The Myth of the Clash of Civilizations Chiara Bottici, Benoît Challand, 2013-01-11 While globalization unifies the world divisions re emerge within it in the form of a spectacular separation between Islam and the West How can it be that Huntington's contested idea of a clash of civilizations became such a powerful political myth through which so many people look at the world Bottici and Challand disentangle such a process of myth making both in the West and in Muslim majority countries and call for a renewed critical attitude towards it By analysing a process of elaboration of this myth that took place in academic books arts and media comics and Hollywood films they show that the clash of civilizations has become a cognitive scheme through which people look at the world a practical image on the basis of which they act on it as well as a drama which mobilizes passions and emotions Written in a concise and accessible way this book is a timely and valuable contribution to the academic literature and more generally to the public debate As such it will be an important reference for scholars and students of political science sociology philosophy cultural studies Middle Eastern politics and Islam

How Brands Become Icons D. B. Holt, 2004-09-15 Coca Cola Harley Davidson Nike Budweiser Valued by customers more for what they symbolize than for what they do products like these are more than brands they are cultural icons How do managers create brands that resonate so powerfully with consumers Based on extensive historical analyses of some of America's most successful iconic brands including ESPN Mountain Dew Volkswagen Budweiser and Harley Davidson this book presents the first systematic model to explain how brands become icons Douglas B Holt shows how iconic brands create identity myths that through powerful symbolism soothe collective anxieties resulting from acute social change Holt warns that icons can't be built through conventional branding strategies which focus on benefits brand personalities and emotional relationships Instead he calls for a deeper cultural perspective on traditional marketing themes like targeting positioning brand equity and brand loyalty and outlines a distinctive set of cultural branding principles that will radically alter how companies approach everything from marketing strategy to market research to hiring and training managers Until now Holt shows even the most successful iconic brands have emerged more by intuition and serendipity than by design With *How Brands Become Icons* managers can leverage the principles behind some of the most successful brands of the last half century to build their own iconic brands

Warring with Words Michael Hanne, William D. Crano, Jeffery Scott Mio, 2014-08-01 Scholars in many of the disciplines surrounding politics explicitly utilize either a narrative perspective or a metaphor perspective though rarely the two in combination to analyze issues theoretical and practical domestic and international in the broad field of politics Among the topics they have studied are competing metaphors for the state or nation which have been coined over the centuries in diverse cultures the frequency with which communal and international conflicts are generated at least in part by the clashing religious and historical narratives held by opposing groups the cognitive short cuts employing metaphor by which citizens make sense of politics the need for political candidates to project a convincing self narrative the extent to which the metaphors used to formulate social issues determine the policies which will be developed to resolve them the failure of narratives around the security of the nation to take account of the individual experiences of women and children This volume is the first in which eminent scholars from disciplines as diverse as social psychology anthropology political theory international relations feminist political science and media studies have sought to integrate the narrative and the metaphor perspectives on politics It will appeal to any scholar interested in the many ways in which narrative and metaphor function in combination as cognitive and rhetorical instruments in discourse around politics
