

NEOtech Program Goals

In the 8 years that the **NEOtech program** has been operating, the focus of our approach has been to complement the efforts of discovery surveys through real-time faint object **astrometric follow-up and physical characterization** of both newly discovered NEO targets-of-opportunity and known NEOs or virtual impactors. This includes the acquisition of time-series photometric data (i.e., lightcurves), and spectrophotometry/spectroscopy. Therefore, for **8 nights per month**, we contribute to the dataset that is required to address the following:

1. The need to confirm and catalog the orbits of faint NEOs.
2. The uncertainty in the NEO population size distribution.
3. The unknown material and inferred strengths of NEOs.

Follow-up takes precedence over characterization studies
