From Congo To Kosovo Civilian Police In Peace Operations:

UN Peace Operations and International Policing Charles T. Hunt, 2014-09-15 This book addresses the important question of how the United Nations UN should monitor and evaluate the impact of police in its peace operations UN peace operations are a vital component of international conflict management Since the end of the Cold War one of the foremost developments has been the rise of UN policing UNPOL Instances of UNPOL action have increased dramatically in number and have evolved from passive observation to participation in frontline law enforcement activities Attempts to ascertain the impact of UNPOL activities have proven inadequate This book seeks to redress this lacuna by investigating the ways in which the effects of peace operations and UNPOL in particular are monitored and evaluated Furthermore it aims to develop a framework tested through field research in Liberia for Monitoring and Evaluation M E that enables more effective impact assessment By enhancing the relationship between field level M E and organisational learning this research aims to make an important contribution to the pursuit of more professional and effective UN peace operations This book will be of much interest to students of peace operations conflict management policing security studies and IR in general

The New International Policing B. Peacekeeping and Stability Issues Keith D. Gerbick, Marjorie Ann Browne, Nina M. Serafino, Martin A. Weiss, 2007 As the international political climate grows increasingly volatile peacekeeping operations have become a mainstay in troubled regions The alternative to military occupation is either to train indigenous police forces or to hire security corporations Policy makers are worried that these forces are not capable of maintaining peace In addition moral and legal issues are factors for policy makers that are debating the extent to which peacekeeping forces should be allowed to infiltrate societies in turmoil Other issues of concern that this book examines are the United States relationship with the U N and the World Bank as all three pursue their different responsibilities in peacekeeping

Local Legitimacy in Peacebuilding Birte Julia Gippert, 2017-08-15 This book analyses the role of legitimacy in explaining local actors compliance with international peacebuilding operations The book provides a comparative micro level study of local actors reasons for compliance with or resistance to international peacebuilding Specifically it analyses three pathways to compliance legitimacy coercion and reward seeking to explore local police officers compliance with the reforms stipulated by the EU Police Mission in Bosnia and the EU Rule of Law Mission in Kosovo The work constructs a

holistic framework of the mechanisms connecting each pathway to compliance and measures legitimacy using micro level indicators This study not only shines light on the question why local actors comply a crucial factor in mission effectiveness but it also illuminates exactly how compliance works The book contributes nuanced evidence about the often heralded importance of legitimacy in peacebuilding showing exactly in which situations local legitimacy matters and in which it does not It is also highly relevant for policy makers as it unpacks and explains the mechanisms behind local legitimacy assisting in understanding this usually nebulous concept This book demonstrates the need for micro level analysis by revealing the relevant processes of legitimation usually hidden behind commonly perceived social fault lines such as the Serb Albanian divide in Kosovo This book will be of much interest to students of peacebuilding war and conflict studies Balkans politics security studies and International Relations

International Governance of War-Torn Territories Richard Caplan, 2005-01-27 Since the mid 1990s the United Nations and other multilateral organizations have been entrusted with exceptional authority for the administration of war torn and

strife ridden territories In Bosnia and Herzegovina Eastern Slavonia Kosovo and East Timor these organizations have assumed responsibility for governance to a degree unprecedented in recent history These initiatives represent some of the boldest experiments in the management and settlement of intra state conflict ever attempted by third parties This book is a study of recent experiences in the international administration of war torn territories It examines the nature of these operations their mandates structures and powers and distinguishes them from kindred historical and contemporary experiences of peacekeeping trusteeship and military occupation It analyses and assesses the effectiveness of international administrations and discusses in thematic fashion the key operational and political challenges that arise in the context of these experiences It also reflects on the policy implications of these experiences recommending reforms or new approaches to the challenge posed by localized anarchy in a global context It argues that despite many of the problems arising from both the design and implementation of international administrations international administration has generally made a positive contribution to the mitigation of conflict in the territories where they have been established thus removing or reducing a threat to peace and helping to improve the lives of the vast majority of the territories inhabitants This major new work from a leading scholar provides the first comprehensive treatment of recent attempts at international governance of war torn territories and will be essential reading for anyone interested in peace keeping operations and international administration

Emerging Transnational (In)security Governance Ersel Aydinli, 2010-02-25 Bringing together leading international scholars with practicing intelligence military and police officers this book provides different theoretical and empirical perspectives on international security cooperation Expanding Global Military Capacity for Humanitarian Intervention Michael E. O'Hanlon, 2004-05-13 Humanitarian military intervention and muscular peace operations have been partially effective in recent years in saving thousands of lives from the Balkans to Haiti to Somalia to Cambodia to Mozambique However success has often been mitigated by the international community's unwillingness or inability to quickly send enough forces capable of dealing with a situation decisively In other cases the international community has essentially stood aside as massive but possibly preventable humanitarian tragedies took place for instance in Angola and Rwanda in the mid 1990s and in Congo as this book goes to press Sometimes these failures have simply been the result of an insufficient pool of available military and police forces to conduct the needed intervention or stabilization missions In this timely new book Michael O Hanlon presents a blueprint for developing sufficient global intervention capacity to save many more lives with force He contends at least for now that individual countries rather than the United Nations should develop the aggregate capacity to address several crises of varying scale and severity and that many more countries should share in the effort The United States role is twofold it must make slight redesigns to its own military and even more important encourage other nations to join it in this type of intervention including training and support of troops in countries such as those in Africa that are willing to take the necessary steps to prevent humanitarian disaster but lack the resources Internal Security and Statebuilding

B. K. Greener, W. J. Fish, 2014-11-27 This book examines international efforts to provide security in post conflict sites and explains why internal security should be given precedence in statebuilding endeavours The work begins by exploring the evolution of security sectors in mature liberal democratic states before examining the attempts of such states to accelerate that evolutionary process in post conflict sites through statebuilding and security sector reform These discussions suggest interestingly different answers to the question of who should provide for internal security in international operations When considering mature states there are both practical and normative reasons as to why internal security has become the sole domain of police with military forces being excluded from internal affairs In peace and stability operations on the other hand difficulties with utilising police personnel have led to military forces being required to play internal security roles This tension is investigated further through detailed case studies of three recent missions Afghanistan Timor Leste and Solomon Islands These case studies both reinforce and augment the practical and normative reasons for ensuring that internal security remains the domain of police This then impacts upon peace and stability operations in two important ways If we are to provide enduring security in post conflict sites we should both i prioritise internal security agencies in security sector reform efforts and ii prioritise ways of enabling police to play internal security roles in the contributing mission This book will be of much interest to students of statebuilding peace and conflict studies military studies police studies historical sociology security studies and IR in general

Changing the Guard David H. Bayley, 2005-11-24 Every day the American government the United Nations and other international institutions send people into non English speaking war torn and often minimally democratic countries struggling to cope with rising crime and disorder under a new regime These assistance missions attempt to promote democratic law enforcement in devastated countries But do these missions really facilitate the creation of effective policing Renowned criminologist David H Bayley here examines the prospects for the reform of police forces overseas as a means of encouraging the development of democratic governments In doing so he assesses obstacles for promoting democratic policing in a state of the art review of all efforts to promote democratic reform since 1991 *Changing the Guard* offers an inside look at the achievements and limits of current American foreign assistance outlining the nature and scope of the police assistance program and the agencies that provide it Bayley concludes with recommendations for how police assistance could be improved in volatile countries across the world This book is required reading as an instruction manual for building democratic policing overseas

European Union Peacebuilding and Policing Michael Merlingen, Rasa Ostrauskaite, 2006-09-27 This new book provides an in depth analysis of the projects of improvement carried out by the civilian peacebuilding missions in Bosnia and Macedonia drawing on the work of Michel Foucault to make the case that the EU's self image as a model peacebuilder conceals another side of the European Security and Defence Policy The authors explore the double sided nature of peacebuilding missions on the one hand as a way to pacify democratize humanize and improve life in societies emerging from crisis or violence and on the other hand as a kind of political pastorate that limits the

range of acceptable heterogeneity by refashioning repositioning and reorganizing subjects in line with transcendentalized notions of good governance The authors develop a limited reform agenda for how EU police missions can fold an agonistic generosity more deeply into their civilizing ethos in order to ensure they have a light expatriate footprint in their host countries The prescriptive part of the book also discusses generic problems in the implementation of EU police reforms and suggests ways to overcome these challenges This book will be of great interest to students of European politics sociology political science and theory
