From A Different Angle Observations On Being Human:

From a Different Angle Edward Lewis, 1992 The Observer and the Observed Chris Steed, 2024-11-05 This book approaches the God question in a different way than normal from the perspective of psychotherapy In a world of machine intelligence the key idea is an analogy of being between human personhood and divine personhood as the only satisfactory way of showing that our inner conscious awareness nourished by the validation of the self is responded to in ultimate terms It aims to extrapolate from below from our psychological experience to asking ultimate questions drawing lines between Observation in quantum physics The maternal gaze Recognition in social worlds that confer perception in place of invisibility The power of inter subjectivity in relational neurobiology and therapy What has to be accounted for is our sense of personhood and how that fits in with a cosmos that is at best neutral The metaphor of a wifi universe is proposed but rather than a soulless device being switched on how a human psyche comes to a sense of consciousness of its own value is the issue here A personal God is the best explanation for the evidence of how our personhood and subject status requires correspondence As engaging with a neutral AI entity is bound to be soulless the first person perspective requires an I thou relationship A universe constructed from nature by itself or one where the ultimate is impersonal energy just does not cut it or respond adequately to what is inside us This book offers an account of how the realm described by physics and our inner world can tie up perhaps the only way they can **Being Human in an Artificial World** Geoffrey W. Cheong, 2024-06-01 The vision of Raimon Panikkar is to examine an understanding of the fulness of the human experience understood ultimately in the iconic image of Jesus the Christ This book aims to explore an understanding of his work in context context of the history of humanity the emerging integral era of perception the context of the contemporary secular society which he speaks of as an artificial life and the context of creation and the creator As creature he sees the secret of life in the inter relational nature of the three creature creation and creator The unique nature of this mysterious three way unity leads him to coin a term to speak of its nature as Cosmotheandric His extensive academic background of philosophy theology and science and the broad life of spirituality lived in the context of the interreligious world of both East and West equips well his mind to probe life s nature Of his many students Ewert Cousins asks the pertinent question of how to live Panikkar s vision It is the author s contribution to respond to Cousins question while drawing upon Panikkar s cosmothendric concept by drawing upon contemporary knowledge through the model of the scriptural wisdom to love God and one s neighbour as one s self This he refers to as Relational Spirituality The integral era of history is appearing on the horizon of the global psyche to birth a new era of human mindfulness like never before Carl Jaspers has highlighted two major times of transition shaping humankind through the passing millennia that have moved humanity from a simple human life to the highly complex time of today Jaspers spoke of the transition in human consciousness through the millennium prior to the life of Jesus Christ as the First Axial Period of History Martin Heidegger Teilherd de Chardin Jean Gebser Ken Wilber Ewert Cousins Raimon Panikkar are

some of the thought leaders of our time who have made major contributions to this understanding of the emerging Integral awareness For many the disturbing changes encountered on the surface of society ring loudly of crisis Secularisation is the dominant life style primarily shaped by the cyber revolution and its Artificial Intelligence Most concerning is the range of questions humans face about their personal value and loss of substantial meaning Dr Cheong draws upon the great minds listed above in particular the work of Raimon Panikkar to map a pathway for growing more fully into an Integral way of life which he refers to as Relational Spirituality Universal Spirituality and Human Physicality Rudolf Steiner,2014-09-04 Our contemporaries who wish to keep to a narrow minded and superficial outlook are annoyed to find that spiritual science continually seeks the whole picture that it has to create a bridge between the body and the soul and truly explores how the psyche becomes corporeal and the body becomes psychological How do the soul and the spirit live in human physical bodies In our materialistic age in which the very existence of the metaphysical is widely rejected such questions are rarely posed let alone addressed In this exceptional series of lectures Rudolf Steiner speaks in scientific detail about the connection of the subtle aspects of human nature our soul and spirit to our physical constitution At the heart of this course are the well loved Bridge lectures which appear in English for the first time in their wider context Steiner discusses the solid fluid air and warmth bodies and how these are connected with the various ethers the I and human blood He goes on to describe how ideals and ideas impact the various aspects of the human constitution how morality is a source of world creativity with moral thinking imbuing life into substance and will Moral ideas have a positive effect he says whereas theoretical ones have a negative impact In the realm of the moral a new natural world comes into being and thus the moral order and the natural order are intertwined This volume also features Steiner s classic lecture on the Isis legend and its renewal today as divine wisdom Sophia Other themes include the mystery of Christ as the connection between the spiritual and physical sun the permeation of the life of thought with will love and permeation of the life of will with thoughts wisdom the path to freedom and love and their importance in the universe the metamorphosis of head and limbs through successive lives on earth the threefold nature of the human form head thorax limbs the threefold nature of the soul thinking feeling will and the threefold nature of the spirit waking dreaming sleeping Being Human in Digital Cities Myria Georgiou,2023-11-28 How is life in digital cities changing what it means to be human In this perceptive book Myria Georgiou sets out to investigate the new configuration of social order that is taking shape in today s cities Although routed through extractive datafication compulsive connectivity and regulatory AI technologies this digital order nonetheless displaces technocentrism and instead promotes new visions of humanism all in the name of freedom diversity and sustainability But the digital order emerges in the midst of neoliberal instability and crises resulting in a plurality of contrasting responses to securing digitally mediated human progress While corporate media and state actors mobilize such positive sociotechnical imaginaries to promise digitally mediated human progress urban citizens and social movements propose alternative pathways to autonomy and dignity

through and sometimes against digital technologies Investigating the dynamic workings of technology and power from a transnational and comparative perspective this book reveals the contradictory claims and struggles for the future of digital cities and their humanity In doing so it will enrich understandings of digital urbanism critical data studies and critical humanist studies *EMERGENCE AND INTERPRETATION* Ding Weixiang,2023-03-22 Mencius many assertions from virtue Being what I inherently possess to this virtue is what Heaven or Nature gives to me clearly show the basic self consciousness of virtue in pre Qin Confucianism and the confirmation that virtue originates from Heaven or Nature Then what was the reason for the Chinese Axis Age thinkers to unanimously trace the origin of human virtue back to Heaven or Nature and the mandate of Heaven Of course for them the source of human virtue is Heaven or Nature which means that they realized that human being was the limit of cognition Since in their view the problem is itself a question that transcends human cognition or that human understanding can possibly clarify both virtue itself and the source of human virtue being beyond the bounds of human knowledge Namely tracing back virtue to its source is a quest that transcends the capacity of human understanding However those who have been influenced by modern cognitive theory and who constantly explore how Confucian thought emerged as well as how it took shape cannot give a satisfying answer Therefore to trace the emergence and development of Confucianism through the perspective of the survival of agency and the foundation of the survival of agency is not only my own personal interest but also one necessary for clarifying the development of Confucianism and the legitimacy of its existence **The Art of Being Human** Richard Paul Janaro,Thelma C. Altshuler,1993 *In God's Image* Peter A. Comensoli,2018-04-24 In God s Image Recognizing the Profoundly Impaired as Persons is a bold Catholic argument in defense of the profoundly impaired While a range of theological voices can now be heard speaking up on behalf of those who live their lives at the extremes of the human condition few voices have been explicitly Catholic Comensoli draws on the irreplaceable contribution of St Thomas Aquinas to forge an engagement with one of the leading thinkers in the theology of the disabled Professor Hans Reinders While recognizing the crucial contribution that Reinders has made Comensoli situates our perception of the cognitively impaired within the horizon of God s own image refusing a reduction of the substantialist position the Catholic tradition has always valued This is linked to the fresh and countercultural community life pioneered by Jean Vanier founder of the L Arche communities For Comensoli the profoundly impaired are persons whose personhood cannot be recognized outside of the condition of their impairment and through which God s Image is perceived in all its paradoxical implications Becoming Human Chad Wellmon,2010 Examines the crisis of a late eighteenth century anthropology as it relates to the emergence of a modern consciousness that sees itself as condemned to draw its norms and very self understanding from itself Provided by publisher **Being Human** Margaret S. Archer,2000-12-28 A revindication of the concept of humanity and the primacy of practice over language *Learning Through Child Observation* Mary Fawcett,2009-07-15 This fully updated second edition of Learning Through Child Observation is a handbook for professionals

working in or students preparing to work in children's services This accessible text examines the value of observation its use in assessment and the practical aspects and methods of observational study The author focuses on the importance of fully recognising the child's developmental and emotional state when intervening and the need to see children holistically and as unique individuals within the wider context of the family and community New chapters include Views of Children and Childhood which draws on European educational and sociological perspectives and highlights the contrasting views of children and The Hundred Languages of Children which considers the place of creative engagement and multiple forms of expression by children With new material and updated chapters this second edition of a popular text will appeal to students and professionals in all children's services whether in pre school schools social care mental health or health settings **On**
