God In The Equation How Einstein Transformed Religion:

God in the Equation Corey Powell, 2003-08-12 Identifies the impact of Einstein's theories of relativity on the history of religion citing his self-rejected invention of Lambda to cite God's metaphysical role in the universe and considering such topics as dark energy and dark matter

My Einstein John Brockman, 2007-08-14 In this fascinating volume today's foremost scientists discuss their own versions and visions of Einstein how he has influenced their worldviews their ideas their science and their professional and personal lives These twenty-four essays are a testament to the power of scientific legacy and are essential reading for scientist and layperson alike Contributors include Roger Highfield on the Einstein myth John Archibald Wheeler on his meetings with Einstein Gino C Segrè Lee Smolin and Anton Zeilinger on Einstein's difficulties with quantum theory Leon M Lederman on the special theory of relativity Frank J Tipler on why Einstein should be seen as a scientific reactionary rather than a scientific revolutionary

Stargazing in the Atomic Age Anne Goldman, 2021-01-15 A Kirkus Best Book of the Year During World War II with apocalypse imminent a group of well-known Jewish scientists and artists sidestepped despair by challenging themselves to solve some of the most difficult questions posed by our age Many had just fled Europe Others were born in the United States to immigrants who had escaped Russia's pogroms Alternately celebrated as mavericks and dismissed as eccentrics they trespassed the boundaries of their own disciplines as the entrance to nations slammed shut behind them In *Stargazing in the Atomic Age* Anne Goldman interweaves personal and intellectual history in exuberant essays that cast new light on these figures and their virtuosic thinking In lyric-lucent sentences that dance between biography and memoir as they connect innovation in science with achievement in the arts Goldman yokes the central dramas of the modern age with the brilliant thinking of earlier eras Here Einstein plays Mozart to align mathematical principle with the music of the spheres and Rothko paints canvases whose tonalities echo the stark prose of Genesis Nearby Bellow evokes the dirt and dazzle of the Chicago streets while upon the heels of World War II Chagall illuminates stained glass no less buoyant than the effervescent notes of Gershwin's *Rhapsody in Blue* In these essays Goldman reminds readers that Jewish history offers as many illustrations of accomplishment as of affliction At the same time she gestures toward the ways in which experiments in science and art that defy partisanship can offer us inspiration during a newly divisive era

The Godless Delusion Joe Egan, 2009 In a recent work Richard Dawkins posed an immense challenge to theology by arguing on scientific grounds that the existence of God is so improbable that it can be safely dismissed as a delusion This work responds to the challenge by examining the arguments put forward by Dawkins and subjecting them to critique in the light of Christian faith The critique probes some of the assumptions underlying scientific endeavours about the nature of reality and it brings to the surface the question of how meaning truth and freedom are properly to be understood The work goes on to present a theological understanding of these realities in the light of Christian beliefs in God in Jesus Christ in creation and in redemption Far from denying the importance of scientific endeavours and discoveries this approach seeks to
