Mapping the Classical World Richard J.A. Talbert, 2018-09-04 Challenges of Mapping the Classical World collects together in  
one volume fourteen varied items written by Richard Talbert over the past thirty years They cohere around the theme of  
mapping the classical world since the nineteenth century All were originally prompted by Talbert's commission in the late  
1980s to produce a definitive classical atlas after more than a century of failed attempts by the Kiepert and others These he  
evaluates as well as probing the Smith Grove atlas a successful twenty year initiative launched in the mid 1850s with a  
cartographic approach that departs radically from established practice Talbert's initial vision for the international  
collaborative project that resulted in the Barrington Atlas of the Greek and Roman World 2000 is presented and the  
successive twice yearly reports on its progress from 1991 through to completion are published here for the first time A  
further item reflects retrospectively on the project's cartographic challenges and on how developments in digital map  
production were decisive in overcoming them This volume will be invaluable to anyone with an interest in the development  
and growing impact of mapping the classical world      *Cicero in Heaven* Carl P.E. Springer, 2017-10-02 In *Cicero in Heaven*  
The Roman Rhetor and Luther's Reformation Carl Springer traces the historical outlines of Cicero's rhetorical legacy paying  
special attention to the momentous impact that he had on Luther his colleagues at the University of Wittenberg and later  
Lutherans While the revival of interest in Cicero's rhetoric is more often associated with the Renaissance than with the  
Reformation it would be a mistake to overlook the important role that Luther and other reformers played in securing Cicero's  
place in the curricula of schools in modern Europe and America Luther's attitude towards Cicero was complex and the final  
chapter of the book discusses negative reactions to Cicero in the Reformation and the centuries that followed      *Wisdom's*

*Philology* James Turner,2015-09-15 A prehistory of today s humanities from ancient Greece to the early twentieth century Many today do not recognize the word but philology was for centuries nearly synonymous with humanistic intellectual life encompassing not only the study of Greek and Roman literature and the Bible but also all other studies of language and literature as well as history culture art and more In short philology was the queen of the human sciences How did it become little more than an archaic word In *Philology* the first history of Western humanistic learning as a connected whole ever published in English James Turner tells the fascinating forgotten story of how the study of languages and texts led to the modern humanities and the modern university The humanities today face a crisis of relevance if not of meaning and purpose Understanding their common origins and what they still share has never been more urgent

*The Emergence of the American University* Laurence R. Veysey,2024-07-30 The American university of today is the product of a sudden mainly unplanned period of development at the close of the nineteenth and the beginning of the twentieth centuries At that time the university and with it a recognizably modern style of academic life emerged to eclipse the older religiously oriented college Precedents formal and informal were then set which have affected the soul of professor student and academic administrator ever since What did the men living in this formative period want the American university to become How did they differ in defining the ideal university And why did the institution acquire a form that only partially corresponded with these definitions These are the questions Mr Veysey seeks to answer
