McVeigh, Loreen Therese Wolfer, 2004 In this book Frank McVeigh and Loreen Wolfer take an historical approach to examine the causes and conflicts behind ten major social problems that have existed for nearly 230 years Using a critical thinking perspective of the history sociology politics and economics of the period the authors analyze social problems as a series of conflicts between those with power and those who were at one time virtually powerless Embedded in this analysis is a discussion of how the shift from a Gemeinschaft to Gesellschaft society has influenced how we address these problems Using these themes McVeigh and Wolfer provide thought provoking insight into the ways individuals groups and social institutions change over time gaining or losing power The book contains a preface by Arthur Shostak Drexel University

Politics, Education, and Social Problems Jennifer Rich, 2021-06-17 This book offers an innovative perspective on the intersection of politics education and social problems It considers how we can create social change by talking about politics and social problems in more open direct and inclusive ways in educational spaces Drawing on data from a range of settings this book closely examines how and when complicated conversations take place in classrooms schools and communities The book tackles a series of hot button timely issues including race religion politics and gender and turns a critical eye to schools and the communities in which they are situated the conversations adults have and pointedly ignore with one another and perhaps most critically the politics that shape our society *The Importance of Teaching Social Issues* Samuel Totten, 2014-08-07 John Dewey's My Pedagogical Creed outlined his beliefs in regard to teaching and learning In this volume prominent contemporary teacher educators such as Diana Hess Geneva Gay and O L Davis follow in Dewey's footsteps articulating their own pedagogical creeds as they relate to educating about social issues Through personal stories each contributor reveals the major concerns tenets and interests behind their own teaching and research including the experiences underlying their motivation to explore social issues via the school curriculum Rich with biographical detail *The Importance of Teaching Social Issues* combines diverse voices from curriculum theory social studies education science education and critical theory providing a unique volume relevant for today's teachers and education scholars

Educational Research: the Educationalization of Social Problems Paul Smeyers, 2009-04-14 Pushing social responsibilities on schools is a process that has been underway for a long time This phenomenon has been studied more in Europe than in North America and the UK and has been labelled P dagogisierung The editors have chosen to use Educationalization to identify the overall orientation or trend toward thinking about education as the focal point for addressing or solving larger human problems The term describes these phenomena as a sub process of the modernization of society but it also has negative connotations such as

increased dependence patronization and pampering In this book distinguished philosophers and historians of education focus on educationalization to expand its meaning through an engagement with educational theory Topics discussed are the family and the child the learning society citizenship education widening participation in higher education progressive education and schooling movements such as No Child Left Behind Smeyers and Depaepe's book offers great insights into one of the most ambivalent phenomena of today's educational world and especially educational policy The contributions assembled represent perspectives of some of the most respected scholars in the field Their manifold critiques of the educationalization of social problems are rather convincing Our time is definitely ripe for such analysis Roland Reichenbach Center for Educational Studies University of Basel Switzerland This is a challenging critical and analytical treatment of the tendency of contemporary administrations to overburden educational institutions with the expectation that they will provide the solutions to an increasingly diverse range of social and economic problems It brings together the theoretical resources of a distinguished international group of philosophers and historians of education and deserves the careful attention of educational policy makers practitioners and researchers alike David Bridges Von Hgel Institute St Edmund's College Cambridge England This publication is realized by the Research Community FWO Vlaanderen Research Foundation Flanders Belgium Philosophy and History of the Discipline of Education Evaluation and Evolution of the Criteria for Educational Research Also realized by the Research Community are Educational Research Why What Works Doesn't Work 2006 and Educational Research Networks and Technologies 2007

Svi Shapiro, 2004-09-22 This text reader brings together powerful readings that critically situate issues of education in the context of the major cultural moral political economic ecological and spiritual crises that confront us as a nation and a global community It provides a focus and a conceptual framework for thinking about education in light of these issues Readers are exposed to the thinking of some of the best and most insightful social and educational commentators Critical Social Issues in American Education Democracy and Meaning in a Globalizing World Third Edition is intended to work on two levels First it helps readers to develop an awareness of how education is connected to the wider social structures of cultural political and economic life Second it encourages not only a critical examination of our present social reality but also a serious discussion of alternatives of what a transformed society and educational process might look like The editors goal is to deliberately engage readers in connecting the work of teachers to an ethically committed politically charged pedagogy The assumption on
