From Cave To Cathedral:

From Cave to Cathedral Edwin Oliver James, 1905 Caves and Karst of the Greenbrier Valley in West Virginia
William B. White, 2017-11-20 The focus of this book is on the more than 2000 caves of the Greenbrier Valley of West Virginia of which the 14 with lengths greater than 10 km have an aggregate length of 639 km The major caves form the core part of sub basins which drain to big springs and ultimately to the Greenbrier River Individual chapters of this book describe each of the major caves and its associated drainage basin The caves are formed in the Mississippian Greenbrier Limestone in a setting of undulating gentle folds Fractures lineaments and confining layers within the limestone are the main controlling factors The caves underlie an extensive sinkhole plain which may relate to a major erosion surface The caves are habitat for both aquatic and terrestrial organisms which are cataloged and described as are the paleontological remains found in some of the caves The sinkhole plain of the Greenbrier karst and the underlying complex of cave systems are the end result of at least a ten million year history of landscape evolution which can be traced through the evolving sequence of cave passages and which is described in this book *Caves of Missouri* J. Harlen Bretz, 1956 *The Caves of Burnsville Cove, Virginia*
William B. White, 2015-04-20 This book highlights some of the most difficult and persistent exploration ever undertaken in the United States in Burnsville Cove a small limestone valley in west central Virginia while at the same time reviewing the scientific discoveries made in the area s 116 km of caves in the course of 50 years Overall the book offers a unique combination of exploration and science by a conservation organization specifically dedicated to the preservation and study of the caves From cave to cathedral , 1973 *Memoirs of the Geological Survey of India* , 1886 *Russian Architecture and the West* Dmitrii Olegovich Shvidkovskii, Shvidkovsky, 2007-01-01 This is the first book to show the development of Russian architecture over the past thousand years as a part of the history of Western architecture Dmitry Shvidkovsky Russia s leading architectural historian departs from the accepted notion that Russian architecture developed independent of outside cultural influences and demonstrates that to the contrary the influence of the West extends back to the tenth century and continues into the present He offers compelling assessments of all the main masterpieces of Russian architecture and frames a radically new architectural history for Russia The book systematically analyzes Russian buildings in relation to developments in European art pointing out where familiar European features are expressed in Russian projects Special attention is directed toward decorations based on Byzantine models the heritage of Italian master builders and carvers the impact of architects and others sent by Elizabeth I the formation of the Russian Imperial Baroque the Enlightenment in Russian art and 19th and 20th century European influences With over 300 specially commissioned photographs of sites throughout Russia and western Europe this magnificent book is both beautiful and groundbreaking From the Cincinnati Arch to the Illinois Basin Anton H.
