From Auschwitz To Alderney And Beyond:

From Auschwitz to Alderney and Beyond Tom Freeman-Keel, 1996 Tom Freeman Keel asks many uncomfortable questions in this book that attempts to answer questions like why do so many people try to cover up the holocaust or why so many Nazi war criminals are still not charged for their crimes 'Adolf Island' Caroline Sturdy Colls, Kevin Colls, 2022-03-15 Adolf Island offers new forensic archaeological and spatial perspectives on the Nazi forced and slave labour programme that was initiated on the Channel Island of Alderney during its occupation in the Second World War Drawing on extensive archival research and the results of the first in field investigations of the crime scenes since 1945 the book identifies and characterises the network of concentration and labour camps fortifications burial sites and other material traces connected to the occupation providing new insights into the identities and experiences of the men and women who lived worked and died within this landscape Moving beyond previous studies focused on military aspects of occupation the book argues that Alderney was intrinsically linked to wider systems of Nazi forced and slave labour The Changing Face of the Channel Islands Occupation Hazel Knowles Smith, 2006-12-06 This independent study has already attracted controversy Containing much fresh evidence it vividly portrays the Islanders day to day Occupation experiences whilst exploring and often refuting what are today becoming received ideas of a mostly shameful wartime past *The Channel Islands at War* Robert Bard, 2014-05-15 The incredible true story of what really happened in occupied Guernsey during the Second World War

Holocaust Archaeologies Caroline Sturdy Colls, 2015-02-28 *Holocaust Archaeologies Approaches and Future Directions* aims to move archaeological research concerning the Holocaust forward through a discussion of the variety of the political social ethical and religious issues that surround investigations of this period and by considering how to address them It considers the various reasons why archaeological investigations may take place and what issues will be brought to bear when fieldwork is suggested It presents an interdisciplinary methodology in order to demonstrate how archaeology can uniquely contribute to the history of this period Case examples are used throughout the book in order to contextualise prevalent themes and a variety of geographically and typologically diverse sites throughout Europe are discussed This book challenges many of the widely held perceptions concerning the Holocaust including the idea that it was solely an Eastern European phenomena centred on Auschwitz and the belief that other sites connected to it were largely destroyed or are well known The typologically temporally and spatial diverse body of physical evidence pertaining to this period is presented and future possibilities for investigation of it are discussed Finally the volume concludes by discussing issues relating to the re presentation of the Holocaust and the impact of this on commemoration heritage management and education This discussion is a timely one as we enter an age without survivors and questions are raised about how to educate future generations about these events in their absence **Visual Heritage in the Digital Age** Eugene Ch'ng, Vincent Gaffney, Henry Chapman, 2013-12-04 Heritage is everywhere and an understanding of our past is increasingly critical to the understanding

of our contemporary cultural context and place in global society Visual Heritage in the Digital Age presents the state of the art in the application of digital technologies to heritage studies with the chapters collectively demonstrating the ways in which current developments are liberating the study conservation and management of the past Digital approaches to heritage have developed significantly over recent decades in terms of both the quantity and range of applications However rather than merely improving and enriching the ways in which we understand and engage with the past this technology is enabling us to do this in entirely new ways The chapters contained within this volume present a broad range of technologies for capturing data such as high definition laser scanning survey and geophysical survey modelling including GIS data fusion agent based modelling and engaging with heritage through novel digital interfaces mobile technologies and the use of multi touch interfaces in public spaces The case studies presented include sites landscapes and buildings from across Europe North and Central America and collections relating to the ancient civilisations of the Middle East and North Africa The chronological span is immense extending from the end of the last ice age through to the twentieth century These case studies reveal new ways of approaching heritage using digital tools whether from the perspective of interrogating historical textual data or through the applications of complexity theory and the modelling of agents and behaviours Beyond the data itself Visual Heritage in the Digital Age also presents fresh ways of thinking about digital heritage It explores more theoretical perspectives concerning the role of digital data and the challenges that are presented in terms of its management and preservation

The Second World War and the 'Other British Isles' Daniel Travers, 2018-06-28 What is often held to be Britain's finest hour the Second World War was not experienced so uniformly across the British Isles On the margins the war was endured in profoundly different ways While D Day or Dunkirk is embedded in British collective memory how many Britons can recall that Finns were interned on the Isle of Man that enemy soldiers developed British infrastructure in Orkney or that British subjects were sent to concentration camps from Guernsey Such experiences tangential to the dominant British war narrative are commemorated elsewhere in the other British Isles In this remarkable contribution to British Island Studies Daniel Travers pursues these histories and their commemoration across numerous local sites of memory museums heritage sites and public spaces He examines the way these island identities assert their own distinctiveness over the British wartime story and ultimately the way they fit into the ongoing discourse about how the memory of the Second World War has been constructed since 1945
