Williams, Marion Nestle, 2017-10-02 Obesity is a global public health problem of crucial importance Obesity rates remain high in high income countries and are rapidly increasing in low and middle income countries Concurrently the global consumption of unhealthy products such as soft drinks and processed foods continues to rise The ongoing expansion of multinational food and beverage companies or Big Food is a key factor behind these trends This collection provides critical insight into the global expansion of Big Food including its incursion into low and middle income countries It examines the changing dynamics of the global food supply and discusses how low income countries can alter the Big Food diet from the bottom up It examines a number of issues related to Big Food marketing strategies including the way in which they advertise to youths and the rural poor These issues are discussed in terms of their public health implications and their relation to public health activities for example soda taxes and the promotion of nutritionally healthier products This book was originally published as a special issue of Critical Public Health *Your Food Is Fooling You* David A. Kessler, 2012-12-24 Teen edition of the New York Times bestseller The End of Overeating Former commissioner of the US Food and Drug Administration David A Kessler M D argues forcefully that our brain chemistry is being hijacked by the food we eat that by consuming stimulating combinations of sugar fat and salt we re conditioning our bodies to crave more sugar fat and salt and consigning ourselves to a vicious cycle of overeating Adapted from the adult trade bestseller The End of Overeating *Your Food Is Fooling You* is concise and direct and delivers the same message many of the fascinating case studies and the same advice for breaking bad eating habits in a voice and format that s accessible positive and affirming for teenagers Young people are at most risk of forming bad eating habits but they re also highly aware of body image and highly responsive to positive messages about health and diet *Your Food Is Fooling You* is a readable authoritative and entertaining call to action by one of our nation s leading public health figures **Formative Research in Social Marketing** Krzysztof Kubacki, Sharyn Rundle-Thiele, 2016-10-07 This book brings together the state of the art and current debates in the field of formative research and examines many of the innovative methods largely overlooked in the available literature This book will help social marketing to move beyond surveys and focus groups The book addresses the needs of social marketing academics and practitioners alike by providing a robust and critical academic discussion of cutting edge research methods while demonstrating at the same time how each respective method can help us arrive at a deeper understanding of the issues that

social marketing interventions are seeking to remedy Each chapter includes a scholarly discussion of key formative research methods a list of relevant internet resources and three key readings for those interested in extending their understanding of the method Most chapters also feature a short case study demonstrating how the methods are used
