God Gametes and The Planet of the Butterfly Queen Robert Jameson, 2010-02-08 The God Gametes theory is a refreshing look at what may be both the meaning of life and the reason for its creation It argues that life on earth and in fact our human consciousness are universal entities A model is presented that assumes our universe is a tiny part of a multiverse arguing that the multiverse is a hierarchical structure each level a reproductive system of intelligent living systems on the next higher level We take a fictional look at our parent species on that next higher level to find they are far more complex creatures than us but their universe is older and will soon run out of fuel to then die Parent species know that to preserve their life and the billions of years of heritage they created they must reproduce on a lower multiverse level This we believe is why humans have developed many features such as a large brain that make our survival on earth more difficult Yet these features have evolved because they are needed by the reproductive system of the parent species from lulu.com Buried Planet Marco .S Teixeira, 2023-06-22 After a sacred peak suddenly erupted a special group was sent to investigate but they weren't the only ones An opposing faction also answered the call Now as they are pushed ever deeper into the bowels of this battered world by the whims of higher powers they must also learn along the way to work together if they are to successfully
