

LO2 Understand stages and sequences of development from birth to seven years [AC 2.1]

Stages of cognitive development in children from birth to seven years

Piaget identified four areas of development; the first two cover birth to seven years.

Sensorimotor	0–2 years	Infants learn through sensory experiences, for example, they are often putting objects in their mouth.
Pre-operational	2–7 years	Children learn through ‘pretend’ play.
Concrete operational	7–11 years	
Formal operational	11–16 years.

From Birth To Seven Studies In Child Development:

From Birth to Seven Ronald Davie, Neville Butler, Harvey Goldstein, 1972 [Current Catalog National Library of Medicine \(U.S.\)](#), First multi year cumulation covers six years 1965 70 **Directory of On-going Research in Smoking and Health** , [Reprint and Circular Series of the National Research Council](#) ,1927 **Smoking and Health Bulletin** ,1973 [Bibliography on Smoking and Health](#) ,1973 **Research Issues in Child Development** Chris Pratt, Alison F. Garton, William E. Tunmer, Andrew R. Nesdale, 2017-12-06 First published in 1986 this authoritative book contains a selection of original research based reports of studies conducted in Australia and New Zealand in the field of Child Development The topics have been arranged into four major sections cognitive issues in development language and reading development perpetual motor development and social aspects of development Both pure and applied research issues are presented and the chapters cover child development from infancy to adolescence The book s special strength lies in the diversity of topics tackled and the range of developmental research represented Theoretical viewpoints are raised and empirical questions answered in the studies reported The editors have systematically drawn together important contributions which reflected contemporary topics in child development at the time Although no one common theoretical or empirical theme unites either each section or the whole book which reflects the general scope and diversity of child development in the 1980s the contributors in general see the child as developing through active interaction with his or her environment This interactionist position is clearly preferred by most researchers who realised that simplistic genetic or environmental models are inadequate to explain the complex development of the child The editors were all active researchers in the area of child development at the time and each co authored a chapter in the book All published regularly in national and international journals and books and were aware of current developments in their main areas of expertise All those interested in issues in child development will find this book important reading as it provides the reader with an excellent and diverse selection of studies bearing on a wide range of empirical research [Transforming the Workforce for Children Birth Through Age 8](#) National Research Council, Institute of Medicine, Board on Children, Youth, and Families, Committee on the Science of Children Birth to Age 8: Deepening and Broadening the Foundation for Success, 2015-07-23 Children are already learning at birth and they develop and learn at a rapid pace in their early years This provides a critical foundation for lifelong progress and the adults who provide for the care and the education of young children bear a great responsibility for their health development and learning Despite the fact that they share the same objective to nurture young children and secure their future success the various practitioners who contribute to the care and the education of children from birth through age 8 are not acknowledged as a workforce unified by the common knowledge and competencies needed to do their jobs well [Transforming the Workforce for Children Birth Through Age 8](#) explores the science of child development particularly looking at implications for the professionals who work with children This report examines the current capacities and practices of the

workforce the settings in which they work the policies and infrastructure that set qualifications and provide professional learning and the government agencies and other funders who support and oversee these systems This book then makes recommendations to improve the quality of professional practice and the practice environment for care and education professionals These detailed recommendations create a blueprint for action that builds on a unifying foundation of child development and early learning shared knowledge and competencies for care and education professionals and principles for effective professional learning Young children thrive and learn best when they have secure positive relationships with adults who are knowledgeable about how to support their development and learning and are responsive to their individual progress Transforming the Workforce for Children Birth Through Age 8 offers guidance on system changes to improve the quality of professional practice specific actions to improve professional learning systems and workforce development and research to continue to build the knowledge base in ways that will directly advance and inform future actions The recommendations of this book provide an opportunity to improve the quality of the care and the education that children receive and ultimately improve outcomes for children
