This new edition of Barrie Dyster and David Meredith's highly successful book is fully updated and includes three new chapters covering until the end of 2011. The book explores the evolution of Australia's position in the global economy from the start of the twentieth century through to the present day, examining the international and local economies of five key historical periods. With a focus on trade, foreign investment and immigration, the book considers periods both of growth and decline. **Australia** John Wiseman, 2020-09-28 Social policy affects everyone and is everyone's business. Even if you do not receive welfare payments directly or indirectly, you benefit from government services and funding. Yet how are policies and programs actually developed? Can social policy help us create a more just society? This book offers an introduction to the theory and practice of social policy making in Australia. Using detailed case studies, it covers the ideas and values which inform the social policy process, how different groups can influence policy making, how social policy making takes place in social and political organisations, the political nature of policy making. **Making Social Policy in Australia** is the most up to date introduction to Australian social policy currently available and is essential reading for students and practitioners in human and community service work and government. Tony Dalton, Mary Draper and John Wiseman, lecture in Social Work and Social Sciences at RMIT Melbourne. Inclusive Growth in Australia John Buchanan, 2020-07-16 Inclusive Growth in Australia overturns two decades of assumptions that

social policy is wasteful and a source of dependency It reflects a global resurgence of the understanding that an active and effective social policy regime is vital not only for a flourishing society but also for a strong economy It explains this new paradigm of inclusive growth and shows how it can be implemented in Australia Inclusive growth dismantles the idea that social development will automatically trickle down from untrammelled market based growth Rather growth must be managed so that it is employment centred broad based across sectors and with a social security system promoting sustainability and equality of opportunity The editors argue that productivity is nearly everything when it comes to raising living standards So while social policies will be about goals other than the economy they must demonstrate their compatibility with an economic growth strategy With contributions from leading national and international experts in the field including Marian Baird Grant Belchamber Gerald Burke Saul Eslake Roy Green and Peter Whiteford Inclusive Growth in Australia shows that welfare state spending is as much an economic investment as a measure of social protection Written for policy makers industry and NGOs as well as students Inclusive Growth in Australia locates Australian economic and social policy within the most important emergent themes shaping international debate

**Captured** Phillip Toner, Michael Rafferty, 2024-08-01 Four decades ago faced with a series of economic political and social crises business and government leaders in Australia and many other nations were convinced by a well organised ideological insurgency of the need for what at first was presented as a series of technical changes in economic policy However neoliberalism quickly became a revolutionary agenda for re ordering the social democratic state Captured How neoliberalism transformed the Australian state directs attention to the central role of state power not just to remake markets but also to remake a broad swathe of political life social policy and citizenship In seeking to undermine the power of organised labour and unleash market capitalism neoliberalism promised a surge of competition productivity and

common prosperity For the wealthy few this has indeed been an historically unprecedented time of capital accumulation but for most the results have been profoundly disappointing Today neoliberalism is in crisis We are living through an age of great instability disillusionment and despair Inequality of income and wealth has been rising a majority of workers have experienced long term declining relative living standards corporate political and market power has reached historic levels and younger generations are increasingly giving up the expectation of attaining the living standards of their parents The status of prevailing neoliberal ideas and policy is in increasing disarray But without a coherent understanding of the ideas and interests driving neoliberalism many people have turned to incoherent populism for an explanation and salvation and failing that even to forms of nihilism Disillusion and anxiety constitute the dominant mood among the economic and policy elites within Australia and internationally Captured presents a series of case studies from leading public policy experts building critical new insights into the malaise that has characterised the neoliberal era This book tells the story of how a small group of economists and lobby groups with a universalising agenda of radical change used neoliberalism to transform the state and of the destructive effects of those policies on everyday life Captured includes critical accounts of neoliberal policy and speculates on the likely future of neoliberalism as a form of political power and governmentality in Australia

**Australian Politics at a Crossroads** Matteo Bonotti, Narelle Miragliotta, 2024-02-29 As the 21st century proceeds apace Australia faces new and old challenges both domestically and internationally These include managing complex governance issues preventing democratic fracture balancing an ever shifting geopolitical strategic order addressing the recognition and identity demands of marginalised groups and responding to crises and urgent policy challenges such as climate change Bonotti Miragliotta and the other contributors to this volume analyse and evaluate the challenges which confront Australia by locating them in their national and comparative context The various contributions reveal that while these challenges are neither novel nor unique to Australia the way in which they manifest and Australia's

responses to them are shaped by the country's distinctive history, culture, geography, location and size. The chapters offer a cutting edge analysis of these pressing challenges faced by Australia and offer reflections on how to address them. The book is a valuable resource for scholars and students of Australian politics and of comparative politics in a global perspective.
