Lacan and Science Jason Glynos,Yannis Stavrakakis,2018-03-29 The current volume represents an exciting collection of essays critically examining the relation between modern science and Lacanian psychoanalysis in approaching the question of mental suffering Lacan Science also tackles more widely the role and logic of scientific practice in general taking as its focus psychic processes Central themes that are explored from a variety of perspectives include the use of mathematics in Lacanian psychoanalysis the importance of linguistics and Freud's text in Lacan's approach and the central significance attached to ethics and the role of the subject Constituting an invaluable addition to existing literature this comprehensive volume offers a fresh insight into Lacan's conception of the subject and its implications to scientific practice and evidence

Animal Minds Donald R. Griffin,2024-05-31 In *Animal Minds* Donald R. Griffin takes us on a guided tour of the recent explosion of scientific research on animal mentality Are animals consciously aware of anything or are they merely living machines incapable of conscious thoughts or emotional feelings How can we tell Such questions have long fascinated Griffin who has been a pioneer at the forefront of research in animal cognition for decades and is recognized as one of the leading behavioral ecologists of the twentieth century With this new edition of his classic book which he has completely revised and updated Griffin moves beyond considerations of animal cognition to argue that scientists can and should investigate questions of animal consciousness Using examples from studies of species ranging from chimpanzees and dolphins to birds and honeybees he demonstrates how communication among animals can serve as a window into what animals think and feel just as human speech and nonverbal communication tell us most of what we know about the thoughts and feelings of other people Even when they don't communicate about it animals respond with sometimes surprising versatility to new situations for which neither their genes nor their previous experiences have prepared them and Griffin discusses what these behaviors can tell us about animal minds He also reviews the latest research in cognitive neuroscience which has revealed startling similarities in the neural mechanisms underlying brain functioning in both humans and other animals Finally in four chapters greatly expanded for this edition Griffin considers the latest scientific research on animal consciousness pro and con and explores its profound philosophical and ethical implications

How Dogmatic Beliefs Harm Creativity and Higher-Level Thinking Don Ambrose,Robert J. Sternberg,2012-04-23 In a world plagued by enormous complex problems requiring long range vision and interdisciplinary insights the need to attend to the influence of dogmatic thinking on the development of high ability and creative intelligence is pressing This volume introduces the problem of

dogmatism broadly explores the nature and nuances of dogmatic thinking from various disciplinary perspectives and applies the gleaned insights to what is known about creativity Bringing together leading thinkers in the fields of creative studies and education and in other relevant fields history sociology psychology whose work pertains to the various dimensions of dogmatism and the ethical problems it generates this panoramic view represents interdisciplinary bridge building with the potential to generate new insights about the education of creative young minds **Empathic Intelligence** Roslyn Arnold,2005 Arnold defines in an engrossing and practical manner the hallmarks of educational leadership

Neuroscience and Multilingualism Edna Andrews,2014-09-04 How are languages represented in the human brain Ideas from neuroscience have increasingly been applied to the study of language exploring the neural processes involved in acquisition maintenance and loss of language and languages and the interaction between languages in bi and multilingual speakers With a sharp focus on multilingualism this culmination of cutting edge research sheds light on this challenging question Using data from a variety of experiments this is the first book length study to offer a new neuroscientific model for analysing multilingualism Alongside a comprehensive analysis of the theoretical and experimental contributions to the field it presents new data and analysis obtained from a multilingualism fMRI study It also includes a unique longitudinal study of second and third language acquisition combined with extensive empirically valid language proficiency data of the subjects A must read for researchers and advanced students interested in neurolinguistics second language acquisition and bi and multilingualism **States of Consciousness** Dean Cvetkovic,Irena Cosic,2011-06-22 In this accessible overview of current knowledge an expert team of editors and authors describe experimental approaches to consciousness These approaches are shedding light on some of the hitherto unknown aspects of the distinct states of human consciousness including the waking state different states of sleep and dreaming meditation and more The book presents the latest research studies by the contributing authors whose specialities span neuroscience neurology biomedical engineering clinical psychology and psychophysiology psychosocial medicine and anthropology Overall this anthology provides the reader with a clear picture of how different states of consciousness can be defined experimentally measured and analysed A future byproduct of this knowledge may be anticipated in the development of systematic corrective treatments for many disorders and pathological problems of consciousness **Cognitive Ecologies and the History of Remembering** E. Tribble,N. Keene,2011-04-05

This book unites research in philosophy and cognitive science with cultural history to re examine memory in early modern religious practices Offering an ecological approach to memory and culture it argues that models derived from Extended Mind and Distributed Cognition can bridge the gap between individual and social models of memory Being Human Roger Smith,2007-09-11 Challenging commonly held biological religious and ethical beliefs internationally well known historian of science Roger Smith boldly argues that human nature is not some thing awaiting discovery but is active in understanding itself According to Smith being human is a self creation made possible through a reflective circle of thought and action with a

past and a future and studying this history from a range of perspectives is fundamental to human self understanding Smith's argument brings together historical and contemporary debates concerning materialism and human nature and the relations of the different fields of knowledge He draws on classic writings from across the human sciences touching on sociology anthropology brain sciences history philosophical hermeneutics and critical theory and demonstrates that there is no position outside history for an absolutely objective or eternally valid view of human nature The question what is human does not have and could not possibly have one answer Instead there exists a variety of answers for different purposes and there are good reasons for the many conceptions of what it is to be human Smith does not treat human nature as only biological economic or moral but as a multidimensional subject that should be considered in its proper historical context By understanding this context Smith believes we can come to a truer understanding of ourselves Persuasively and elegantly written *Being Human* takes an important new turn in the philosophical study of being human

Cyberfeminism and Artificial Life Sarah Kember, 2003-08-29 *Cyberfeminism and Artificial Life* examines the construction manipulation and re definition of life in contemporary technoscientific culture It takes a critical political view of the concept of life as information tracing this through the new biology and the discourse of genomics as well as through the changing discipline of artificial life and its manifestation in art language literature commerce and entertainment From cloning to computer games and incorporating an analysis of hardware software and wetware Sarah Kember extends current understanding by demonstrating the ways in which this relatively marginal field connects with and connects up global networks of information systems Ultimately this book aims to refocus concern on the ethics rather than on the nature of life as it could be

Mood and Human Performance Andrew Michael Lane, 2007 Situations that are perceived to be personally important typically evoke intense mood states and emotions individuals will try to control mood states and emotions and mood and emotions influence our thoughts and behaviours Providing the sound knowledge base is a driving factor behind a great deal of the ensuing research and forms the content of many of the chapters of this book The book covers many aspects of mood in performance settings Chapters focus on the nature of mood the validity of mood measures and applied research Theoretical issues on the nature of mood and a conceptual model of mood performance relationships in sport is reviewed Chapters include research on relationships between mood and performance motivation coping strategies personality eating attitudes humour and emotional intelligence Mood responses to intense exercise extreme environments aqua massage and interventions to enhance mood are also covered Each chapter provides recommendations for future research

The Lure of the Arena Garrett G. Fagan, 2011-02-17 Were the Romans who watched brutal gladiatorial games all that different from us This book argues they were not

The Forgetting David Shenk, 2003-01-14 NATIONAL BESTSELLER A powerfully engaging scrupulously researched and deeply empathetic narrative of the history of Alzheimer's disease how it affects us and the search for a cure Afflicting nearly half of all people over the age of 85 Alzheimer's disease kills nearly 100 000 Americans a year as it

insidiously robs them of their memory and wreaks havoc on the lives of their loved ones It was once minimized and misunderstood as forgetfulness in the elderly but Alzheimer's is now at the forefront of many medical and scientific agendas for as the world's population ages the disease will touch the lives of virtually everyone David Shenk movingly captures the disease's impact on its victims and their families and he looks back through history explaining how Alzheimer's most likely afflicted such figures as Jonathan Swift Ralph Waldo Emerson and Willem de Kooning The result is a searing and graceful account of Alzheimer's disease offering a sobering compassionate and ultimately encouraging portrait
