should the blood that runs through the ancestors be of sole account From this point onward what every single person achieves in one's soul shall count Every single human being shall be of value during their incarnation Rudolf Steiner The original subtitle of Rudolf Steiner's *Philosophy of Freedom* 1894 the basis for a modern worldview points to the lifelong project with which he was engaged laying the basic groundwork for modern contemporary human beings to be able to comprehend the world in which we live beginning with ourselves as individual utterly unique embodiments of humanity It's a spiritual worldview born of the essence of the modern scientific reckoning with knowledge But its detractors critics and outright opponents speaking from the standpoint of other worldviews and denying the validity of this one from the early 1900s to today have continued to portray it in a very different light One such critic typical of others writing in 2019 deemed it dogmatic irrational anti Enlightenment racist Those with even a passing knowledge of this worldview and the fruits of its application to life may wonder how such a modern innovative universally inclusive and rational approach one that has led to such positive and beneficial results in the world could be so distorted and defamed What is the substance of these accusations and are they at all well founded With this book out of his comprehensive grasp of Steiner's work its history background and subsequent development together with the contextual background of twentieth century European totalitarianism and the contemporary landscape Peter Selg addresses these and other related questions head on *A Road*

to Sacred Creation Rudolf Steiner, 2021-08-03 Rudolf Steiner's perspectives on technology are manifold and prophetic. He not only critiqued the technology of his day but foretold new forms of technology that would inevitably arise. Technologies that would be connected to the makers' very attitudes of soul, either the good or bad within them, in other words, their deepest motivations. How we as evolving human beings approach technology and its development will be instrumental in determining how ultimately human evolution will turn out. Our future as human beings and the future of technology are intimately connected. Gary Lamb's illuminating, compelling, challenging at times staggering in its breadth *A Road to Sacred Creation* is above all the definitive text for gaining a hold on Rudolf Steiner's nuanced perspectives on technology. Charting both an inner and outer course, part pilgrimage toward greater perception and knowledge, part dramatic unfolding plot line of the future of humans and machines, the metaphoric road of the title is exactly where humanity finds itself today, though the exact route and destination are still to be determined. The map is not yet drawn, but here is a beginning. Taken together, the relevant concepts, ideas, and insights of Steiner deftly brought into sequence and dialogue as the editor has done in this book, reveal how the work to arrive at a more spiritually imbued technological future not only involves all domains and fields of spiritual science and anthroposophic work but has its origins in the very core of our being, fundamentally entwined with our moral progress toward freedom and selfless love.
