Hodgson, Katherine J. Lewis, Matthew M. Mesley, 2019-03-05 This volume presents the first substantial exploration of crusading and masculinity focusing on the varied ways in which the symbiotic relationship between the two was made manifest in a range of medieval settings and sources and to what ends Ideas about masculinity formed an inherent part of the mindset of societies in which crusading happened and of the conceptual framework informing both those who recorded the events and those who participated Examination and interrogation of these ideas enables a better contextualised analysis of how those events were experienced comprehended and portrayed The collection is structured around five themes sources and models contrasting masculinities emasculation and transgression masculinity and religiosity and kingship and chivalry By incorporating masculinity within their analysis of the crusades and of crusaders the contributors demonstrate how such approaches greatly enhance our understanding of crusading as an ideal an institution and an experience Individual essays consider western campaigns to the Middle East and Islamic responses events and sources from the Iberian peninsula and Prussia are also interrogated and re examined thus enabling cross cultural comparison of the meanings attached to medieval manhood The collection also highlights the value of employing gender as a vital means of assessing relationships between

different groups of men whose values and standards of behaviour were socially and culturally constructed in distinct ways **Godeffroy of Boloyne** William (of Tyre, Archbishop of Tyre),1973 Romancing Treason Megan Leitch, 2015-01-29 Romancing Treason addresses the scope and significance of the secular literary culture of the Wars of the Roses and especially of the Middle English romances that were distinctively written in prose during this period Megan Leitch argues that the pervasive textual presence of treason during the decades c 1437 c 1497 suggests a way of conceptualising the understudied space between the Lancastrian literary culture of the early fifteenth century and the Tudor literary cultures of the early and mid sixteenth century Drawing upon theories of political discourse and interpellation and of the power of language to shape social identities this book explores the ways in which in this textual culture treason is both a source of anxieties about community and identity and a way of responding to those concerns Despite the context of decades of civil war treason is an understudied theme even with regards to Thomas Malory's celebrated prose romance the Morte Darthur Leitch accordingly provides a double contribution to Malory criticism by addressing the Morte Darthur's engagement with treason and by reading the Morte in the hitherto neglected context of the prose romances and other secular literature written by Malory's English contemporaries This book also offers new insights into the nature and possibilities of the medieval romance genre and sheds light on understudied texts such as the prose Siege of Thebes and Siege of Troy and the romances William Caxton translated from French More broadly this book contributes to reconsiderations of the relationship between medieval and early modern culture by focusing on a comparatively neglected sixty year interval the interval that is customarily the dividing line the no man's land between well but separately studied periods in English literary studies **Typographical** Antiquities Joseph Ames, 1749 Remembering the Crusades and Crusading Megan Cassidy-Welch, 2016-11-03 Remembering the Crusades and Crusading examines the diverse contexts in which crusading was memorialised and commemorated in the medieval world and beyond The collection not only shows how the crusades were commemorated in the twelfth and thirteenth centuries but also considers the longer term remembrance of the crusades into the modern era This collection is divided into three sections the first of which deals with the textual material and visual sources used to remember Each contributor introduces a particular body of source material and presents case studies using those sources in their own research The second section contains four chapters examining specific communities active in commemorating the crusades including religious communities family groups and royal courts Finally the third section examines the cultural memory of crusading in the Byzantine Iberian and Baltic regions beyond the early years as well as the trajectory of crusading memory in the Muslim Middle East This book draws together and extends the current debates in the history of the crusades and the history of memory and in so doing offers a fresh synthesis of material in both fields It will be essential reading for students of the crusades and memory Typographia, Or, The Printers' Instructor John Johnson, 1824 Bulletin of the Public Library of the City of Boston Boston Public Library, 1897 William Caxton and English Literary Culture N.
