Britain's Attempts to Create a National Vocational Educational and Training System Ewart Keep, 1987 *Britain's Economic Performance* Tony Buxton, Paul Chapman, Paul G Chapman, Paul Temple, 2005-08-08 This new and substantially revised edition of Britain's Economic Performance provides a unique assessment of the current state of the supply side of the economy. The Political Economy of Poverty, Equity and Growth: A Comparative Study Deepak Lal, H. Myint, 1998-10-08 This wide ranging and innovative book synthesises the findings of a major international study of the political economy of poverty, equity and growth. It is based primarily on analytical economic histories of 21 developing countries from 1950 to 1985 but also takes account of the wider literature on the subject. The authors take an ambitious interdisciplinary approach to identify patterns in the interplay of initial conditions, institutions, interests and ideas which can help to explain the different growth and poverty alleviation outcomes in the Third World. Three different types of poverty are distinguished based on their causes and a more nebulous idea of equity in contrast to egalitarianism is shown to have influenced policy. Since growth is found to be the major means of alleviating mass structural poverty, much of the book is concerned with discovering explanations for policies which are found to be the most important influences on the proximate causes of growth. Lal and Myint also consider the available evidence on the role of direct transfers, public and private, in alleviating destitution and conjunctural poverty. The Political Economy of Poverty, Equity and Growth develops a novel framework for the comparative analysis of different growth outcomes. This framework distinguishes between the different relative factor endowments of land, labour and capital and between the different organizational structures of peasant versus plantation and mining economies. It also differentiates between the politics of autonomous and factional states in the countries studied, breaking the analysis down into further typological subdivisions and providing important new insights into the differing behaviour of economies that are rich in natural resources and those with abundant labour. These insights constitute a richer explanation for the divergent developmental outcomes in East Asia compared with Latin America and Africa. The evidence collated is used to argue for the continuing relevance of the classical liberal viewpoint on public policies for development and to show why even so nationalist ideologies are likely to be adopted and lead to cycles of interventionism and liberalism. The evidence is also used to provide an explanation for the surprising current worldwide Age of Reform.

Environment and Planning, 1985 Research in Education, 1974 **After the Waste Land** Samuel Bowles, David M. Gordon, Thomas E. Weisskopf, 2015-05-20 This critique of Reaganomics attempts to provide alternatives to both the supply experiments of the 1980s and neoliberal strategies of austerity. It presents arguments for economic democracy with a worker oriented blueprint for improving productivity, growth, employment and economic justice.

Economic Growth and Fiscal Planning in New York William Duncombe,2017-09-08 In an era of federal deficits and struggling municipalities states have emerged as the most significant governmental actors But state governments face the major challenge of fiscal planning in the midst of economic change Roy Bahl and William Duncombe tackle this challenge head on Using New York as a case study they identify looming dangers for state revenue and expenditure planning Bahl and Duncombe begin with the premise that one cannot separate an evaluation of fiscal performance from an evaluation of economic performance Accordingly they describe and analyze the patterns of population employment and personal income growth Following this is a study of state and local government finances in New York since 1970 and a recounting of the fiscal adjustments that were taken in the face of slower and then faster growth in the economy The authors conclude that based on current conditions the state and its local governments are in for fiscal belt tightening They note that the state should take a comprehensive view in planning the development and retrenchment of its government sector The book is thought provoking exhaustively researched and sensibly written Its lessons are applicable everywhere and should be read by all those seeking a route through the tangled thicket of government policy for economic growth

Prisoners of Reason S. M. Amadae,2016-01-14 Is capitalism inherently predatory Must there be winners and losers Is public interest outdated and free riding rational Is consumer choice the same as self determination Must bargainers abandon the no harm principle Prisoners of Reason recalls that classical liberal capitalism exalted the no harm principle Although imperfect and exclusionary modern liberalism recognized individual human dignity alongside individuals responsibility to respect others Neoliberalism by contrast views life as ceaseless struggle Agents vie for scarce resources in antagonistic competition in which every individual seeks dominance This political theory is codified in non cooperative game theory the neoliberal citizen and consumer is the strategic rational actor Rational choice justifies ends irrespective of means Money becomes the medium of all value Solidarity and good will are invalidated Relationships are conducted on a quid pro quo basis However agents can freely opt out of this cynical race to the bottom by embracing a more expansive range of coherent action
