Hot blood is eternal passion is in all directions fight with me to the sky Fight Solving the Evolutionary Puzzle of Human Cooperation Glenn Barenthin, 2019-09-05 In this book Glenn Barenthin provides a new solution to a key question in the cognitive and evolutionary study of religion why do humans cooperate What led humans uniquely among animals to have large scale civilizations with unprecedented cooperation One explanation propagated by the Big God Proponents BGP argues that a moralizing God is the crucial motivator for the pro social behaviour necessary for large scale civilization To explore this idea Barenthin provides a critical assessment of the evidence provided by the BGP and also discusses the place of God in our moral thinking However using evidence from anthropology history cognitive science psychology and game theory Barenthin presents a new theory that the evolutionary pressures faced by our forebears paved the way for emerging humans to engage in what he terms thin cooperation This type of cooperation requires individuals to comprehend the reasons for their actions and it is often done with others in mind Finally Barenthin argues that humans also have the capacity for thick cooperation which is made possible by those fighting for the rights of strangers in an attempt to make the world a fairer place for a greater number of people God Naturalized Halvor Kvandal, 2021-10-27 This volume argues that theistic philosophy should be seen not as an armchair enterprise but rather as a critical endeavor to bring philosophy of religion into close contact with emerging sciences of religion This text engages with the rationality of religious belief by investigating central problems and arguments in philosophy of religion from the perspective of new naturalistic research A central question the book analyzes is whether findings in cognitive science of religion CSR falsify or undermine religious ideas and beliefs With regard to CSR this volume offers a sustained and critical investigation of the neutrality and positive relevance view before offering a re appraisal of the conflict view The text argues that when scrutinizing these views much more attention must be paid to specific normative premises that allow empirical findings to have epistemic relevance A novel feature is the theoretical application of analytical epistemology in virtue epistemology to the central question of whether CSR undermines supports or is neutral with respect to religious belief This book appeals to upper level students and researchers Notes of what I Saw and how I Saw it Loring Converse.1882 in the field
