The Goddesses and Gods of Old Europe Marija Gimbutas, 2007-09 Originally published under the title God and goddesses of Old Europe 7000 3500 B C The Goddesses and Gods of Old Europe, 6500-3500 BC Marija Gimbutas, 1982 European civilization between 6500 and 3500 BC long before Greek or Judaeo Christian civilizations flourished had a distinct culture with its own unique identity. The mythical imagery of this era tells us much about early humanitys concept of the cosmos of human relations with nature of the complementary roles of male and female Through study of sculpture vases and other cult objects Gimbutas sketches the village culture that evolved there before it was overwhelmed by the patriarchal Indo Europeans The Goddess incarnating the creative principle as Source and Giver of All fertility images mythical animals and other artifacts are analysed for their mythic and social significance in this beautifully illustrated study The Goddesses and Gods of Old Europe, 6500-3500 BC Marija Alseikaite Gimbutas, 1982 Discussion of neolithic sculptures from eastern and south eastern Europe and the matrifocal probably matrilineal culture that produced The goddesses and gods of Old Europe: 6500 - 3500 B.C.; myths and cult images Marija Gimbutas, 1982 The them Goddesses and Gods of Old Europe, 6500-3500 BC Alseikaitė, 1982 The Goddesses and Gods of Old Europe. 6500-3500 B.C. Marija Gimbutas,1982 The Civilization of the Goddess **Tombs of the Gods** Kyle Weyburne, 2023-07-06 We ve completely misunderstood the purpose of the pyramids They weren t built primarily as tombs instead they were intended to be used by Pharaoh while he was still alive In very ancient times the king was only allowed to rule for 30 years then he d be ritually killed They didn t want an old man in charge One day a Pharaoh was nearing his 30th year and decided he didn t want to die so came up with a set of rituals that would enable him to live on It was called Heb Sed This sacred ceremony was more than just a life saver though it also enabled the king to merge with the Sun god After death Egyptian kings were believed to board the Sun boat where they would shine down on their subjects for all eternity However many things could go awry in this process particularly under the eyes of a successor What if they bungled the funeral What if they were a rival Heb Sed enabled all this to occur while the king was still alive so that he could preside over proceedings ensuring its success And the bonus of being able to do this while alive is that some part of the Pharaoh would board the Sun boat and in doing so the king would become a divinity the Pharaoh became a living God king But all this could only happen if they built a strange pyramid shaped structure to enable this potent magic to take place So they built pyramids And they got bigger and more magnificent with the passing of each King This madness came to a head with Pharaoh Snefru who built two massive pyramids the two biggest man made structures in the World How do you outdo this While his son Khufu only managed to build one pyramid it was the most impressive structure ever built by humans Still is in my book And yes it might have functioned as his tomb although Strabo and Diodorus swear black and blue that it wasn t however it was entirely geared to the Sun god as you will find out it was entirely geared for the King's Heb Sed This book is the seguel to Architecture of Ra

but can be read independently of it It also delves into the myths of Egypt as well as those of other cultures Jason the Argonauts Icarus Jonah Thor Hercules I don't like calling these stories myths because they actually belonged to living religions and to make that grade the stories had to include information seminal to that culture And if the texts contain this knowledge then so did their religious buildings The knowledge encoded in Egyptian legends is also encoded in their pyramids

Abdale, 2019-06-30 The little known story of a fierce rebellion against the Romans A very good read for anyone interested in ancient military history and historiography The NYMAS Review In the year AD 9 three Roman legions were crushed by the German warlord Arminius in the Battle of the Teutoburg Forest This event is well known but there was another uprising that Rome faced shortly before which lasted from AD 6 to 9 and was just as intense This rebellion occurred in the western Balkans an area roughly corresponding to modern Croatia Bosnia and Herzegovina Slovenia Montenegro and parts of Serbia and Albania and it tested the Roman Empire to its limits For three years fifteen legions fought in the narrow valleys and forest covered crags of the Dinaric Mountains in a ruthless war of attrition against an equally ruthless and determined foe and yet this conflict is largely unknown today The Great Illyrian Revolt is believed to be the first book ever devoted to this forgotten war of the Roman Empire Within its pages we examine the history and culture of the mysterious Illyrian people the story of how Rome became involved in this volatile region and what the Roman army had to face during those harrowing three years The Horse, the Wheel, and Language David W. Anthony, 2007 A fascinating look into the origins of modern in the Balkans man Publishers Weekly A book that solves the mystery of the people who spread the ancient mother tongue that gave us English and the other languages spoken by half of humanity today Authoritative New York Times A masterpiece Wilson Quarterly Roughly half the world's population speaks languages derived from a shared linguistic source known as Proto Indo European But who were the early speakers of this ancient mother tongue and how did they manage to spread it around the globe Until now their identity has remained a tantalizing mystery to linguists archaeologists and even Nazis seeking the roots of the Aryan race The Horse the Wheel and Language lifts the veil that has long shrouded these original Indo European speakers and reveals how their domestication of horses and use of the wheel spread language and transformed civilization

Linking prehistoric archaeological remains with the development of language David Anthony identifies the prehistoric peoples of central Eurasia's steppe grasslands as the original speakers of Proto Indo European and shows how their innovative use of the ox wagon horseback riding and the warrior's chariot turned the Eurasian steppes into a thriving transcontinental corridor of communication commerce and cultural exchange He explains how they spread their traditions and gave rise to important advances in copper mining warfare and patron client political institutions thereby ushering in an era of vibrant social change Anthony also describes his fascinating discovery of how the wear from bits on ancient horse teeth reveals the origins of horseback riding The Horse the Wheel and Language solves a puzzle that has vexed scholars for two centuries the source of the Indo European languages and English and recovers a magnificent and influential civilization from the past **Death, War, and Sacrifice** Bruce Lincoln, 1991-08-27 One of the world's leading specialists in Indo European religion and society Bruce Lincoln expresses in these essays his severe doubts about the existence of a much hypothesized prototypical Indo European religion Written over fifteen years the essays six of them previously unpublished fall into three parts Part I deals with matters Indo European in a relatively unproblematized way exploring a set of haunting images that recur in descriptions of the Otherworld from many cultures While Lincoln later rejects this methodology these chapters remain the best available source of data for the topics they address In Part II Lincoln takes the data for each essay from a single culture area and shifts from the topic of dying to that of killing Of particular interest are the chapters connecting sacrifice to physiology a master discourse of antiquity that brought the cosmos the human body and human society into an ideologically charged correlation Part III presents Lincoln's most controversial case against a hypothetical Indo European protoculture Reconsidering the work of the prominent Indo Europeanist Georges Dum zil Lincoln argues that Dum zil s writings were informed and inflected by covert political concerns characteristic of French fascism This collection is an invaluable resource for students of myth ritual ancient societies anthropology and the history of religions Bruce Lincoln is professor of humanities and religious studies at the University of Minnesota Women and Spirituality Ursula King, 1993-07-21 Taking a critical look at feminism and exploring its explicit and implicit spiritual dimensions this revised and updated new edition of Women and Spirituality engages in a reflective dialogue with contemporary women s voices It asks to what extent patriarchal oppression and androcentric thinking are inherent not only in Christianity but in all religious beliefs practices and institutions This is the only book which provides a comprehensive survey of current discussions in feminist theology and spirituality and offers a wide ranging account of women and world religions and raising thought provoking questions about the spiritual dimensions of human life The Cult of Divine Birth in Ancient Greece M. Rigoglioso, 2009-04-26 Greek religion is filled with strange sexual artifacts stories of mortal women s couplings with gods rituals like the basilinna's marriage to Dionysus beliefs in the impregnating power of snakes and deities the unusual birth stories of Pythagoras Plato and Alexander and more In this provocative study Marguerite Rigoglioso suggests such details

are remnants of an early Greek cult of divine birth not unlike that of Egypt Scouring myth legend and history from a female oriented perspective she argues that many in the highest echelons of Greek civilization believed non ordinary conception was the only means possible of bringing forth individuals who could serve as leaders and that special cadres of virgin priestesses were dedicated to this practice Her book adds a unique perspective to our understanding of antiquity and has significant implications for the study of Christianity and other religions in which divine birth claims are central The book s stunning insights provide fascinating reading for those interested in female inclusive approaches to ancient religion **Goddess** Vicki Noble, 2003-06-19 A study of the double goddess iconography prominent in Neolithic and Bronze Age cultures that expands our understanding of female sovereignty Celebrates this archetype of sacred female bonding and depicts a vast array of relationships women may form with themselves and each other to explore a sense of self and empowerment and to share power with each other The Lost Civilizations of the Stone Age Richard Rudgley, 2000-01-25 Examines the history of mankind during the Neolithic Age and presents evidence that the Stone Age human was more advanced than science originally thought Includes figures and photographs The Rise of Metallurgy in Eurasia Miljana Radivojević, Benjamin Roberts, Miroslav Marić, Julka Kuzmanović-Cvetković, Thilo Rehren, 2021-12-23 The Rise of Metallurgy in Eurasia is a landmark study in the evolution of early metallurgy in the Balkans It demonstrates that far from being a rare and elite practice the earliest metallurgy in the world was a common and communal craft activity
