Educ Of A Doctor:

Educating Physicians Molly Cooke, David M. Irby, Bridget C. O'Brien, 2010-06-01 EDUCATING PHYSICIANS The current blueprint for medical education in North America was drawn up in 1910 by Abraham Flexner in his report Medical Education in the United States and Canada The basic features outlined by Flexner remain in place today Yet with the past century's enormous societal changes the practice of medicine and its scientific pharmacological and technological foundations have been transformed Now medical education in the United States is at a crossroads those who teach medical students and residents must choose whether to continue in the direction established over a hundred years ago or to take a fundamentally different course guided by contemporary innovation and new understandings about how people learn Emerging from an extensive study of physician education by The Carnegie Foundation for the Advancement of Teaching Educating Physicians calls for a major overhaul of the present approach to preparing doctors for their careers The text addresses major issues for the future of the field and takes a comprehensive look at the most pressing concerns in physician education today The key findings of the study recommend four goals for medical education standardization of learning outcomes and individualization of the learning process integration of formal knowledge and clinical experience development of habits of inquiry and innovation and focus on professional identity formation Like The Carnegie Foundation's revolutionizing Flexner Report of 1910 Educating Physicians is destined to change the way administrators and faculty in medical schools and programs prepare their physicians for the future ABC of Learning and Teaching in Medicine Peter Cantillon, Diana F. Wood, 2011-07-08 The ABC of Learning and Teaching in Medicine is a fully revised succinct resource for both novice and experienced medical teachers It is an excellent introductory text for doctors and other health professionals starting out in their careers as well as offering teaching tips and new perspectives for busy practitioners wishing to keep abreast of developments in medical education The ABC emphasises the teacher's role as a facilitator of learning rather than a transmitter of knowledge It is designed to be practical and accessible and will support good teachers in becoming even better at what they do Each chapter seeks to explain how different aspects of learning and assessment work the theory as well as providing descriptions of educational approaches that work the practice This fully updated new edition features core medical education topics such as course design assessment learning in groups feedback and the creation of learning materials It also includes invaluable new chapters that address many of the challenges of medical education such as dealing with students in difficulty the teaching of professionalism in clinical settings and how to support the development of teachers Together these chapters represent an authoritative guide written by a team of educational experts of international renown and is suitable for all health professional educators **Bulletin** United States. Martin,2020-03-13 Why are we practicing counselors and psychotherapists committed to failure This is the question that has haunted Dr Francis Martin as he has cataloged well over 20 000 distinct psychotherapy approaches advertised on the websites of licensed mental health professionals No doubt some of these are harmful most of them ineffective and many simply made up but the sheer volume of such techniques and practices advertised by licensed professionals holding advanced degrees whose services are billed to clients and insurance companies calls the credibility of the entire mental health profession into question Based on significant original research that joins research from others this book describes a near universal crisis in mental health care and recommends ways to rescue the field from itself The crisis is caused by declining competence among counselors and psychotherapists who have failed to

regulate themselves and who therefore deliver inadequate if not harmful services The book calls for major specific and urgently needed reforms **Phi Delta Kappan** ,1924
