From Global Capitalism to Economic Justice Arjun Makhijani, 1992 **Liberation Theologies, Postmodernity and the Americas** David Batstone, Eduardo Mendieta, Lois Ann Lorentzen, Dwight N. Hopkins, 2013-09-13 Simultaneously arising out of such diverse contexts as the black community in the United States grassroots religious communities in Latin America and feminist circles in North Atlantic countries theologies of liberation have emerged as a resource and inspiration for people seeking social and political freedom Over the last three decades liberation theology has irrevocably altered religious thinking and practice throughout the Americas Liberation Theologies Postmodernity and the Americas provides a meaningful and spirited debate on vital interpretive issues in religion philosophy and ethics The renowned group of scholars explore liberation theologies uses of discourses of emancipation revolution and utopia in contrast with postmodernism's suspicion of grand narratives while assessing what the postmodernism liberation debate means for strategies of social and political transformation Guided by the experiences of those at the margins of social power liberation theologies demystify the eurocentric myths of secularization and modernity and calls for a re appraisal of religion in contemporary societies Contributors Edmund Arens David Batstone Maria Clara Bingemer Enrique Dussel Gustavo Gutierrez Jurgen Habermas Franz Hinkelammert Dwight Hopkins Lois Ann Lorentzen Eduardo Mendieta Amos Nascimento Elsa Tamez Mark McLain Taylor and Sharon Welch Robert Allen Warrior *Development Betrayed* Richard B Norgaard, 2006-05-18 Modernity promised control over nature through science material abundance through technology and effective government through rational social organization Instead of leading to this promised land it has brought us to the brink of environmental and cultural disaster Why has there been this gap between modernity's aspirations and its achievements *Development Betrayed* offers a powerful answer to this question Development with its unshakeable commitment to the idea of progress is rooted in modernism and has been betrayed by each of its major tenets Attempts to control nature have led to the brink of environmental catastrophe Western technologies have proved inappropriate for the needs of the South and governments are unable to respond effectively to the crises that have resulted Offering a thorough and lively critique of the ideas behind development Richard Norgaard also offers an alternative co evolutionary paradigm in which development is portrayed as a co evolution between cultural and ecological systems Rather than a future with all peoples merging to one best way of knowing and doing things he envisions a future of a patchwork quilt of cultures with real possibilities for harmony **The Job Market of the Future** James Cooke Brown, 2016-09-16 This book presents a bold new invention the Computerized Job Market CJM that could in the future come to replace the labor market as we and our forebears have known it since the industrial revolution James Cooke Brown who also invented the popular board game Careers first introduced CJM's in his science fiction book *The Troika Incident* The Job Market of the Future is written in a non academic non technical style and is set in the not too distant future in a world that we will very likely see if the present course of unhindered reckless

globalization continues The author presents the case for his CJM model how it will be constructed the built in safeguards for both individuals and society how it will operate for the end user and what the long and short term economic social and political benefits will be Ultimately this book is not about problems or policy issues it is about finding a permanent answer to the most important long term problem that faces everyone on Earth finding and keeping a quality job with a living wage

Controversies in Political Theology Thia Cooper,2007-07-30 *Controversies in Political Theology* addresses the question of whether Christians should be struggling towards development or liberation It explores the theologies of development and liberation from their beginnings in the 1960s through their changes to the central arguments today The contrasts are examined in the practice of faith based aid agencies The understanding of how to practice justice differs widely for development theology and liberation theology Whilst the theology of development remain focused on the economic realm on trade and consumption the theology of liberation expands the discussion beyond the economic realm to deal with politics race gender and culture more generally These different concepts of justice lead to very different actions in communities around the world This book provides students with access to an in depth view of these practices in a clear and concise context The book looks not only at the theologies themselves but also how they came to emerge and how they stand in contrast across the globe today

Globalization, Democratization and Multilateralism Stephen Gill,2016-07-27 Globalization involves structural changes in forms of state society and culture ecology and political economy and in ethics and expectations In this collection globalization and multilateralism are linked to questions of epistemology ontology and strategy Epistemology entails critical questioning of the nature of knowledge and its foundations Ontology concerns the significant factors in global political economy Strategy involves how to move world affairs from its present condition towards normative goals enunciated in the MUNS programme so as to promote collective ability to channel structural change in a more democratic direction

Governance, Resistance and the Post-Colonial State Jonathan Murphy,Nimruji Jammulamadaka,2017-07-14 The manifestation of the colonial nation state as a legal bureaucratic police structure an exploitation tool undermined customary modes of governance in colonies When post World War II independence of colonies transferred ownership of the state structure to the colonized elite electoral and civil society politics battled for capture of this post colonial state Meanwhile the state was also forced to build its legitimacy in the face of customary governance practices seeking rehabilitation and decolonization in the midst of civil wars and strife This state building social movement was further complicated with the global spread of neoliberalism and neocolonialism and herein lies the significant difference between the post colonial nation state and the Western nation states This book fills the gap in literature and argues that it is necessary to foreground discussions of the nature of the post colonial nation state in examining resistance and provides a window into the dynamics of the post colonial state and its implication in everyday organizing and resistance

The Hidden Structure of Violence Marc Pilisuk,Jennifer Achord Rountree,2015-07-17 Acts of violence assume many forms they may travel by the arc

of a guided missile or in the language of an economic policy and they may leave behind a smoldering village or a starved child. The all-pervasiveness of violence makes it seem like an unavoidable and ultimately incomprehensible aspect of the modern world. But in this detailed and expansive book Marc Pilisuk and Jen Rountree demonstrate otherwise. Widespread violence, they argue, is in fact an expression of the underlying social order and whether it is carried out by military forces or by patterns of investment, the aim is to strengthen that order for the benefit of the powerful. *The Hidden Structure of Violence* marshals vast amounts of evidence to examine the costs of direct violence, including military preparedness and the social reverberations of war, alongside the costs of structural violence expressed as poverty and chronic illness. It also documents the relatively small number of people and corporations responsible for facilitating the violent status quo, whether by setting the range of permissible discussion or benefiting directly as financiers and manufacturers. The result is a stunning indictment of our violent world and a powerful critique of the ways through which violence is reproduced on a daily basis, whether at the highest levels of the state or in the deepest recesses of the mind.

Living for Change Grace Lee Boggs, 2016-08-03 No one can tell in advance what form a movement will take. Grace Lee Boggs's fascinating autobiography traces the story of a woman who transcended class and racial boundaries to pursue her passionate belief in a better society. Now with a new foreword by Robin D. G. Kelley, *Living for Change* is a sweeping account of a legendary human rights activist whose network included Malcolm X and C. L. R. James. From the end of the 1930s through the Cold War, the Civil Rights era, and the rise of the Black Panthers to later efforts to rebuild crumbling urban communities, *Living for Change* is an exhilarating look at a remarkable woman who dedicated her life to social justice.

Development Without Freedom Songok Han Thornton, 2016-12-05 Thanks to the inroads of IMFism and the war on terror, America has lost much of the soft power it enjoyed in Asia during the early 1990s. The winners by default are some of the world's most undemocratic development models, such as Sino-globalism. Asian values took a hard blow from the Asian Crash but have returned in this even more virulent form. The West is left sitting on the sidelines of a distinctly Asian contest of development, with or without freedom. *Development Without Freedom* explores this crucial trial by development which will define the politics of globalization for decades to come.

On Humane Governance Richard A. Falk, 1995 This book contends that the forces of late modernism are being caught between a capital-driven globalization and a territorially rooted revival of tribalism and ultra-nationalism. Its critical focus is on global structures that are producing new patterns of North-South and rich-poor domination, as well as exerting dangerous pressures on the carrying capacities of the planet. Richard Falk argues that any hopeful response to these threatening developments requires the fundamental revision of such basic ideas as sovereignty, democracy, and security. These organizing conceptions of political life are being reshaped during this era of transition from a state-centric world of geopolitics to a more centrally guided world of geogovernance. He contends that geogovernance will have adverse consequences for the human condition unless it can be mainly constructed by transnational democratic forces animated by a vision of humane governance. This volume was written

for the Global Civilization Project of the World Order Models Project WOMP an international group of scholars formed to think creatively about legal and political structures adequate to the needs of the modern world

The Wealth of (Some) Nations Zak Cope, 2019-03-20 In this provocative new study Zak Cope makes the case that capitalism is empirically inseparable from imperialism historically and today Using a rigorous political economic framework he lays bare the vast ongoing transfer of wealth from the poorest to the richest countries through the mechanisms of monopoly rent unequal exchange and colonial tribute The result is a polarised international class structure with a relatively rich Global North and an impoverished exploited Global South Cope makes the controversial claim that it is because of these conditions that workers in rich countries benefit from higher incomes and welfare systems with public health education pensions and social security As a result the internationalism of populations in the Global North is weakened and transnational solidarity is compromised The only way forward Cope argues is through a renewed anti imperialist politics rooted in a firm commitment to a radical labour internationalism

Global Transformation Yoshikazu Sakamoto, 1994 Underlying the process of the ending of the Cold War are the forces of internationalization represented by the market and forces of democratization rooted in civil society Each of these two dynamics has developed unevenly in modern history giving rise to contradictions particularly between capitalist internationalization and political democratization The challenges to the state system the basic framework of the modern international order posed by the dialectic of these two dynamics form the main themes in this examination of global transformation This collaborative effort of 20 scholars from around the world represents the first truly comprehensive critical reflection on the contemporary global transformation

African Americans in the U.S. Economy Cecilia A. Conrad, John Whitehead, Patrick L. Mason, James Stewart, 2005-02-09 Over the last several decades academic discourse on racial inequality has focused primarily on political and social issues with significantly less attention on the complex interplay between race and economics African Americans in the U S Economy represents a contribution to recent scholarship that seeks to lessen this imbalance This book builds upon and significantly extends the principles terminology and methods of standard economics and black political economy Influenced by path breaking studies presented in several scholarly economic journals this volume is designed to provide a political economic analysis of the past and present economic status of African Americans The chapters in this volume represent the work of some of the nation's most distinguished scholars on the various topics presented The individual chapters cover several well defined areas including black employment and unemployment labor market discrimination black entrepreneurship racial economic inequality urban revitalization and black economic development The book is written in a style free of the technical jargon that characterizes most economics textbooks While the book is methodologically sophisticated it is accessible to a wide range of students and the general public and will appeal to academicians and practitioners alike
