

A Faithful Step

A Reason, Season, or Lifetime

People come into your life for a reason, a season, or a lifetime.

When you figure out which one it is, you will know what to do for each person.

When someone is in your life for a REASON, It is usually to meet a need you have expressed. They have come to assist you through a difficulty, to provide you with guidance and support, to aid you physically, emotionally, or spiritually. They may seem like a godsend, and they are!

They are there for the reason you need them to be. Then, without any wrongdoing on your part, or at an inconvenient time, this person will say or do something to bring the relationship to an end.

Sometimes they die. Sometimes they walk away. Sometimes they act up and force you to take a stand. What we must realize is that our need has been met, our desire fulfilled, their work is done. The prayer you sent up has been answered. And now it is time to move on.

Then people come into your life for a SEASON, Because your turn has come to share, grow, or learn. They bring you an experience of peace or make you laugh. They may teach you something you have never done. They usually give you an unbelievable amount of joy. Believe it! It is real! But, only for a season.

LIFETIME relationships teach you lifetime lessons – things you must build upon in order to have a solid emotional foundation. Your job is to accept the lesson, love the person, and put what you have learned to use in all other relationships and areas of your life. It is said that love is blind but friendship is clairvoyant.

Power and Freedom in the Space of Reasons Tuomo Tuomola, 2024-07-31 This book argues that the received view of the distinction between freedom and power must be rejected because it rests on an untenable account of the discursive cognition that endows individuals with the capacity for autonomy and self governed rationality In liberal and Kantian approaches alike the autonomous subject is a self standing starting point whose freedom is constrained by relations of power only contingently because they are external to the subject's constitution Thus the received view defines the distinction between freedom and power as a dichotomy Michel Foucault is arguably the most important critic of that dichotomy However it is widely agreed that Foucault falls short of justifying the alternative view he develops where power and freedom are essentially entangled instead The book fills out the gap by investigating the social preconditions of discursive cognition Drawing on pragmatist inferentialist resources from the philosophy of language Wittgenstein Sellars and Brandom it presents a new interpretation of Foucault's philosophy that is unified by his overlooked idea of the archaeology of knowledge As a result the book not only explains why and how power and freedom must be entangled but also what it means ethically to pursue and gain autonomy with respect to one's own understanding *Power and Freedom in the Space of Reasons* will appeal to scholars and advanced students working in social and political philosophy critical theory ethics philosophy of language and the history of 20th century philosophy The Open Access version of this book available at www.taylorfrancis.com has been made available under a Creative Commons Attribution Non Commercial CC BY NC 4.0 license Any third party material in this book is not included in the OA Creative Commons license unless indicated otherwise in a credit line to the material Please direct any permissions enquiries to the original rightsholder This research was funded in whole or in part by the Austrian Science Fund FWF 10.55776/COE3 For open access purposes the author has applied a CC BY NC public copyright license to any author accepted manuscript version arising from this submission Published with the support of the Austrian Science Fund FWF 10.55776/PUB1157

Brains, Buddhas, and Believing Dan Arnold, 2014-04-08 Premodern Buddhists are sometimes characterized as veritable mind scientists whose insights anticipate modern research on the brain and mind Aiming to complicate this story Dan Arnold confronts a significant obstacle to popular attempts at harmonizing classical Buddhist and modern scientific thought since most Indian Buddhists held that the mental continuum is uninterrupted by death its continuity is what Buddhists mean by rebirth they would have no truck with the idea that everything about the mental can be explained in terms of brain events Nevertheless a predominant stream of Indian Buddhist thought associated with the seventh century thinker Dharmakirti turns out to be vulnerable to arguments modern philosophers have leveled against physicalism By characterizing the philosophical problems commonly faced by Dharmakirti and contemporary philosophers such as Jerry Fodor and Daniel Dennett Arnold seeks to advance an understanding of both first millennium Indian arguments and contemporary debates on the philosophy of mind The issues center on what modern philosophers have called intentionality the fact that the mind can be about or represent or mean other things Tracing an account of intentionality through Kant Wilfrid Sellars and John McDowell Arnold argues that intentionality cannot in principle be explained in causal terms Elaborating some of Dharmakirti's central commitments chiefly his apoha theory of meaning and his account of self awareness Arnold shows that despite his concern to refute physicalism Dharmakirti's causal explanations of the mental mean that modern arguments from intentionality cut as much against his project as they do against physicalist philosophies of mind This is evident in the arguments of some of Dharmakirti's contemporaneous Indian critics proponents of the orthodox Brahmanical Mimamsa school as well as fellow Buddhists from the Madhyamaka school of thought whose critiques exemplify the same logic as modern arguments from intentionality Elaborating these various strands of thought Arnold shows that seemingly arcane arguments among first millennium Indian thinkers can illuminate matters still very much at the heart of contemporary philosophy
