expand the inventory of nominal expressions. Relative clauses are postposed and marked at both ends, as in most of the neighboring Oceanic languages. One chapter notes discourse phenomena, including topic marking, tail head linkage, and a tabular analysis of the roles of overt vs. null subjects in narrative texts. Those texts are reproduced with interlinear glosses and translations in the appendices. *A Grammar of Mavea* Valérie Guérin, 2011-11-30 Spoken on Mavea Island by approximately 32 people, Mavea is an endangered Oceanic language of Vanuatu. This work provides grammatical descriptions of this hitherto undescribed language. Fourteen chapters, containing more than 1,400 examples, cover topics in the phonology and morphosyntax of Mavea, with an emphasis on the latter. Of particular interest are examples of individual speaker variation presented throughout the grammar, the presence of three linguo-labials still used today by a single speaker that were unexpectedly found before the rounded vowel *o*, and a chapter on numerals and the counting system, which have long been replaced by Bislama *s* but are remembered by a handful of speakers. Most of the grammatical descriptions derive from a corpus of texts of various genres: conversations, traditional stories, personal histories, etc., gathered during the author's fieldwork conducted for eleven months between 2005 and 2007. **The Languages and**
