Imperial Footprints James L. Newman, 2004 Dr Livingstone I presume The man who uttered those famous words was compared with Christopher Columbus in his day and became one of the late nineteenth century's most newsworthy figures Yet one hundred years after Henry Morton Stanley's death his accomplishments in Africa have largely receded from public memory or have been discredited as epitomizing the wrongs inflicted by the scourge of European colonialism and its scramble for Africa While numerous writers have attempted to describe the man sometimes through highly speculative means our understanding of the most notable aspect of Stanley's life his relationship to the continent isn't much more advanced than it was one hundred years ago To fill this void James L Newman re-creates Stanley's seven epic African journeys explaining why he made them what transpired en route and what resulted He highlights Stanley's determination to succeed despite incredible odds and his various relationships with the people who enabled him to accomplish his objectives And while he acknowledges Stanley's less admirable traits such as his penchant for stretching the truth his capacity to be ruthless and his tendency to demean others Newman refuses to engage in facile speculation Instead he focuses on the words and deeds of a man who played a major role in shaping today's Africa James L Newman's in depth research detailed descriptions and vivid prose make Stanley and Africa both a fascinating read and a notable contribution to the study of Africa exploration and the age of empire *Spanish Tourism Geographies* Asunción Blanco-Romero, Macià Blázquez-Salom, 2023-09-30 This book provides an overview of the progress in Spanish tourism geography particularly after the overlay of financial pandemic and climate crisis by the scrutiny of the different geographical areas and variables of analysis It shows the diversity of geographical environments and their varied relationship with tourism from the emptied inland regions to urban heritage in historic centres to coastal resorts The book also introduces the analysis of the most important variables when studying the implications of Spanish tourist specialization How are the beaches with intensive tourist use managed What socio spatial processes do leisure rooted migrations involve What are the labour conditions in the Spanish tourism industry How does saving water boost tourism growth The book offers answers through a methodological

specificity of Spanish geography which is highly oriented towards the analysis of public policies and even the proposal of new planning and methodology formulas that go beyond diagnostic studies The domestic perspective or that of insiders of these scientists residing in Spain bestows them with special codes for conducting interpretations and analyses based on their everyday proximity to a territory characterised by its intense touristification The tourism and real estate specialisation that Spanish society together with its territory and institutions have forged since the beginning of developmentalism permeates this scientific analysis By providing a strong conceptual and empirical portrait this book is a great resource for students and scholars in geography of tourism as well as for social scientists and policy makers **Footprints at the Window** Phyllis

framework created by Charles Van Engen that focuses on mission of the way mission in the way and mission on the way This framework reveals that mission must be of the way Christ centered in the way happening among the peoples and cultures of the world and on the way moving forward over time through God s people as they anticipate Christ s present and coming kingdom If you are concerned about connecting the Bible theology and ministry with the complexity and variety of contexts facing Christians today then you will want to join this journey to discover the footprints of God As Van Engen says you will be encouraged to think theologically about mission and missiologically about theology *Balancing Green* Yossi
