The Routledge History of American Foodways Michael D. Wise, Jennifer Jensen Wallach, 2016-02-12 The Routledge History of American Foodways provides an important overview of the main themes surrounding the history of food in the Americas from the pre colonial era to the present day By broadly incorporating the latest food studies research the book explores the major advances that have taken place in the past few decades in this crucial field The volume is composed of four parts The first part explores the significant developments in US food history in one of five time periods to situate the topical and thematic chapters to follow The second part examines the key ingredients in the American diet throughout time allowing authors to analyze many of these foods as items that originated in or dramatically impacted the Americas as a whole

and not just the United States The third part focuses on how these ingredients have been transformed into foods identified with the American diet and on how Americans have produced and presented these foods over the last four centuries The final section explores how food practices are a means of embodying ideas about identity showing how food choices preferences and stereotypes have been used to create and maintain ideas of difference Including essays on all the key topics and issues The Routledge History of American Foodways comprises work from a leading group of scholars and presents a comprehensive survey of the current state of the field It will be essential reading for all those interested in the history of food in American culture

The Rebirth of Environmentalism Douglas Bevington, 2012-06-22 Over the past two decades a select group of small but highly effective grassroots organizations have achieved remarkable success in protecting endangered species and forests in the United States The Rebirth of Environmentalism tells for the first time the story of these grassroots biodiversity groups Filled with inspiring stories of activists groups and campaigns that most readers will not have encountered before The Rebirth of Environmentalism explores how grassroots biodiversity groups have had such a big impact despite their scant resources and presents valuable lessons that can help the environmental movement as a whole as well as other social movements become more effective

Marine Fisheries Review ,2012 **The Fulton Fish Market** Jonathan H. Rees, 2022-11-01 The Fulton Fish Market stands out as an iconic New York institution At first a neighborhood retail market for many different kinds of food it became the nation's largest fish and seafood wholesaling center by the late nineteenth century Waves of immigrants worked at the Fulton Fish Market and then introduced the rest of the city to their seafood traditions In popular culture the market celebrated by Joseph Mitchell in The New Yorker conjures up images of the bustling East River waterfront late night fishmongering organized crime and a vanished working class New York This book is a lively and comprehensive history of the Fulton Fish Market from its founding in 1822 through its move to the Bronx in 2005 Jonathan H Rees explores the market's workings and significance tracing the transportation retailing and consumption of fish He tells the stories of the people and institutions that depended on the Fulton Fish Market including fishermen retail stores restaurants and chefs and shows how the market affected what customers in New York and around the country ate Rees examines transformations in food provisioning systems through the lens of a vital distribution point arguing that the market's wholesale dealers were innovative businessmen who adapted to technological change in a dynamic industry He also explains how changes in the urban landscape and economy affected the history of the market and the surrounding neighborhood Bringing together economic technological urban culinary and environmental history this book demonstrates how the Fulton Fish Market shaped American cuisine commerce and culture

Vanishing Fish Daniel Pauly, 2019-05-28 Daniel Pauly is a friend whose work has inspired me for years Ted Danson actor ocean activist and co author of Oceana This wonderfully personal and accessible book by the world's greatest living fisheries biologist summarizes and expands on the causes of collapse and the essential actions that will be required to rebuild fish stocks for future generations Dr Jeremy Jackson ocean

scientist and author of *Breakpoint* The world's fisheries are in crisis Their catches are declining and the stocks of key species such as cod and bluefin tuna are but a small fraction of their previous abundance while others have been overfished almost to extinction The oceans are depleted and the commercial fishing industry increasingly depends on subsidies to remain afloat In these essays award winning biologist Dr Daniel Pauly offers a thought provoking look at the state of today's global fisheries and a radical way to turn it around Starting with the rapid expansion that followed World War II he traces the arc of the fishing industry's ensuing demise offering insights into how and why it has failed With clear convincing prose Dr Pauly draws on decades of research to provide an up to date assessment of ocean health and an analysis of the issues that have contributed to the current crisis including globalization massive underreporting of catch and the phenomenon of shifting baselines in which over time important knowledge is lost about the state of the natural world Finally *Vanishing Fish* provides practical recommendations for a way forward a vision of a vibrant future where small scale fisheries can supply the majority of the world's fish Published in Partnership with the David Suzuki Institute

American Catch Paul Greenberg, 2015-06-09
INVESTIGATIVE REPORTERS EDITORS Book Award Finalist 2014 A fascinating discussion of a multifaceted issue and a passionate call to action Kirkus From the acclaimed author of *Four Fish* and *The Omega Principle* Paul Greenberg uncovers the tragic unraveling of the nation's seafood supply telling the surprising story of why Americans stopped eating from their own waters in *American Catch* In 2005 the United States imported five billion pounds of seafood nearly double what we imported twenty years earlier Bizarrely during that same period our seafood exports quadrupled *American Catch* examines New York oysters Gulf shrimp and Alaskan salmon to reveal how it came to be that 91 percent of the seafood Americans eat is foreign In the 1920s the average New Yorker ate six hundred local oysters a year Today the only edible oysters lie outside city limits Following the trail of environmental desecration Greenberg comes to view the New York City oyster as a reminder of what is lost when local waters are not valued as a food source Farther south a different catastrophe threatens another seafood rich environment When Greenberg visits the Gulf of Mexico he arrives expecting to learn of the Deepwater Horizon oil spill's lingering effects on shrimpers but instead finds that the more immediate threat to business comes from overseas Asian farmed shrimp cheap abundant and a perfect vehicle for the frying and sauces Americans love have flooded the American market Finally Greenberg visits Bristol Bay Alaska home to the biggest wild sockeye salmon run left in the world A pristine productive fishery Bristol Bay is now at great risk The proposed Pebble Mine project could undermine the very spawning grounds that make this great run possible In his search to discover why this precious renewable resource isn't better protected Greenberg encounters a shocking truth the great majority of Alaskan salmon is sent out of the country much of it to Asia Sockeye salmon is one of the most nutritionally dense animal proteins on the planet yet Americans are shipping it abroad Despite the challenges hope abounds In New York Greenberg connects an oyster restoration project with a vision for how the bivalves might save the city from rising tides In the Gulf shrimpers band together to offer local catch direct

to consumers And in Bristol Bay fishermen environmentalists and local Alaskans gather to roadblock Pebble Mine With American Catch Paul Greenberg proposes a way to break the current destructive patterns of consumption and return American catch back to American eaters

Marine Mammal Research John Elliott Reynolds,2005-11-18 Marine mammal conservation presents a number of challenges for scientists This work presents an argument about how science if conducted properly can provide insights needed to minimise crisis management and implement more anticipatory action

All the Boats on the Ocean Carmel Finley,2017-02-15 This historical account of overfishing sees the future of fisheries hinging on holistic approaches involving fish fisher and environment Nature Most current fishing practices are neither economically nor biologically sustainable Every year the world spends 80 billion buying fish that cost 105 billion to catch even as heavy fishing places growing pressure on stocks that are already struggling with warmer more acidic oceans How have we developed an industry that is so wasteful Carmel Finley explores how government subsidies propelled the expansion of fishing from a coastal in shore activity into a global industry Looking across politics economics and biology All the Boats on the Ocean casts a wide net to reveal how the subsidy driven expansion of fisheries in the Pacific during the Cold War led to the growth of fisheries science and the creation of international fisheries management In a world where this technologically advanced industry has enabled nations to colonize the oceans fish literally have no place left to hide and the future of the seas and their fish stocks is uncertain Finley is an engaging writer weaving together historical economic and societal threads in a narrative that anchors global developments in the accounts of local actors Science The most comprehensive and empirically grounded account yet of how the modern transnational fishery regime emerged Oregon Historical Quarterly Finley links the fisheries story to the great transformation of global ecology in the postwar period by way of the technology policy and politics of food production a significant original book Arthur McEvoy Southwestern Law School author of The Fisherman s Problem Ecology and Law in the California Fisheries 1850 1980

The Blue Commons Guy Standing,2022-07-07 A FINANCIAL TIMES BEST ECONOMICS BOOK OF 2022 A landmark book The Blue Commons is at once a brilliant synthesis a searing analysis and an inspiring call to action David Bollier With remarkable erudition passion and lyricism Guy Standing commands the reader to wake up to the threat posed by rentier capitalism s violent policies for extraction exploitation and depletion of that which is both common to us all but also vital to our survival the sea and all within it Ann Pettifor Shines a bright light on the economy of the oceans directing us brilliantly towards where a sustainable future lies Danny Dorling This is a powerful visionary book essential reading for all who yearn for a better world Jason Hickel The sea provides more than half the oxygen we breathe food for billions of people and livelihoods for hundreds of millions But giant corporations are plundering the world s oceans aided by global finance and complicit states following the neoliberal maxim of Blue Growth The situation is dire rampant exploitation and corruption now drive all aspects of the ocean economy destroying communities intensifying inequalities and driving fish populations and other ocean life towards extinction The Blue Commons is an urgent call for change from a campaigning economist responsible for some of the most innovative solutions to inequality of recent times From large nations bullying smaller nations into giving up eco friendly fishing policies to the profiteering by the Crown Estate in commandeering much of the British seabed the scale of the global problem is synthesised here for the first time as well as a toolkit for all of us to rise up and tackle it The oceans have been left out of calls for a Green New Deal but must be at the centre of the fight against climate change How do we do it By building a Blue Commons alternative a transformative worldview and new set of proposals that prioritise the historic rights of local communities the wellbeing of all people and with it the health of our oceans

Foundations of Environmental Sustainability Larry Rockwood,Ronald Stewart,Thomas Dietz,2008-06-04 This book reviews and analyzes the period roughly from the 1950s to the present when the environment became an issue as important as economic growth or war and peace to assess the current situation and begin planning for the challenges that lie ahead Most people are aware of both the environmental destruction taking place around the world and of the specter of climate change The devastation of New Orleans by hurricane Katrina illustrates the potential for disaster when climate change is combined with the mismanaged environmental policy How did we get to this point What has been done and what can be done to avoid future environmental disasters Thirty two contributing chapter authors among them one of the principal drafters of the National Environmental Policy Act Chief of the African Environment Division and the World Bank Vice President of the Center for Conservation Innovation at the World Wildlife Fund President of the Zoological Society of London former President of the Ecological Society of America use their unique authoritative perspective to review the evolution of environmental science and policy in the past half century Each author describes the evolution of environmental science and policy in the past half century and consider the challenges of the future Although the authors of

this book come from various fields they have followed paths that have generally converged on the concept of sustainability This book attempts to define what sustainability is how we can achieve it and what the prospects for sustainability in the future are Fishing a Borderless Sea Brian J. Payne,2010-02-16 Over the centuries processing and distribution of products from land and sea has stimulated the growth of a global economy In the broad sweep of world history it may be hard to imagine a place for the meager little herring baitfish Yet as Brian Payne adeptly recounts the baitfish trade was hotly contested in the Anglo American world throughout the nineteenth century Politicians called for wars navies were dispatched with guns at the ready vessels were seized at sea and violence erupted at sea Yet the battle over baitfish was not simply a diplomatic or political affair Fishermen from hundreds of villages along the coastline of Atlantic Canada and New England played essential roles in the construction of legal authority that granted or denied access to these profitable bait fisheries Fishing a Borderless Sea illustrates how everyday laborers created a complex system of environmental stewardship that enabled them to control the local resources while also allowing them access into the larger global economy Global Political Ecology Richard Peet,Paul Robbins,Michael Watts,2010-12-17 The world is caught in the mesh of a series of environmental crises So far attempts at resolving the deep basis of these have been superficial and disorganized Global Political Ecology links the political economy of global capitalism with the political ecology of a series of environmental disasters and failed attempts at environmental policies This critical volume draws together contributions from twenty five leading intellectuals in the field It begins with an introductory chapter that introduces the readers to political ecology and summarizes the books main findings The following seven sections cover topics on the political ecology of war and the disaster state fuelling capitalism energy scarcity and abundance global governance of health bodies and genomics the contradictions of global food capital s marginal product effluents waste and garbage water as a commodity a human right and power the functions and dysfunctions of the global green economy political ecology of the global climate and carbon emissions This book contains accounts of the main currents of thought in each area that bring the topics completely up to date The individual chapters contain a theoretical introduction linking in with the main themes of political ecology as well as empirical information and case material Global Political Ecology serves as a valuable reference for students interested in political ecology environmental justice and geography *Bottomfeeder* Taras Grescoe,2011-01-15 Dividing his sensibilities between Epicureanism and ethics Taras Grescoe set out on a nine month world wide search for a delicious and humane plate of seafood Along the way he explains the cultural and commercial implications of fish production on our environment our health and our seas At once entertaining and illuminating Bottomfeeder is a thoroughly enjoyable narrative about the world s cuisines and an examination of the fishing and farming practices we take too easily for granted Rachel Carson , HighwoodN P presents a profile of American biologist and author Rachel Louise Carson 1907 1964 as part of the GirlSite resource The resource also offers access to additional information **Eco-labelling in Fisheries** Bruce Phillips,Trevor

Ward, Chet Chaffee, 2008-04-15 If the marine fishing industry is to survive into the future innovative approaches are necessary Recognising that market incentives have the potential to improve fisheries management the Marine Stewardship Council MSC has been established to harness these incentives The work of the MSC translates through from sustainable fishery management certification to labelling of fish and sea food products allowing consumers to use their choice and buying power to select eco labelled products from MSC certified fisheries This exciting new book covers all aspects of the new eco labelling initiative developed under the sponsorship of the MSC Contents include details of the MSC and its certification framework and implementation dispute resolution chain of custody assessment and community fisheries certification Also included are important case studies of the MSC certified fisheries of Australia s western rock lobster Alaska salmon Thames herring and New Zealand hoki Eco Labelling in Fisheries is an essential purchase for all those involved in marine fisheries management throughout the world Professionals and students in fisheries science marine biology ecology conservation and environmental biology will find this book to be extremely valuable Libraries in all universities and research establishments where these subjects are studied and taught should have multiple copies of this book on their shelves *California Coast & Ocean*, 2002

Coastal Governance Richard Burroughs, 2011-01-13 Coastal Governance provides a clear overview of how U S coasts are currently managed and explores new approaches that could make our shores healthier Drawing on recent national assessments Professor Richard Burroughs explains why traditional management techniques have ultimately proved inadequate leading to polluted waters declining fisheries and damaged habitat He then introduces students to governance frameworks that seek to address these shortcomings by considering natural and human systems holistically The book considers the ability of sector based management spatial management and ecosystem based management to solve critical environmental problems Evaluating governance successes and failures Burroughs covers topics including sewage disposal dredging wetlands watersheds and fisheries He shows that at times sector based management which focuses on separate individual uses of the coasts has been implemented effectively But he also illustrates examples of conflict such as the incompatibility of waste disposal and fishing in the same waters Burroughs assesses spatial and ecosystem based management s potential to address these conflicts The book familiarizes students not only with current management techniques but with the policy process By focusing on policy development Coastal Governance prepares readers with the knowledge to participate effectively in a governance system that is constantly evolving This understanding will be critical as students become managers policymakers and citizens who shape the future of the coasts
