Education In Canada:

  Education in Canada Paula Dunning,Canadian Education Association,1997 Presents an overview of the Canadian educational system s current status its governance and funding structures its program offerings and major trends divided into three main areas elementary and secondary post secondary and adult education   **Higher Education in Canada** Glen A. Jones,2012-06-25 Published in 1997 People wishing to learn the major phases in the development of Canada s twelve postsecondary higher education systems over the 1945 95 period will find this an essential starting point   *Science Education in Canada* Christine D. Tippett,Todd M. Milford,2019-07-01 This book offers a meso level description of demographics science education and science teacher education Representing all 13 Canadian jurisdictions the book provides local insights that serve as the basis for exploring the Canadian system as a whole and function as a common starting point from which to identify causal relationships that may be associated with Canada s successes The book highlights commonalities consistencies and distinctions across the provinces and territories in a thematic analysis of the 13 jurisdiction specific chapters Although the analysis indicates a network of policy and practice issues warranting further consideration the diverse nature of Canadian science education makes simple identification of causal relationships elusive Canada has a reputation for strong science achievement However there is currently limited literature on science education in Canada at the general level or in specific areas such as Canadian science curriculum or science teacher education This book fills that gap by presenting a thorough description of science education at the provincial territorial level as well as a more holistic description of pressing issues for Canadian science education   Physical and Health Education in Canada Barrett, Joe,Scaini, Carol,2019 Physical and Health Education in Canada Integrated Strategies for Elementary Teachers is a compendium of integrated evidence based approaches to physical and health education teaching from leading physical and health educators and researchers from across Canada   A Bibliography of Higher Education in Canada Supplement 1981 / Bibliographie de l'enseignement supérieur au Canada Supplément 1981 Robin S. Harris,Marcel de Grandpre,Hazel Roberts,Hugh Smith,1981-12-15 The 1981 Supplement adds more than 3000 entries to the approximately 10 500 listed in the original volume and in the 1965 and 1971 Supplements Like its predecessors this volume provides a full list of the secondary sources related to Canadian higher education books articles theses dissertations and reports published from 1971 to 1980 The reporting arrangement of entries and overall organization of the material remains the same as in the 1971 Supplement   *Documentary History of Education in Upper Canada, from the Passing of the Constitutional Act of 1791 to the Close of Dr. Ryerson's Administration of the Education Department in 1876: 1860* John George Hodgins,1906   **A History of Early Childhood Education in Canada, Australia, and New Zealand** Larry Prochner,2010-01-01 In the early nineteenth century governments developed kindergartens and infant schools to give children a head start in life These programs hinged on new visions of childhood that originated in England and Europe but what happened when they were transported to the

colonies This book unwinds the tangled threads of this history by tracing how Enlightenment thought and Romantic ideas translated into early infant schools in England kindergartens in Germany and the United States and free kindergarten systems in the Commonwealth countries The systems that emerged in Canada Australia and New Zealand maintained the integrity of the ideas and models that inspired them but adapted them to suit local ideas politics and populations This unique account of early childhood education in comparative perspective provides fresh insight into how to reconcile educational theory and practice in an increasingly global world **Canadian Education** Wilfred B. W. Martin,Allan J. Macdonell,1978

International Education as Public Policy in Canada Merli Tamtik,Roopa Desai Trilokekar,Glen A. Jones,2020-10-07 In the early twenty first century international education emerged as an almost ubiquitous concept within discussions of educational curriculum the objectives of schools universities and colleges and government policies for K 12 and higher education Although far from a new phenomenon many jurisdictions now view international education as a highly competitive global industry This book provides a comprehensive analysis of international education policy in Canada tracing the complex history of when how and why it emerged as a policy area of strategic importance Illuminating a uniquely Canadian perspective influenced by regional interests and federal provincial tensions International Education as Public Policy in Canada addresses challenging questions Why was Canada a latecomer in addressing this policy issue What is the relationship between international education and Canadian immigration policy How did international education develop as a major Canadian industry The resulting essays from leading scholars contribute not only to the growing Canadian literature on international education policy but also to a critical global conversation Contemplating where the Canadian story of international education is headed International Education as Public Policy in Canada calls for a broader debate on ethical practices in internationalization focusing on inclusion equity compassion and reciprocity **Decolonizing and Indigenizing Education in Canada** Dr. Sheila Cote-Meek,Dr. Taima Moeke-Pickering,2020-06-01 Decolonizing and Indigenizing Education in Canada thinks boldly about how to make space for Indigenous knowledges and have an honest discourse on truth and reconciliation By engaging with Indigenous epistemologies and strategies the contributors navigate the complexities of the decolonization and indigenization of post secondary institutions What is needed in this field is less theorizing and more action the contributors offer practical steps on how one might positively transform the Canadian academy Through this lens of action based solutions each of the fifteen chapters advances critical scholarship on issues of pedagogy curriculum shifting power dynamics and challenging Eurocentric perspectives in higher education With contributions from both Indigenous and non Indigenous academics from across Canada and in varying academic positions Decolonizing and Indigenizing Education in Canada provides a unique perspective specific to the Canadian education system Featuring discussion questions further reading lists and practical examples of how to engage in decolonization work within the academy this text is an essential resource for students and scholars studying Indigenous knowledges education and

pedagogies and curriculum studies **Early Childhood Care and Education in Canada** Larry Prochner,2011-11-01 Formal programs for the care and education of young children in Canada have a history that goes back almost 200 years yet issues surrounding services for our youngest Canadians continue to be hotly contested as we begin a new century In Canada early childhood care and education are striking for their tremendous diversity on such key issues as curriculum financing and teacher education The range of programs and philosophies can be overwhelming for parents practitioners academics researchers and policy makers alike Larry Prochner and Nina Howe reflect the variation within the field by bringing together a multidisciplinary group of experts to address key issues in the field What programs are currently available and what are their origins How are adults prepared for work in these programs How do children within the programs spend their day What policies guide the programs How has the field reflected on itself through research There are no simple answers but the essays in this collection contribute to a creative reframing of the questions The authors include psychologists sociologists historians teacher educators and social policy analysts Early Childhood Care and Education in Canada will be of interest to students teachers and researchers in child study early education policy studies and history With cutbacks to early education programs a shortage of daycare spaces and uncertainty about future levels of support the time is ripe for a close examination of the services we provide for our youngest citizens *Christian Higher Education in Canada* Stanley E.
