

Play aggressive, game-control defense—regardless of player size—with the attacking line play and pass-rush power of the Combination 60 Defense! It lets you substitute speed and aggressiveness where size and strength are lacking and pack an offense-stopping wallop that many physically “big” teams would envy. A balanced eight man front and a double outside pass rush do the damage!

Football is rather an old game with its rules and laws As many other games it has its ways and tendencies of development But occasionally there appear new ideas which brake down stereotypes and form new mentality and new principles of brushing the game These new principles are geometrical approach mathematical and analytical analysis multiple repetition of actions Football of a new age won t be just running about the field It will be a well planed graphically and mathematically organized system with its own rules and laws New tactical models and geometrical play formations such as 1 4 2 4 1 4 3 3 1 3 6 1 1 3 5 2 introduced in the middle of the 20th century has changed football the structure of the game and manner of football players interaction on the pitch Due to these innovations the tactics of many

teams has changed greatly the game itself has become more spectacular admiring millions of football fans This process of developing will never stop The changes will touch both technical and tactical aspects of the game the flying path of the ball the players agility the manner of dribbling and passing the ball individual and group tactics game rhythms and so on Coaches and football club managers are interested in results shown on score boards but the thing which is of much greater importance is the efficiency of team tactics and individual skills So the question is how to make the team tactics more effective and the game more spectacular The answer is to use new training programs to create new formations to use more tricks fooling the opponent to make movements more intelligent passes faster and more precise Having applied all these innovations to the game we will get a completely different play strategy consisting of new tactical models demanding players highly skillful in jockeying tackling and assisting and having advanced mental and physical abilities All tactical models must be thoroughly timed and worked out in advance So graphically it will look like a complex geometrical scheme with mathematical calculations Future football will be a football of matrix forms MATRIX means a system regulating and regenerating by itself consisting of specially organized data and parameters Besides matrix is the basis of our three dimensional world which can be applied to any sphere of our life and football is not an exception because it unites millions of people all over the world Matrix is a structure projecting our physical world and our existence It is a man or team developing program But there must be somebody who will be in charge of it who will be able to manage and develop it This person must feel and understand all inner processes which rule the game now and all tendencies of future tactics developing including players technical skills and mental abilities Changes in football are inevitable The only thing we should do is realize the importance of changes in formations and interactions between players on the pitch Formations in football are a method of positioning players on the pitch to allow a team to play according to their pre set tactics Different formations can be used depending on whether a team wishes to play more attacking or defensive football Formations can be altered during a game but this requires adaptation by the players to fit in to the new system Formations count the number of players in each area beginning with the defensive line not including the goalkeeper It is by convention counted when the team is defending and being properly organized The most common formations are variations of 4 4 2 4 3 3 3 2 3 2 5 3 2 and 4 5 1 2 straight passing running dribbling curve passing small goal team players goalkeeper of the team players of the opponent team standard free zones non standard free zones zones of additional assistance in defence

2 Shots on small goals

Commentary This exercise helps to train home shots and agility. Players occupy the positions shown in the scheme and play shots on small goals. The number of the balls is the same as the number of the shots: player A four balls, player four balls, player three balls. The players shot balls simultaneously. The distance between the players and the small goals can be changed. Mind that the shot power depends on the distance. The main task of the players is as the goals are set in different places they must coordinate the flying path of the ball and the shot power to make their shots well placed. The players may also practice different shot types: instep shot, toe kick with the left outer instep with the right outer instep with the left outside of the foot with the right outside of the foot with the left inner instep with the right inner instep.

TACTICAL MODELS

1 Complex three system combination

Corner kick: the scheme presents three variants of corner kick actions development with players occupying the same positions. The quick counterattack requires intelligent running, exhaustive physical effort and good passing and dribbling skill. The man to man defense ideology holds that almost all opponents need to be marked at all times although they will have to keep an eye on zone considerations as well and usually a sweeper will be given a free defensive role. In practice however every defense will be a mix of zone defense and a man to man defense although often with heavy leanings towards one or the other.
