Labelling Ragnhild Kjelkevik,1998 **Nordic policy towards the labelling of foods** ,2002 **The Age of Clean Label Foods** Charis M. Galanakis,2022-06-06 In recent years clean label has become a trendy term in the food industry spurring innovations in food product development While the concept of clean label is relatively new without any legal definition it has a high market appearance and industrial relevance Consumer demands are leading food and beverage manufacturers toward removing synthetic additives e g emulsifiers and incorporating natural ingredients Indeed many big food companies have committed to eliminating artificial food additives from their products altogether However the substitution of chemical preservatives for natural ingredients without compromising food safety convenience and sensory quality is a challenge for food technologists The Age of Clean Label Foods offers a guide to this approach with a thorough exploration of clean label ingredients in foods and the development of these food products All aspects of clean label foods are covered in this essential reference including recent developments in clean label ingredients technologies for producing or enhancing the functionality of ingredients the interaction of ingredients with emerging food processing technologies legislative frameworks and consumer attitudes Particular emphasis is given to trendy topics in the clean label industry such as products with reduced fat or reduced salt content modified starches natural emulsifiers antioxidants flavorings and antimicrobials and fermented foods as well as active and intelligent packaging for clean label foods Through this text the authors hope to promote a better understanding from which food technologists and food microbiologists can operate in the clean label arena taking into consideration all the key aspects of food quality sensory characteristics and food safety Strengthening Food Labeling

Policies in Brazil Rosires Deliza,Camila Corvalan,Fabio Gomes,Simon Barquera,2023-10-11 Data from Brazil shows an increase in obesity and non communicable diseases which is related to the expansion of the participation of ultra processed food products in diets and in the food environment displacing fresh and minimally processed foods and meals prepared with them One of the solutions to improve food environments requires the implementation of effective and adequate food labeling regulations including front of package labeling This policy tool has the potential to inform the consumers about the nutrients ingredients or any other component of public health concern contained in the products and facilitate healthier food choices

Consumer Acceptance of Genetically Modified Foods Robert Eugene Evenson,V. Santaniello,2004 In recent years there have been increasing concerns about the potential health risks of genetically modified foods Consumer perceptions vary between countries but are probably most pronounced in Europe and least in North America These have had a profound and controversial effect on the development of markets for GM products This book presents a compilation of studies of consumer acceptance of GM foods These studies utilized different methods and evidence including price and expenditure data experimental methods willingness to pay consumer attitudes and economic consequences Nutrition labelling: Nordic recommendations based on consumer opinions Nordic Council of Ministers,Nordisk Råd,2004 Nordic recommendations on nutrition labelling Nordic work on general labelling of pre packed foods in 2002 led to a Nordic Policy towards the labelling of Foods published in the report TemaNord 2002 589 Since then a Nordic project has been working on nutrition labelling of foods The project group has concluded that as there is no perfect model for nutritional information a nutrition label is always a compromise between many demands A nutrition label is a tool for delivering information to be supported by educational and other efforts Fortification of food products was not included in this work The conclusions regarding nutrition labelling are the following recommendations I Nutrition labelling should be mandatory on all pre packed foods II Nutrition labels should be standardised No asterisks or footnotes Legible text III Nutrients Nutrition information should consist of the following mandatory list EnergyFat of which hard fatCarbohydrates of which sugarsFibreProteinSalt IV Mandatory formats should give information 1 Per 100 g and 2 Per portion item or household measure explanation in brackets 3 A simple guidance system low high or symbols should be devised and tested Recommended daily intake RDI should not be used as this concept is too complicated These four recommendations have been presented to the two Nordic Committees responsible namely those for Food Issues and Consumer Affairs Both Committees adopted the recommendations put forward and in their turn recommended that the Council of Ministers accept the recommendations as guidelines for the Nordic work regarding nutrition labelling The Nordic ministers for fisheries agriculture forestry and foods have made a decision in accordance with this recommendation **Genetic Modification in the Food Industry** Sibel Roller,Susan K. Harlander,1998-07-31

Intended for food industry professionals with little or no background in biotechnology this book provides an introduction to the basic concepts of gene modification in the food industry **Consumer Perceptions and Food** Diana
