Intercultural Postgraduate Supervision Catherine Manathunga, 2014-06-27 The impact of globalisation and aggressive marketing by universities has increased the flow of international or culturally diverse students enrolling in postgraduate research degree programs outside their own countries As access to postgraduate education widens more local culturally diverse and Indigenous students are also enrolling in higher degree studies As a result significantly more academics now engage in intercultural supervision or supervising students who are culturally different to themselves This book argues that empowering intercultural supervision can result from more nuanced critical and theoretically based understandings of time place and knowledge It shows how a range of Southern theories including postcolonial Indigenous feminist social and cultural geography theories about history geography and knowledge can offer fresh insights into intercultural supervision The author suggests that by using the conceptual tools offered by these Southern

theories the more complex but potentially rich aspects of intercultural supervision can be better understood and grappled with In particular these theories enable us to challenge assumptions about the universality and timelessness of Northern knowledge and to create space for the recovery and further development of Southern Eastern and Indigenous knowledges within intercultural supervision This book will be of value to academic supervisors and postgraduate students especially those engaged in intercultural supervision as well as researchers and scholars in the field of higher education **100 Ideas for Primary Teachers: Computing** Steve Bunce,2015-08-27 No matter what you teach there is a 100 Ideas title for you The 100 Ideas series offers teachers practical easy to implement strategies and activities for the classroom Each author is an expert in their field and is passionate about sharing best practice with their peers Each title includes at least ten additional extra creative Bonus Ideas that won't fail to inspire and engage all learners Are you looking for exciting ways to get your students interested in computing Do you need a break down of the basics to get your confidence up before teaching it Don't worry help is at hand in this book written by computing whizz Steve Bunce All areas of the curriculum are introduced and easy to implement and engaging activities are provided to get you and your students started Steve covers all the major elements algorithms programming data management e safety and more He answers questions like How do computers work and introduces ways for you to develop computational thinking and digital literacy in your students Really accessible ways in which may or may not use a computer make this book something that can be picked up and used in the classroom tomorrow whatever your level and whatever resources you have to hand Tablet tips throughout the book provide extra ideas for how to use tablets in the classroom This book is a must read for all primary teachers who want to implement a full engaging computing curriculum in their classroom Get debugging and coding today **Pea Soup: Recipes for Body, Mind, and Spirit from a "Kitchen Table Gourmet"** Beth Spencer,2012-01-01 Beth Spencer's Pea Soup Recipes for Body Mind and Spirit from a Kitchen Table Gourmet is a veritable feast of family favorite recipes recipes full of life and love recipes to wrap your mouth around and savor recipes for foods that for years Beth thought she couldn't eat as part of everyday meals normal foods using normal ingredients foods that were on her forbidden food list foods that she's happily invited back into her daily life While writing Pea Soup Beth learned how to be a competent eater and learned to accept her body at its natural weight after over 40 years of yo yo dieting and disordered eating From appetizers to desserts and everything in between Pea Soup fairly brims with wonderful wholesome recipes quick and easy recipes for when you're pressed for time as well as classic recipes that require a little more time and flour on the hands yet yield delicious and joyous results Bon Appetit **365 Trivia Twist Devotions** David R.
