From Communism to Capitalism Gordon S. Riess, 2001-02-16 One man's passion for basketball catalyzed a movement that could not be contained within the parquet court The game was basketball The issue was equality The entire community was victorious It was a time of Basketball Glory *A Tale of Three Cities* D. K. Matthews, 2024-08-20 A central question for Judeo-Christian faithful is Are we living in the age of antichristism or kingdom influence Can we salt and light entire cities and civilizations as Martin Luther King Jr hoped or with D L Moody should we simply save as many as we can from our rapidly sinking planet Over the years Christians have wrestled with the question and reached different conclusions Augustine's and Oliver O'Donovan's answer to the question birthed *The City of God* and *The Desire of Nations* Miguez Bonino's and Grace Ji Sun Kim's Marxist-influenced liberationist answers produced *Toward a Christian Political Ethics* and the post-truth Intersectional Theology Former socialist Michael Novak's plea was to revive *The True Spirit of Democratic Capitalism* Jonathan Cahn and Frank Peretti by contrast predicted that we have entered the age of This Present Darkness amidst The Return of the Gods Peretti's and Cahn's wildly popular future visions built upon Hal Lindsey's dated assurance and false prediction that true believers would be raptured in the last decade of The Terminal Generation 1980s Douglas Matthews offers a new route through the maze and discerningly answers this perennial question by boldly offering a Third City future vision option for effective kingdom influence amidst accelerating global antichristism *The Cityscapes of Taipei, Hong Kong, and Singapore during the Cold War* Tze-ki Hon, Ying-kit Chan, 2025-10-01 This volume presents a comparative analysis of three key cities Hong Kong Singapore and Taipei during the Cold War Strategically positioned within international trade networks these cities also served as critical nodes for both regional conflicts and cooperation The comparison primarily focuses on their urban landscapes drawing on the memories embedded in their collective memoryscapes the imagery presented in their filmscapes and the perceptions of their inhabitants as reflected in fiction and films that portrayed urban life and the experiences of ordinary people *The Cityscapes of Taipei Hong Kong and Singapore during the Cold War* explores both the shared characteristics of these cities as frontiers in the bipolar global system divided between Communism and the Free World and their distinctive features as unique spaces shaped by their own meanings and opportunities The Illuminated Theatre Joe Kelleher, 2015-05-08 What sort of thing is a theatre image How is it produced and consumed Who is responsible for the images Why do the images stay with us when the performance is over How do we learn to speak of what we see and imagine And how do we relate what we experience in the theatre to what we share with each other of the world *The Illuminated Theatre* is a book about theatricality and spectatorship in the early twenty-first century In a wide-ranging analysis that draws upon theatrical visual and philosophical approaches it asks how spectators and audiences negotiate the complexities and challenges of contemporary experimental performance arts It is also a book about how European practitioners working across a range of forms from theatre and performance to dance opera film and visual arts use images

to address the complexities of the times in which their work takes place Through detailed and impassioned accounts of works by artists such as Dickie Beau Wendy Houston Alvis Hermanis and Romeo Castellucci along with close readings of experimental theoretical and art writing from Gillian Rose to T J Clark and Marie Jos Mondzain the book outlines the historical aesthetic and political dimensions of a contemporary suffering of images [A History of Irish Working-Class Writing](#) Michael Pierse,2018 Michael Pierse is Lecturer in Irish literature at Queen s University Belfast His research mainly explores the writing and cultural production of Irish working class life Over recent years this work has expanded into new multidisciplinary themes and international contexts including the study of festivals digital methodologies in public humanities and theatre as research practices Michael has contributed to a range of national and international publications is the author of *Writing Ireland s Working Class* Dublin after O Casey 2011 and has been awarded several Arts and Humanities Research Council awards and the Vice Chancellor s Award at Queen s **National Geographic** ,1989 *Consultants & Consulting Organizations Directory* Cengage Gale,2009-05-12 [Solidarity Cities](#) Maliha Safri,Marianna Pavlovskaya,Stephen Healy,Craig Borowiak,2025-01-07 Mapping the transformative effects of America s urban solidarity economies Solidarity economies characterized by diverse practices of cooperation and mutual support have long played pivotal but largely invisible roles in fostering shared survival and envisioning alternatives to racial capitalism globally and in the United States This book maps the thriving existence of these cooperative networks in three differently sized American cities highlighting their commitment to cooperation democracy and inclusion and demonstrating the desire and the pressing need to establish alternative foundations for social and economic justice Collectively authored by four social scientists *Solidarity Cities* analyzes the deeply entrenched racial and economic divides from which cooperative networks emerge as they work to provide unmet basic needs including food security affordable housing access to fair credit and employment opportunities Examining entities such as community gardens credit unions cooperatives and other forms of economic solidarity the authors highlight how relatively small yet vital interventions into public life can expand into broader movements that help bolster the overall well being of their surrounding communities Bringing together insights from geography political economy and political science with mapping and spatial analysis methodologies surveys and in depth interviews *Solidarity Cities* illuminates the extensive footprints of solidarity economies and the roles they play in communities The authors show how these initiatives act as bulwarks against gentrification exploitation and economic exclusion helping readers see them as part of the past present and future of more livable and just cities Retail e book files for this title are screen reader friendly with images accompanied by short alt text and or extended descriptions **Consultants & Consulting Organizations Directory: Descriptive listings and indexes** ,2009 *Religion Index Two* ,1994 **International Index to Multi-media Information** ,1975 **A History of European Literature** Walter Cohen,2017-01-19 Walter Cohen argues that the history of European literature and each of its standard periods can be illuminated by comparative consideration of

the different literary languages within Europe and by the ties of European literature to world literature World literature is marked by recurrent systematic features outcomes of the way that language and literature are at once the products of major change and its agents Cohen tracks these features from ancient times to the present distinguishing five main overlapping stages Within that framework he shows that European literatures ongoing internal and external relationships are most visible at the level of form rather than of thematic statement or mimetic representation European literature emerges from world literature before the birth of Europe during antiquity whose Classical languages are the heirs to the complex heritage of Afro Eurasia This legacy is later transmitted by Latin to the various vernaculars The uniqueness of the process lies in the gradual displacement of the learned language by the vernacular long dominated by Romance literatures That development subsequently informs the second crucial differentiating dimension of European literature the multicontinental expansion of its languages and characteristic genres especially the novel beginning in the Renaissance This expansion ultimately results in the reintegration of European literature into world literature and thus in the creation of todays global literary system The distinctiveness of European literature is to be found in these interrelated trajectories *Video Source Book Gale*

Manifestoes and Transformations in the Early Modernist City Professor Christian Hermansen Cordua,2012-11-28 The industrialization of the nineteenth century European city facilitated developing conceptions of the model city and allowed for large scale urban transformations The urban discourse in the latter half of the nineteenth century was consequently dominated by a dialectic exchange between the ideal and the practical a debate played out in the formation of the modern metropolis Manifestoes and Transformations is the first work to deal with urban utopias and their relationship with actual

urban interventions Bringing together a carefully chosen wide ranging team of experts the book provides a broad contextual exploration of the ideas and urban practices which are the foundations of our conception of the contemporary city As such it is a valuable resource for students interested in the formation of the modernist city City Symphonies Daniel P. Schwartz,2024-04-23 Cinema scholars categorize city symphony films of the 1920s and early 1930s as a subgenre of the silent film Defined in visual terms the city symphony organizes the visible elements of urban experience according to musical principles such as rhythm and counterpoint In City Symphonies Daniel Schwartz explores the unheard sonic dimensions of these ostensibly silent films The book turns its ear to the city symphony as an audible phenomenon one that encompasses a multitude of works beyond the cinema such as musical compositions mass spectacles radio experiments and even paintings What these works have in common is their treatment of the city as a medium for sound The city is neither background nor content rather it is the material through which avant garde works express themselves In resonating through the city these multimedia pieces perform experiments that undermine the borders between sight and sound Applying an interdisciplinary approach City Symphonies expands our understanding of the genre breaking out of the confines of the cinema and onto the street Catalog of Copyright Entries.
