Hsiung,2004 Security studies in the twenty first century entail a paradigm shift from the traditional concerns of national defense military security to other dimensions namely the economic environmental and human security of nations After September 11 the traditional notion of security takes on an anti terrorist connotation giving a new salience to homeland security This study is a coherent explication of comprehensive security in the above named dimensions

War on Family Property Rights Ingyu Oh,Chris Rowley,Yong Wook Jun,2022-12-26 As of 2020 South Korea has 14 firms listed on the global Fortune 500 including Samsung Hyundai SK POSCO and LG The country along with Japan is also one of the only two countries in Asia that are members of the OECD and its Development Assistance Committee DAC simultaneously Furthermore Korea boasts of its membership in the seven country 50 30 Club countries with a population of more than 50 million and a GDP of 30 000 per capita However unlike its official status as one of the most developed economies in the world it still suffers from the backward struggle between the state and the family firms over the issue of property rights and family successions The corporate governance issue has damaged the reputation of Korean chaebols family conglomerates for many decades as founders and their families had been imprisoned and or fined for violating inheritance tax laws and related laws associated with the issue of protecting their family ties The democratically elected governments in Korea since 1987 have tried to reform the chaebol governance structures to ease asset concentration by family members although many of those have failed due to corruptive practices between the state and the chaebol This book spells out the current governance problems within the chaebol state reform policies and both success and failures of the reforms It was originally published as a special issue of the Asia Pacific Business Review

Development in Asia Derrick M. Nault,2008 Development is one of the most ubiquitous yet least understood concepts of our age It is something all governments claim to be engaged in and is considered desirable by scholars activists policymakers and laypeople alike Yet it is also a highly contested term For some development is simply a matter of economic growth Others maintain that it must entail improving life expectancy literacy education levels and access to resources Others yet disillusioned by the results of development initiatives have rejected development altogether equating it with a self serving aid industry that entraps the poor in a vicious cycle of dependency Still critics argue these post development theorists merely replicate earlier doctrines of development and have themselves become part of the problem they wish to transcend This book a collection of works by scholars of development examines the theory and practice of development and its implications and varied meanings in Asian contexts It attempts to understand development both in its objective and constructivist senses That is it examines how societies and nations have developed over time and how leaders experts and governments have attempted to shape these same societies and nations It also analyzes development in civil society and how non state actors have conceived participated in and been affected by the process Has true development been occurring in Asia Is it possible to direct development How are real people affected by development Should the concept of development be retained or discarded These are a few key questions covered in this book

Malaysia's Foreign Policy Johan Saravanamuttu, 2010 This book captures Malaysia's foreign policy over the first fifty years and beyond since the date of the country's formal independence in 1957 The author provides macro historical narratives of foreign policy practices and outcomes over distinct time periods under the tenures of the five prime ministers One chapter delves into relations with immediate neighbouring states and another chapter analyses the political economy of foreign policy A postscript deals with the transition of foreign policy beyond the fifth decade The concluding chapter suggests that Malaysian middlepowermanship has been in the making in foreign policy practice being particularly evident since the Mahathir years Employing a critical constructivist approach throughout the study the author posits that foreign policy should be appreciated as outcomes of socio political economic processes embedded within a Malaysian political culture In terms of broad policy orientations Malaysian foreign policy over five decades has navigated over the terrains of neutralism regionalism globalization and Islamism However the critical engagement of civil society in foreign policy construction remains a formidable challenge

Two Crises, Different Outcomes T. J. Pempel, Keiichi Tsunekawa, 2015-05-06 Two Crises Different Outcomes examines East Asian policy reactions to the two major crises of the last fifteen years the global financial crisis of 2008-9 and the Asian financial crisis of 1997-98 The calamity of the late 1990s saw a massive meltdown concentrated in East Asia In stark contrast East Asia avoided the worst effects of the Lehman Brothers collapse incurring relatively little damage when compared to the financial devastation unleashed on North America and Europe Much had changed across the intervening decade not least that China rather than Japan had become the locomotive of regional growth and that the East Asian economies had taken numerous steps to buffer their financial structures and regulatory regimes This time Asia avoided disaster it bounced back quickly after the initial hit and has been growing in a resilient fashion ever since The authors of this book explain how the earlier financial crisis affected Asian economies why government reactions differed so widely during that crisis and how Asian economies weathered the Great Recession Drawing on a mixture of single country expertise and comparative analysis they conclude by assessing the long term prospects that Asian countries will continue their recent success

International Governance, Regimes, and Globalization Peter Kien-hong Yu, Emily W. Chow, Shawn S.F. Kao, 2010-04-27 In this collection International Governance Regimes and Globalization the writers explore international relations and globalization by using specific examples from Beijing and Taipei In December 1949 when China was politically divided the People's Republic of China PRC central government was in control of most resources tangible and intangible For that reason our unit of analysis has to be the state meaning a government or a politically organized body With the rise of civil society at both national and international levels applying the international global governance theory should be closer to reality because we have to look at both the state and non state sponsored dimensions which are more complex and complicated Indeed international global governance could become a new school of thought and will continue to expand as academics explore For example neo liberalism primarily focuses on market and contract When people buy and sell something they are in a market In other words politics is the superstructure of economics or as Karl Marx said what prevails in economy will ultimately prevail in politics In a sense subscribers to this school of thought are Marxian However the study of international global governance embraces the non state sponsored dimension Hence it is broader than that of the neo liberalism school of thought **Studies in Conflict Economics and Economic Growth** Göran Lindgren, 2006 **Asian Profile**, 2009 **Asia-Pacific Development Journal**, 2002 *Journal of Economic Literature*, 2002 **Aanwinsten van de Centrale Bibliotheek (Queteletfonds)** Bibliothèque centrale (Fonds Quetelet), 2004
