Economic Research of Interest to Agriculture, 1997-1999 Grace Dote,2000      **Fourteen Points for the Twenty-First**

**Century** Richard H. Immerman,Jeffrey A. Engel,2020-06-23 When the United States entered World War I President Woodrow Wilson declared to Congress that the objective was not merely to bring a new balance of power but rather to bring a just and secure peace to the world by the end of the conflict In this famous speech known as The Fourteen Points Wilson offered the world a road map toward a more equitable international system in the midst of unprecedented global conflict including ideas on the interconnectedness of democracy trade and the concept of a forum for peaceably resolving international disputes Even decades after the end of the First World War Wilson s ideas remained important and influenced many of his successors But now in the twenty first century there are forces at work in the world that Wilson could never have imagined and those forces call for a new plan toward peace In **Fourteen Points for the Twenty First Century A Renewed Appeal for Cooperative Internationalism** Richard H Immerman and Jeffrey A Engel bring together a diverse group of thinkers who take up Wilson s call for a new world order by exploring fourteen new directions for the twenty first century The contributors scholars policymakers entrepreneurs poets doctors and scientists propose solutions to contemporary challenges such as migration global warming health care food security and privacy in the digital age Taken together these points challenge American

leaders and policymakers to champion an international effort not to make America great again but to work cooperatively with other nations on the basis of mutual respect      **R. D. Laing in the Twenty-First Century** M. Guy Thompson, Fritjof Capra, Douglas Kirsner, 2025-06-20 In this remarkable review of the seminal contribution of the Scottish psychiatrist and psychoanalyst R D Laing the three authors each intimately acquainted with the subject matter explore Laing's intellectual and clinical legacy Written from the perspective of a psychoanalyst a scientist and a philosopher this unique book thoroughly addresses the three principal themes that defined Laing's work his views about sanity and madness the use of therapy with those suffering from psychotic disturbance and the vicissitudes of love relationships They also explore authenticity altered states and healing The authors bring a broad range of viewpoints in assessing Laing's seminal contribution to contemporary thought from both a scholarly and personal assessment rooted in each of their diverse relationships with him both professional and personal This volume will be of interest to those in the worlds of psychoanalysis philosophy science and anyone with an interest in the work of R D Laing      Proceedings of the 2023 7th International Seminar on Education, Management and Social Sciences (ISEMSS 2023) Shakila Yacob, Berat Cicek, Joanna Rak, Ghaffar Ali, 2023-10-30 This is an open access book ISEMSS 2023 was held on July 14-16 2023 in Kunming China And provide a platform for scholars in related fields to exchange ideas and Develop and advance social development through the study and application of certain social issues Open up new perspectives and broaden the horizons of looking at issues in the discussions of the participants Create a forum for sharing research and exchange on an international level allowing participants to learn about the latest research directions results and content in different fields thus stimulating them to new research ideas Papers on Education Management and Social Sciences will be accepted and published in the form of conference proceedings for those who cannot attend the conference      *Food Security and Environmental Quality in the Developing World* Rattan Lal, David O. Hansen, Norman Uphoff, 2016-04-19 Can developing countries meet the food requirements of their growing populations without jeopardizing a natural resource base that is already under great stress Can increases in food production achieved in the past two decades be sustained in the next two decades Can developing countries achieve freedom from hunger and malnutrition      *Handbook on Water Security* Claudia Pahl-Wostl, Anik Bhaduri, Joyeeta Gupta, 2016-01-29 Water security has received increasing attention in the scientific and public policy communities in recent years The Handbook on Water Security is a much needed resource that helps the reader navigate between the differing interpretations of water security It explains the various dimensions of the topic by approaching it both conceptually and thematically as well as in relation to experiences in different regions of the world The international contributors explore the various perspectives on water security to show that it has multiple meanings that cannot easily be reconciled Topics discussed include challenges from human security to consumerism how trade policies can help to achieve water security in a transboundary setting the potential of risk based governance arrangements and the ecology of water security Scholars and postgraduate students in the social sciences

working on water related issues will find this book to be of substantial interest It will strongly appeal to policymakers and practitioners looking at the strengths and limitations of water security *Food and Sustainability in the Twenty-First Century* Paul Collinson,Iain Young,Lucy Antal,Helen Macbeth,2019-06-06 Sustainability is one of the great problems facing food production today Using cross disciplinary perspectives from international scholars working in social cultural and biological anthropology ecology and environmental biology this volume brings many new perspectives to the problems we face Its cross disciplinary framework of chapters with local regional and continental perspectives provides a global outlook on sustainability issues These case studies will appeal to those working in public sector agencies NGOs consultancies and other bodies focused on food security human nutrition and environmental sustainability **Agriculture and Human Values** ,2001 **International Economic Law in the 21st Century** Ernst-Ulrich Petersmann,2012-07-24 The state

centred Westphalian model of international law has failed to protect human rights and other international public goods effectively Most international trade financial and environmental agreements do not even refer to human rights consumer welfare democratic citizen participation and transnational rule of law for the benefit of citizens This book argues that these multilevel governance failures are largely due to inadequate regulation of the collective action problems in the supply of international public goods such as inadequate legal judicial and democratic accountability of governments vis a vis citizens Rather than treating citizens as mere objects of intergovernmental economic and environmental regulation and leaving multilevel governance of international public goods to discretionary foreign policy human rights and constitutional democracy call for civilizing and constitutionalizing international economic and environmental cooperation by stronger legal and judicial protection of citizens and their constitutional rights in international economic law Moreover intergovernmental regulation of transnational cooperation among citizens must be justified by principles of justice and multilevel constitutional restraints protecting rights of citizens and their public reason The reality of constitutional pluralism requires respecting legitimately diverse conceptions of human rights and democratic constitutionalism The obvious failures in the governance of interrelated trading financial and environmental systems must be restrained by cosmopolitan constitutional conceptions of international law protecting the transnational rule of law and participatory democracy for the benefit of citizens

**Climate-Smart and Resilient Food Systems and Security** Mohamed Behnassi,Abdulmalek A. Al-Shaikh,Riaz Hussain Qureshi,Mirza Barjees Baig,Turki Khalufa A. Faraj,2024-09-17 This contributed book as a part of a series of CERES publications contributes to the scientific debate about the interlinkages between climate change environment and food systems It highlights the opportunities to accelerate the transformation of such systems within the perspective of sustainable inclusive and climate smart practices Most chapters are based on empirical research particularly done in vulnerable and resource constrained countries from the Global South such as India Kenya Pakistan South Asia Sri Lanka and Vietnam and provide policy oriented inputs and recommendations to guide change processes at multiple scales This project has

implications for research innovation and policy design      Digital Agriculture for Food Security and Sustainable Development of the Agro-Industrial Complex Elena G. Popkova, Bruno S. Sergi, Aleksei V. Bogoviz, Elena I. Semenova, 2023-04-24 The book discusses the best international practices in digital agriculture The book aims to form systemic scientific and methodological support and develop comprehensive applied solutions to unlock the potential of sustainable development of digital agriculture for food security The book's contribution to the literature lies in its comprehensive treatment of public and corporate management of farms representing digital agriculture The research novelty is associated with the systemic disclosure of economic legal and technological issues in the development of digital agriculture Thus the book provides a solid foundation for integrating food security interests into farming practices The first part of the book reflects the economic legal and technological support of quality management and sustainable development in digital agribusiness based on the best international practices The second part focuses on Russian and international agricultural policies for food security The book is intended for members of the academic community who will find promising solutions to current problems of food security through the development of digital agriculture The book will also be of interest to farmers and representatives of the state regulation of the agricultural economy In this book they will find practical recommendations for improving government and corporate management of food security through the development of digital agriculture      ICT and Food Security in Africa Adebunsi Isaac Adeniran, Djane Kabran Aristide, 2020-02-24 This volume provides apt and timely insights into how a globalizing African society could use the array of opportunities that various applications of ICT offer to supply much needed food sustainability for the people of Africa Looking at the entire agricultural value chain the book presents a viable empirical framework for engaging with ICT in processes of food production and distribution especially for rural low scale agriculturists It also depicts how the platform of ICT could play a central role in making the larger continental goal of sustainable food security a realistic projection In addition the text considers how different regional dynamics could either enable or disable the efficient deployment of ICTs in the process of agricultural production in Africa and highlights the relative progress that has been recorded in some parts of Africa in respect to the use of various ICT platforms in processes of agricultural production and distribution The book will be particularly useful for students researchers teachers and policy makers working in the intersection between technology and food security      **Terra** Michael Novacek, 2008-11-11 A paleontologist awakens us to the extinction event that human activity is bringing about today The natural world as humans have always known it evolved close to 100 million years ago with the appearance of flowering plants and pollinating insects during the age of the dinosaurs Its tremendous history is now in danger of profound catastrophic disruption In Terra a brilliant synthesis of evolutionary biology paleontology and modern environmental science Michael Novacek shows how all three can help us understand and prevent what he and others call today's mass extinction event Humanity's use of land our consumption the pollution we create and our contributions to global warming are causing this crisis True the fossil record of hundreds of

millions of years reveals that wild and bounteous nature has always evolved not quietly but thunderously as species arise flourish die off and are replaced by new species We learn from paleontology and archaeology that for 50 000 years human hunting mining and agriculture have changed many localities sometimes irrevocably But today Novacek insists our behavior endangers the entire global ecosystem And if we disregard through ignorance antipathy or apathy the theory of evolution that developed with our modern understanding of the Earth s past we not only impede enlightenment but threaten any practical strategy for our own survival The evolutionary future of the entire living planet depends on our understanding this
