Moschetti, Alejandro Caravaca, 2022-08-16 This text explores how the dynamics of globalization and privatization have influenced State policy and impacted education reform in Honduras It makes the argument that understanding education reform in post colonial contexts requires that scholars go beyond a surface level description of such trends as privatization to consider in addition the ways that the logics practices and relationships that characterized colonialism continue to be embedded in the apparatus of modern States The first part of the volume documents historical trends and the evolution of privatisation in Honduras while the second part explicitly engages in an extended discussion of State theory before shifting to present a framework for depicting how these logics are the foundational layer upon which states and global governance have been constructed The framework draws upon scholarship from political economy world systems and post colonialism to depict the ethos of privatization at the core of post colonial States wherein what drives the system is private benefit in the interest of individuals and their networks but not in the interest of those outside the State Applying this unique framework to the case of Honduras and offering empirical analysis of the Honduran education sector the changing role and priorities of the State and the increasing involvement of international organizations NGOs and private actors in the provision of education the text increases understanding of how State theory interacts with broader global dynamics to impact education This text will benefit researchers academics and educators with a focus on international and comparative education policy analysis globalization and international

**Peace Education in a Postmodern World** Ian M. Harris, 2013-12-16 This special issue of the Peabody Journal of Education provides a comprehensive overview of the latest developments in peace education reform. School reforms based upon principles of peace education have in common a belief in the power of peace to create a positive learning climate in schools and to address the problems of violence in the broader culture. A peace education strategy for improving school productivity rests upon three main assumptions: 1. Violence contributes to the poor performance of many students. 2. Adults in school settings need to address problems created by violence in order for schools to improve. 3. Anxieties that make it hard for students to master traditional subject matter can best be addressed by a comprehensive peace education strategy that makes school a safe place to learn and provides students with knowledge about alternative nonviolent ways to resolve conflicts. Peace building reforms go beyond responding to immediate forms of violence that may be overwhelming students and teachers to promoting positive images of peace through the study of nonviolence. Written by established experts in the field of peace education from six different countries, this collection of articles not only represents a wide variety of peace education practices from different corners of the globe but it also represents varying academic perspectives. Educators can play a key role in helping human societies progress toward more sustainable ways of living by implementing peacemaking, peacekeeping
