

Footprint Vancouver

Penny Gurstein, Tom Hutton

Footprint Vancouver:

Living within a Fair Share Ecological Footprint Robert Vale, Brenda Vale, 2013-09-02 According to many authorities the impact of humanity on the earth is already overshooting the earth's capacity to supply humanity's needs. This is an unsustainable position. This book does not focus on the problem but on the solution by showing what it is like to live within a fair earth share ecological footprint. The authors describe numerical methods used to calculate this, concentrating on low or no cost behaviour change rather than on potentially expensive technological innovation. They show what people need to do now in regions where their current lifestyle means they are living beyond their ecological means, such as in Europe, North America and Australasia. The calculations focus on outcomes rather than on detailed discussion of the methods used. The main objective is to show that living with a reduced ecological footprint is both possible and not so very different from the way most people currently live in the west. The book clearly demonstrates that change in behaviour now will avoid some very challenging problems in the future. The emphasis is on workable, practical and sustainable solutions based on quantified research rather than on generalities about overall problems facing humanity.

Planning on the Edge Penny Gurstein, Tom Hutton, 2019-12-01 Vancouver is heralded around the world as a model for sustainable development. In *Planning on the Edge*, nationally and internationally renowned planning scholars, activists and Indigenous leaders assess whether the city's reputation is warranted. While recognizing the many successes of the Vancouverism model, the contributors acknowledge that the forces of globalization and speculative property development have increased social inequality and housing insecurity since the 1980s in the city and the region. To determine the city's prospects for overcoming these problems, they look at city planning from all angles, including planning for the Indigenous population, environmental and disaster planning, housing and migration, and transportation and water management. By looking at policies at the local, provincial and federal levels and taking reconciliation with Indigenous peoples into account, *Planning on the Edge* highlights the kinds of policies and practices needed to reorient Vancouver's development trajectory along a more environmentally sound and equitable path.

Toward Sustainable Communities Mark Roseland, 2012-07-17 Helps citizens and their governments apply the concept of sustainable development in their communities. Original.

Beyond Silicon Valley: Thriving Tech Hubs Around the Globe Ahmed Musa, 2025-01-02 Silicon Valley may be the most famous tech hub, but there are many other regions around the world where innovation and entrepreneurship are flourishing. This book highlights emerging tech hubs in cities like Bangalore, Berlin and Toronto, exploring what makes them unique and how they support startups. Discover the diverse ecosystems, resources and talent pools that make these cities ideal for tech entrepreneurs. Whether you're looking to start a company or relocate for career opportunities, this book offers a global perspective on where the next wave of innovation is happening.

Natures Past Paolo Squatriti, 2007 A global examination of how human communities have interacted with different kinds of natural environments through their cultural, social and economic activities.

[The Edible Ecosystem](#)

Solution Zach Loeks, 2020-12-08 Start a peaceful revolution by planting an edible ecosystem and sharing the experience with your neighbors Humans have always thrived in rich diverse edible ecosystems Yet most cities and suburbs are blanketed by lawns ornamentals and a lack of biodiversity let alone anything edible It is within these sterile landscapes that seeds of an edible ecosystem lie The Edible Ecosystem Solution is a comprehensive practical guidebook that looks at underutilized spaces to reveal the many opportunities for landscape transformation that are both far reaching and immediately beneficial and enjoyable Contents include Hundreds of full color infographics illustrations and photographs that clearly outline the principles and concepts of edible landscape design and benefits How to get started with as little as 25 square feet of land How to transition a garden plot into a place of edible abundance and an edible biodiversity hot spot living laboratory and a source point for transitioning and transforming community and culture Choosing appropriate plants for insects wildlife and food production Scaling up and networking backyard edible ecosystems at the neighborhood level and beyond to build community food security and resilience The Edible Ecosystem Solution is for everyone with access to a bit of yard a desire for food security biodiversity and a beautiful and resilient community and for anyone who wants to reclaim humanity's place in a rich abundant edible ecosystem

Urban Planning for Transitions Nicolas Douay, Michael Minja, 2021-03-26 Today as cities undergo rapid and dynamic transformations riddled with uncertainties about the future the roles of urban planning and urban planners lie in one of these new crossroad moments Climate change urban migration social inclusion health emergencies and financial and economic crises have elevated urbanization to newer heights of complexity that can only be tackled by integrating a multitude of scenarios strategies and discourses in order to create an urban future that is resilient and sustainable Urban planners have come up with transition proposals and concepts that they hope will be able to respond to cities challenges and ultimately allow them to adapt and make the transition into more robust urban areas This book presents and discusses various urban transition strategies action plans and programs that have been proposed or even conducted in different countries all over the world Different countries require different strategies but they all have the same goal in mind each of them trying to address urban complexities and cope with the rapid pace at which the world is evolving

Communities, Development, and Sustainability across Canada John T. Pierce, Ann Dale, 2011-11-01 What is a sustainable community The pressing need to answer this simple question is what prompted John Pierce and Ann Dale to gather the essays in this volume Communities Development and Sustainability across Canada is a timely synthesis of work on how Canadian communities can achieve sustainable development It bridges the gap between theory and praxis and brings together academics policy makers and community activists all of whom have argued for increased local participation in sustainable community development Communities have become the weak link in efforts to refashion relations between the environment and the economy The goal of this book is not simply to describe problems but also to suggest answers not simply to offer theory but also to promote action so that Canadian communities can better achieve sustainable development

The twelve essays are organized into four sections Vision Connections Action and Assessing Progress The first and last sections discuss local sustainable development within the context of increasing globalization The second section approaches sustainable development from the perspective of social evolution and urban systems The third section the heart of the book is comprised of three community case studies an assessment of the Pacific salmon fishery and four general discussions of sustainable development The conclusion reiterates the need to make communities stronger links in sustainable development The message of Communities Development and Sustainability across Canada is clear it is time for communities themselves to act if they are to achieve sustainable development This provocative and persuasive book will prove to be a valuable guide to taking the first steps

Sustainable Transport Rodney Tolley, 2003-09-10 With a wide range of contributions from America Australia Europe as well as the UK Creating Sustainable Transport sums up many of the lessons learned and how they can be applied in improved planning Non motorized transport planning depends on combining improvements to infrastructure with education The book examines both national strategies and local initiatives in cities around the world including such topics as changes to existing road infrastructure and the integration of cycling and walking with public transport The contributors consider topics such as developing healthier travel habits and ways of promoting cycling and walking as alternatives to the car

Understanding Urban Ecosystems Alan R. Berkowitz, Charles H. Nilon, Karen S. Hollweg, 2006-05-29 Nowhere on Earth is the challenge for ecological understanding greater and yet more urgent than in those parts of the globe where human activity is most intense cities People need to understand how cities work as ecological systems so they can take control of the vital links between human actions and environmental quality and work for an ecologically and economically sustainable future An ecosystem approach integrates biological physical and social factors and embraces historical and geographical dimensions providing our best hope for coping with the complexity of cities This book is a first of its kind effort to bring together leaders in the biological physical and social dimensions of urban ecosystem research with leading education researchers administrators and practitioners to show how an understanding of urban ecosystems is vital for urban dwellers to grasp the fundamentals of ecological and environmental science and to understand their own environment

The Urban Sociology Reader Jan Lin, Christopher Mele, 2013 This reader draws together seminal selections spanning the subfield from the 19th to the 21st centuries Contributions from Simmel Wirth Park Burgess Zukin Sassen Smith and Castells are amongst the 40 selections

Sustainable Urbanisation Adriana Allen, Nicholas You, 2002

Rationing Earth Herb Bentz, Our economy has spiralled out of control with too much focus on the quantity of production The way to reduce this wasteful overproduction of goods and services is to increase their quality In this groundbreaking book industrial designer Herb Bentz explains how to fix the economy and break the environment versus economy deadlock Bentz tells us how the use of good design can improve the quality of what we produce and how a beneficial growth in quality can substitute for the destructive increase in quantity Tying together many diverse aspects of the economy economic growth unemployment the welfare state

and the need to ration Rationing Earth provides a critical analysis and a way forward at this crucial moment Despite high wealth in rich countries there is still poverty and inadequate funding for social programs This unjustified austerity has resulted in a persistence of economic insecurity the proliferation of poor quality products and inadequate action on environmental problems Bentz provides an economic solution from a designer s perspective By using elements of design thinking to achieve an overarching synthesis of the world s challenging problems including effectiveness of government the opposing demands of capital and labour positive and negative effects of technology and the absolute boundaries of a finite earth he presents practical solutions to the conflicting needs for economic growth full employment and reduced consumption In each of these areas Rationing Earth addresses the toughest questions How will we adapt to less economic growth How do we solve unemployment What is the proper role of government And how can we create an economy that effectively rations scarce resources without reducing prosperity Bentz blends an entertaining style with a concise but broad analysis that is provocative informative and pertinent to anyone interested in economic change that has a positive impact on the environment

LifePlace Robert L. Thayer,2003 Annotation This is a passionately written advocacy of bioregionalism the conviction that people should live work play and consume locally for the health of the environment and for society The book is inspirational as well as educational a combination of philosophy and practical suggestions for implementing bioregionalism in communities

Our Ecological Footprint Mathis Wackernagel,William Rees,1998-07-01 Our Ecological Footprint presents an internationally acclaimed tool for measuring and visualizing the resources required to sustain our households communities regions and nations converting the seemingly complex concepts of carrying capacity resource use waste disposal and the like into a graphic form that everyone can grasp and use An excellent handbook for community activists planners teachers students and policy makers

Eleven Paul Hanley,2014 Eleven billion people will share this planet by century s end Adding 4 billion to an already overburdened world will force everyone to change everything Cover

Carbon Footprints as Cultural-Ecological Metaphors Anita Girvan,2017-10-10 Through an examination of carbon footprint metaphors this books demonstrates the ways in which climate change and other ecological issues are culturally and materially constituted through metaphor The carbon footprint metaphor has achieved a ubiquitous presence in Anglo North American public contexts since the turn of the millennium yet this metaphor remains under examined as a crucial mediator of political responses to the urgent crisis of climate change Existing books and articles on the carbon footprint typically treat this metaphor as a quantifying metric with little attention to the shifting mediations and practices of the carbon footprint as a metaphor This gap echoes a wider gap in understanding metaphors as key figures in mediating more than human relations at a time when such relations profoundly matter As a timely intervention this book addresses this gap by using insights from environmental humanities and political ecology to discuss carbon footprint metaphors in popular and public texts This book will be of great interest to researchers and students of environmental humanities political ecology environmental

communication and metaphor studies The Routledge Handbook of Sustainable Cities and Landscapes in the Pacific Rim Yizhao Yang, Anne Taufen, 2022-03-16 This handbook addresses a growing list of challenges faced by regions and cities in the Pacific Rim drawing connections around the what why and how questions that are fundamental to sustainable development policies and planning practices These include the connection between cities and surrounding landscapes across different boundaries and scales the persistence of environmental and development inequities and the growing impacts of global climate change including how physical conditions and social implications are being anticipated and addressed Building upon localized knowledge and contextualized experiences this edited collection brings attention to place based approaches across the Pacific Rim and makes an important contribution to the scholarly and practical understanding of sustainable urban development models that have mostly emerged out of the Western experiences Nine sections each grounded in research dialogue and collaboration with practical examples and analysis focus on a theme or dimension that carries critical impacts on a holistic vision of city landscape development such as resilient communities ecosystem services and biodiversity energy water health and planning and engagement This international edited collection will appeal to academics and students engaged in research involving landscape architecture architecture planning public policy law urban studies geography environmental science and area studies It also informs policy makers professionals and advocates of actionable knowledge and adoptable ideas by connecting those issues with the Sustainable Development Goals SDGs of the United Nations The collection of writings presented in this book speaks to multiyear collaboration of scholars through the APRU Sustainable Cities and Landscapes SCL Program and its global network facilitated by SCL Annual Conferences and involving more than 100 contributors from more than 30 institutions The Open Access version of chapters 1 2 4 11 17 23 30 37 42 49 and 56 of this book available at <http://www.taylorfrancis.com/books/e/9781003033530> have been made available under a Creative Commons Attribution Non Commercial No Derivatives 4.0 license **Ethical Markets** Hazel Henderson, Simran Sethi, 2006 With insight clarity warmth and enthusiasm Hazel Henderson announces the mature presence of the green economy Mainstream media and big business interests have sidelined its emergence and evolution to preserve the status quo Throughout Ethical Markets Henderson weaves statistics and analysis with profiles of entrepreneurs environmentalists scientists and professionals Based on interviews conducted on her longstanding public television series these profiles celebrate those who have led the highly successful growth of green businesses around the world Ethical Markets is the ultimate sourcebook on today's thriving green economy *Local Climate Change Law* Benjamin J. Richardson, 2012-01-01 This book is a useful addition to our literature on climate change law with its focus on climate change at the local level It examines how local governments municipalities and city authorities address climate change through law and policy and the problems constraints faced in mitigation and adaptation at the local level The 15 contributors have thoughtfully and critically analysed the issues from intellectual as well as practical perspectives drawing on the experiences of North America as well

as the EU China Australia and South Africa The reader is left with deeper insights and suggestions for the way forward Irene Lin Heng Lye National University of Singapore This volume offers a thorough exploration of the challenges and opportunities for local governments in many parts of the world to mitigate and adapt to climate change Laura Watchmann LEED AP ND Executive Director NALGEP As the international climate consensus is fading the focus has shifted from the global to the local This book is timely and ground breaking as it frames a new subject of legal study and proves the dramatic surge of local climate action A must read Klaus Bosselmann University of Auckland New Zealand Local Climate Change Law examines the role of local government especially within cities in addressing climate change through legal policy planning and other tools This timely study offers a multi jurisdictional perspective featuring international contributors who examine both theoretical and practical dimensions of how localities are addressing climate mitigation and adaptation in Australia Canada China Europe South Africa and the United States as well as considering the place of localities in global climate law agreements and transnational networks Written from a multi disciplinary perspective this book will appeal to academics post graduate and undergraduate students in law and political science local and national government policy makers and politicians as well as practising local government lawyers Anyone with a general interest in environmental issues will also find much to interest them in this insightful study
