Soft Law in European Community Law Linda Senden, 2004-09-30 This book offers the first systematic investigation of the phenomenon of soft law within the framework of the EC the first pillar of the EU and its use by the European Commission and Council of Ministers It focusses upon how soft law fits into the Community legal system and how it is used and in particular how it relates to Community legislation Differentiation of the Community instruments including the instruments of soft law is often thought to enhance the effectiveness legitimacy and transparency of the Community This book asks whether soft law indeed provides a satisfactory alternative to legislation from this perspective and if so in what cases and under what conditions Furthermore the author asks to what extent the use of soft law implies good governance and throws fresh light on this very heterogeneous phenomenon by looking at frequently used instruments in many different areas of Community law such as competition law state aid environment social policy etc in the process identifying their different characteristics aims functions and legal effects What emerges is that the conditions under which soft law is used may be problematic in relation to increasing the legitimacy effectiveness and transparency of Community action This is a work which will interest legal practitioners confronted with the use of soft law and the question of its possible legal effect in an increasing number of sectors and academics interested in the vexed question of how the increased use of soft law can be justified in a Community legal order built upon the rule of law It is also critical of developments taking place within the framework of the European Convention and the proposed European Constitution and goes beyond the immediate problems of soft law to touch upon issues such as competence legal protection division of powers between the EC and the Member States institutional balance lawmaking by the Community Courts the scope of Community legal principles and the influence of soft law on the progressive development of both Community and national law

European Union Law Damian Chalmers, Erika Szyszczak, 2018-10-26 First published in 1998 this volume drew upon a variety of primary and secondary sources from a number of academic disciplines European Union Law provides not merely the materials which form the law but also analysis of the pressures ideologies and agents which have shaped it It is suitable for newer types of European Union law courses which trace the development of the European Union from economic to political community as well as for the more traditional courses which focus predominantly upon the law of the Institutions and of the internal market Suitable for both undergraduates and postgraduates

Implementing European Union Education and Training Policy D. Phillips, H. Ertl, 2007-05-08 The papers which make up this volume have for the most part emerged from the work of a team of young researchers based for varying periods at the Department of Educational Studies of the University of Oxford as part of an international network funded by the European Union. The network known as PRESTiGE (Problems of Educational Standardisation and Transition in a Global Environment) involves teams at six European universities each of which can only employ young researchers from Member States other than that in which it is situated. The Oxford part of PRESTiGE has been concerned with the interpretation, transmission and implementation of European Union education and training policy in four Member States: France, Germany, Sweden and the United Kingdom. As the leader of the Oxford team, I had the good fortune to work with young researchers from Denmark, Germany, Greece, Sweden and Portugal. Their work is included here. So too are contributions from Jake Murdoch, a member of the Dijon team based at the Université de Bourgogne and Professor António Nóvoa, the leader of the Lisbon team. Together the papers which we have allowed to overlap to some extent so that each one can be read independently represent a genuinely international collaborative effort to understand the intentions and the effects of EU education and training policy and we hope that they will contribute to further discussion of the important issues that those with an interest in European co-operation and development will wish to pursue.

European Community Law of Education Bruno de Witte, 1989 **The European Union and the Culture Industries** David Ward, 2016-02-17 This edited collection brings together leading academics in their respective fields to examine the European Union's impact on media and public policy. It provides an analysis of the broader areas of EU policy and links these together to give a greater appreciation of the nuances and scope of EU regulatory initiatives and their impact on the member states. Under a broad public interest perspective, the authors provide an assessment of the success of EU policy in protecting the public interest in the culture industries and respecting certain normative principles and balancing these with market dynamics.

Citizenship, Nation-building and Identity in the EU Cherry James, 2018-12-17 With Brexit looming, a major issue facing UK Higher Education is whether the UK will be able to stay in the Erasmus Programme. This book sits at the intersection of three main interrelated themes: EU citizenship, the current state of the university in Europe and student mobility as they play out in the context of an EU-funded programme established not least to promote European identity, European consciousness and European citizenship. Exploring through interviews with students from many countries, this book weaves together the themes of citizenship, creation as a device for building a nation and a polity, the university as a public space in the era of the marketization of higher education and communicative interaction as the mechanism by which citizenship is created. Ultimately, it asks if the building bricks of national citizenship can be transposed to the transnational scale and assist in creating the transnational EU citizenship. It finds surprisingly that far from encouraging and facilitating the communicative interaction on which the development of EU citizenship was postulated, central features of the Erasmus Programme inadvertently work against this outcome. This book

will be of key interest to scholars and students of EU law and European and EU studies Citizenship Studies sociology and more broadly to higher education in general

The Protection of Minorities and Human Rights

Yoram Dinstein, Mala Tabory, 2023-11-27 From the dawn of modern international law manifold treaties especially peace treaties have recognized the rights of specific minorities in specific territories Today with Eastern Europe once more in turmoil and with minority groups all over the world clamouring for recognition there is a growing awareness that irrespective of the observance of the fundamental freedoms of individuals minority groups have their legitimate interests that must be appreciated and accommodated This collection of essays grew out of an international legal colloquium held at the Faculty of Law of Tel Aviv University in March 1990 Some of the papers have already been published in volume 20 of the Israel Yearbook on Human Rights but others are printed here for the first time The authors come from different parts of the world and represent different legal backgrounds They are by no means at one in their analysis of the human rights of minority groups but they all share the sense that problems of minorities cannot be brushed aside or glossed over It is not too hazardous to forecast that these problems will actually intensify in the 21st century Whereas they cannot be solved through exclusively legal means international and constitutional lawyers must do their utmost to identify flash points and to offer at least some prescriptive guidelines This is the principal purpose of the present volume
