Case Studies in Food Product Development M Earle, R Earle, 2007-12-18 New product development is vital for the future of the food industry Many books have been written on NPD theory over the last 40 years but much can still be learnt by studying actual experiences of NPD Case studies in food product development describes specific NPD projects in a variety of industries internationally and also records overall comments written by the very people who have completed the projects Part one outlines new product development in the food industry and part two views product development strategy and management in different companies and organisations Parts three four and five are twelve case studies on respectively the product development process technological development consumer and market research Part six considers product development in practice and the final chapter demonstrates how product developers are being educated The case studies are written by experienced product developers talking openly about experiences with their own products It is hoped that those faced with similar challenges will gain from these real life experiences Mary and Dick are also co authors with Allan Anderson of Food product development which has achieved international success Case studies in food product development is a complement and a practical companion to this book Describes new product development in a variety of international industries Outlines new product development in the food industry and views product management and strategy in different organisations Includes case studies focusing on the product development process technological development and consumer and market research

Concept Research in Food Product Design and Development Howard R. Moskowitz, Sebastiano Porretta, Matthias Silcher, 2008-02-28 Concepts are critical for the development and marketing of products and services They constitute the blueprint for these products and services albeit at the level of consumers rather than at the technical level A good product concept can help make the product a success by guiding developers and advertising in the right direction Yet there is a dearth of both practical and scientific information about how to create and evaluate concepts There has been little

or no focus on establishing knowledge bases for concepts Concept development is too often relegated to the so called fuzzy front end Concept Research in Food Product Design and Development remedies this inattention to product concepts by providing a unique treatment of concepts for the business professional as well as for research scientists The book begins with simple principles of concepts moves forward to methods for testing concepts and then on to more substantive areas such as establishing validity testing internationally and with children creating databases and selling in new methods for concept testing The book combines a how to business book with a detailed treatment of the different facets of concept research As such the book represents a unique contribution to business applications in food and consumer research methods The book is positioned specifically for foods to maintain a focus on a coherent set of topics Concept Research in Food Product Design and Development appeals to a wide variety of audiences R D marketing sensory analysts and universities alike Corporate R D professionals will learn how to create strong concepts Marketers will recognize how concepts are at the heart of their business Sensory analysts will find the book a natural extension of their interest in product features University students will understand how concept research is a critical part of the consumer connection Concept Research in Food Product Design and Development is the definitive innovative text in describing how to create analyze and capitalize upon new product concepts
