## **From Bauhaus To Our House 1st Edition:**

From Bauhaus to Our House Tom Wolfe, 2009-11-24 After critiquing and infuriating the art world with *The Painted Word* the award winning author Tom Wolfe shares his less than favorable thoughts about modern architecture in *From Bauhaus to Our House* In this examination of the strange saga of twentieth century architecture Wolfe takes such European architects as Ludwig Mies van der Rohe Le Corbusier and Bauhaus art school founder Walter Gropius to task for their glass and steel box buildings that have influenced and infected America's cities *Book Prices: Used and Rare, 1994* Edward N. Zempel, 1994

*Huxford's Old Book Value Guide* Bob Huxford, Sharon Huxford, 1992 This totally new fourth edition is intended to be a companion volume Over 25 000 listings are included with current values More than just a price guide you'll also find scores of buyers listed by the type of subject matter they are looking for so it's a selling guide as well *American Architects and Texts* Juan Pablo Bonta, 1996 In this volume the author analyzes 400 architectural books and articles published over the past 150 years to reveal changing societal preferences in architecture and to measure the reputations of individual architects the text includes a ranked list of the 100 most famous architects *Twentieth-century American Architecture* Carter

Wiseman, 2000 Presents a survey of twentieth century American landmark buildings and their architects including Louis Sullivan Frank Lloyd Wright and Frank Gehry **Making Dystopia** James Stevens Curl, 2018-08-23 In *Making Dystopia* distinguished architectural historian James Stevens Curl tells the story of the advent of architectural Modernism in the aftermath of the First World War its protagonists and its astonishing almost global acceptance after 1945 He argues forcefully that the triumph of architectural Modernism in the second half of the twentieth century led to massive destruction the creation of alien urban landscapes and a huge waste of resources Moreover the coming of Modernism was not an inevitable seamless evolution as many have insisted but a massive unparalleled disruption that demanded a clean slate and the elimination of all ornament decoration and choice Tracing the effects of the Modernist revolution in architecture to the present Stevens Curl argues that with each passing year so called iconic architecture by supposed star architects has become more and more bizarre unsettling and expensive ignoring established contexts and proving to be stratospherically remote from the aspirations and needs of humanity In the elite world of contemporary architecture form increasingly follows finance and in a society in which the haves have more and more and the have nots are ever more marginalized he warns that contemporary architecture continues to stack up huge potential problems for the future as housing costs spiral out of control resources are squandered on architectural bling and society fractures This courageous passionate deeply researched and profoundly argued book should be read by everyone concerned with what is around us Its combative critique of the entire Modernist architectural project and its apologists will be highly controversial to many But it contains salutary warnings that we ignore at our peril And it asks awkward questions to which answers are long overdue **Rebuilding Babel** Mark Crinson, 2017-06-30 Much of modernist architecture was inspired by the emergence of internationalism the ethics and

politics of world peace justice and unity through global collaboration Mark Crinson here shows how the ideals represented by the Tower of Babel built so the story goes by people united by one language were effectively adapted by internationalist architecture its styles and practices in the modern period Focusing particularly on the points of convergence between modernist and internationalist trends in the 1920s and again in the immediate post war years he underlines how such architecture utilised the themes of a cooperative community of builders and a common language of forms The International Style was one manifestation of this new way of thinking but Crinson shows how the aims of modernist architecture frequently engaged with the substance of an internationalist mindset in addition to sharing surface similarities Bringing together the visionaries of internationalist projects including Le Corbusier Bruno Taut Berthold Lubetkin Walter Gropius and Mies van der Rohe Crinson interweaves ideas of evolution ecology utopia regionalism socialism free trade and anti colonialism to reveal the possibilities heralded by modernist architecture Furthermore he re connects pivotal figures in architecture with a cast of polymath internationalists such as Patrick Geddes Lewis Mumford Julian Huxley Rabindranath Tagore and H G Wells to provide a richly detailed socio cultural framework This is a book crafted for students and scholars of architecture and art theory as well as for those interested in the history of twentieth century optimism about the world and its architecture
